Gorbachev's Revolution Economic Pressures And Defence Realities:

Gorbachev's Revolution Christopher N. Donnelly, 1989 *The Struggle to Save the Soviet Economy* Chris Miller, 2016-10-13 For half a century the Soviet economy was inefficient but stable In the late 1980s to the surprise of nearly everyone it suddenly collapsed Why did this happen And what role did Soviet leader Mikhail Gorbachev's economic reforms play in the country's dissolution In this groundbreaking study Chris Miller shows that Gorbachev and his allies tried to learn from the great success story of transitions from socialism to capitalism Deng Xiaoping's China Why then were efforts to revitalize Soviet socialism so much less successful than in China Making use of never before studied documents from the Soviet politburo and other archives Miller argues that the difference between the Soviet Union and China and the ultimate cause of the Soviet collapse was not economics but politics The Soviet government was divided by bitter conflict and Gorbachev the ostensible Soviet autocrat was unable to outmaneuver the interest groups that were threatened by his economic reforms Miller's analysis settles long standing debates about the politics and economics of perestroika transforming our understanding of the causes of the Soviet Union's rapid demise

Soviet Strategy and the New Military Thinking Derek Leebaert, Timothy Dickinson, 1992 This book first published in 1991 analyses the unprecedented changes as well as the troubling continuities that characterized Soviet military thinking during the early 1990s **Soviet Power: The Continuing Challenge** James Sherr, 1991-06-18 Representing the culmination of an RUSI main theme study *Soviet Power and Prospects* this volume is based on the Institute's proposition that military power exerts a profound influence on the course of world politics and that such power cannot be divorced from its social and political context

Soviet Defense Against Operation Barbarossa: A Possible Model For Future Soviet Defensive Doctrine Major Terry B. Wilson, 2015-11-06 This monograph examines the historic attack by Adolf Hitler's Germany against the Soviet defenses in 1941 It examines actions of both armed forces to analyze what went wrong and what went right for each side It focuses on Soviet defenses to determine the usefulness of defensive planning and operations of 1941 to today's announced policy of reasonable sufficiency and non offensive defense The monograph begins with an analysis of current Soviet military doctrine and President Gorbachev's stated political ideal of reasonable sufficiency and his goal for the military of a doctrine of non offensive defense The monograph continues with an examination of Soviet military theory an historical analysis of Operation Barbarossa and an analysis of the usefulness of the campaign for modern doctrinal development The Soviets use historical models in the scientific development of their doctrine *The Strategic Implications of Change in the Soviet Union* Francois Heisbourg, 1990-06-18 This text is a compilation of papers together with a summing up of the origins and sustainability of change in the Soviet Union and the implications for the super power dialogue for East West strategic and economic relations for Europe and for the Asia Pacific *The Political Economy of War and Peace* Murray Wolfson, 2012-12-06 cancer n any malignant tumor Metastasis may occur via the bloodstream or the lymphatic channels or across body cavities setting up

secondary tumors Each individual primary tumor has its own pattern There are probably many causative factors Treatment depends on the type of tumor the site of the primary tumor and the extent of the spread Oxford Concise Medical Dictionary 1996 97 Let us begin by stating the obvious Acts of organized violence are not necessarily of human nature but they are endogenous events arising within the an intrinsic part evolution of complex systems of social interaction To be sure all wars have features in common people are killed and property is destroyed but in their origin wars are likely to be at least as different as the social structures from which they arise Consequently it is unlikely that there can be a simple theory of the causes of war or the maintenance of peace The fact that wars are historical events need not discourage us On the contrary we should focus our understanding of the dimensions of each conflict or classes of conflict on the conjuncture of causes at hand It follows that the study of conflict must be an interdisciplinary one It is or a penchant for eclecticism that leads to that conclusion but the not humility multi dimensionality of war itself

Soviet Military Art in a Time of Change Robert C. M. Hall, 1991 An appreciation of the command and control system of any Armed Forces provides the key to understanding how the military power of that state is used In the present climate of political and economic instability in the Soviet Union a thorough examination of Soviet command and control is essential The author describes the origins and current configurations of the system He explains how technological advances in weapons systems and developments in troop control have promoted change at all levels These in turn have influenced military doctrine the constantly evolving set of precepts and theories that define much of Soviet strategic and operation practice Dust jacket
