Gospoda S Geksogenom

**Andrew Wilson, Professor of the
Archaeology of the Roman Empire
Andrew Wilson**

Gospoda S Geksogenom:

Television and Presidential Power in Putin's Russia Tina Burrett, 2010-12-14 As a new president takes power in Russia this book provides an analysis of the changing relationship between control of Russian television media and presidential power during the tenure of President Vladimir Putin. It argues that the conflicts within Russia's political and economic elites and President Putin's attempts to rebuild the Russian state after its fragmentation during the Yeltsin administration are the most significant causes of changes in Russian media. Tina Burrett demonstrates that President Putin sought to increase state control over television as part of a larger programme aimed at strengthening the power of the state and the position of the presidency at its apex and that such control over the media was instrumental to the success of the president's wider systemic changes that have redefined the Russian polity. The book also highlights the ways in which oligarchic media owners in Russia used television for their own political purposes and that media manipulation was not the exclusive preserve of the Kremlin but a common pattern of behaviour in elite struggles in the post-Soviet era. Basing its analysis predominately on interviews with key players in the Moscow media and political elites and on secondary sources drawn from the Russian and Western media, the book examines broad themes that have been the subject of constant media interest and have relevance beyond the confines of Russian politics.

Virtual Politics Andrew Wilson, Professor of the Archaeology of the Roman Empire Andrew Wilson, 2005-01-01 States like Russia and Ukraine may not have gone back to totalitarianism or the traditional authoritarian formula of stuffing the ballot box, cowering the population and imprisoning the opposition or not obviously. But a whole industry of political technology has developed instead with shadowy private firms and government fixers on lucrative contracts dedicated to the black arts of organizing electoral success. This book uncovers the sophisticated techniques of the virtual political system used to legitimize post-Soviet regimes: entire fake parties, phantom political rivals and scarecrow opponents. And it exposes the paramount role of the mass media in projecting these creations and in falsifying the entire political process. Wilson argues that it is not primarily economic problems that have made it so difficult to develop meaningful democracy in the former Soviet world. Although the West also has its spin doctors, dirty tricks and aggressive ad campaigns, it is the unique post-Bolshevik culture of political technology that is the main obstacle to better governance in the region, to real popular participation in public affairs and to the modernization of the political economy in the longer term.
