## **Gossypol A Potential Contraceptive For Men:**

**Gossypol** Sheldon J. Segal, 2012-12-06 The search for a reversible male contraceptive has centered upon the suppression of sperm production or sperm motility Gossypol a natural substance extracted from the cotton plant appears to cause both of these effects Its ability to reduce spermatogenesis in men is undeniable and has been demonstrated in both large studies in China and a smaller confirmatory study in Brazil These investigations have revealed the remarkable fact that with gossypol it is possible to separate an effect on the testis gamete producing function from an effect on its hormone producing function Thus it is possible to maintain normal testosterone levels and libido while sperm counts and motility fall Because of this unique and important action gossypol warrants the fullest possible evaluation as a potential male contraceptive Sheldon J Segal vii ACKNOWLEDGMENT Lynn C Landman played a major role in this publication by skillfully editing the manuscripts which were submitted for inclusion in this volume Janet O Connell added her efforts in editing assembling texts and figures and handling final details required for publication I thank these talented colleagues for their invaluable contributions

Nieschlag, E. Nieschlag, Ursula-F. Habenicht, 2013-04-17 Investigations into the mechanisms of spermatogenesis sperm maturation and fertilization provide the basis of our understanding of male reproductive physiology Since in recent years molecular and cellular endocrinology has provided particularly important contributions to our knowledge the European Workshops on Molecular and Cellular Endocrinology of the Testis held regularly during even years since 1980 have become a prominent forum for researchers in the field to discuss recent findings and exchange new ideas The most recent of these Testis Workshops the 7th was held on May 5-10 1992 at Castle Elmau in the Bavarian Alps The main lectures of this Workshop form the core of this book In order to provide a broader view of the current status of male reproduction research this volume also contains the proceedings of the Schering Foundation Workshop on Basic Mechanisms of Reproduction and Male Fertility Control which was held in Berlin on October 31 to
