Albrecht Dürer and the Embodiment of Genius Jeffrey Chipps Smith, 2020-10-09 During the nineteenth century Albrecht Dürer's art piety and personal character were held up as models to inspire contemporary artists and it was hoped to return Germany to international artistic eminence In this book Jeffrey

Chipps Smith explores Dürer's complex posthumous reception during the great century of museum building in Europe with a particular focus on the artist's role as a creative and moral exemplar for German artists and museum visitors. In an era when museums were emerging as symbols of civic regional and national identity, dozens of new national princely and civic museums began to feature portraits of Dürer in their elaborate decorative programs embellishing the facades, grand staircases, galleries and ceremonial spaces. Most of these arose in Germany and Austria, though examples can be seen as far away as St Petersburg, Stockholm, London and New York City. Probing the cultural, political and educational aspirations and rivalries of these museums and their patrons, Smith traces how Dürer was painted, sculpted and prominently placed to accommodate the era's diverse needs and aspirations. He investigates what these portraits can tell us about the rise of a distinct canon of famous Renaissance and Baroque artists, addressing the question of why Dürer was so often paired with Raphael, who was considered to embody the greatness of Italian art, and why, with the rise of German nationalism, Hans Holbein the Younger often replaced Raphael as Dürer's partner. Accessibly written and comprehensive in scope, this book sheds new light on museum building in the nineteenth century and the rise of art history as a discipline. It will appeal to specialists in nineteenth-century and early modern art, the history of museums and collecting, and art historiography.

Classical Influences on European Culture, A.D. 1500-1700 R. R. Bolgar, 1976-04-15 The papers illustrate the different ways in which the Renaissance made use of its classical heritage

Styles And Types Of American Architecture Alan Gowans, 1993-04-06 Discussing North American buildings, this book relates them to time and place, defining and identifying central characteristics, explaining social function and cultural expression. It integrates interior design and social and cultural history from the 17th century to the present

Actors Carved and Cast Ethan Matt Kavalier, 2024-05-23 Painting has long dominated discussions of Netherlandish art. Yet in the sixteenth century, sculpture was held in considerably higher regard than painting, especially in foreign lands. This beautifully illustrated book is the first comprehensive study of sixteenth-century Netherlandish sculpture, and it opens an important window onto the works and milieu of these artists. Netherlanders dominated the sculptural world of northern Europe. They made the most prestigious tombs and altarpieces, alabaster reliefs and boxwood collectibles for patrons throughout Iberia, France and Central Europe. Even in Italy, they were a formidable presence: the most famous sculptor in Europe in the second half of the sixteenth century was Giambologna, a Fleming who spent the greater part of his career in Florence. A great many of these artists immigrated to foreign courts, so many that the history of Netherlandish sculpture in the second half of the sixteenth century plays out largely abroad. Netherlandish carvers and casters relocated to what are today Austria, Denmark, England, France, Germany, Italy, Poland, Portugal, Spain, Sweden and Ukraine. Sculpture, more so than painting, was an essential tool in discourses of power. Offering an essential new perspective on a fascinating period in art history, *Actors Carved and Cast* will appeal to scholars of sculpture and all those interested in Northern Renaissance art
