Gothic Architecture and Scholasticism Erwin Panofsky, 1976
Panofsky, 2003-01-01 **Scholasticism** Jose Ignacio Cabezon, José Ignacio Cabezón, 1998-05-28 Leading scholars in the field of religious studies show that scholasticism as a comparative category is useful in the analysis of a variety of religious and philosophical traditions and even in the task of cultural criticism

Invisible Cathedrals Neil H. Donahue, 1995 Invisible Cathedrals places Wilhelm Worringer in the foreground of discussions of Expressionism and German Modernism for the first time These essays not only reveal the complexities of his individual works such as Abstraction and Empathy 1908 and Form Problems of the Gothic 1911 they also examine his lesser known books and essays of the post World War I years the 1920s and beyond Invisible Cathedrals offers both a basic introduction to Worringer's writings and their broad influence and a profound and detailed revisionist analysis of his significance in German and European Modernism It also provides the most comprehensive bibliography to date of his own work and of the scattered criticism devoted to Worringer in different disciplines Worringer's works were provocative widely read and often reprinted and were highly influential among artists and writers in Germany As a result they both raised suspicion in his own academic discipline of art history and excited discussion in other diverse fields such as literary and social theory psychology and film theory Worringer emerges here not solely as a scholarly commentator on the history of art but also as an activist scholar who engaged his historical criticism of other periods directly in the production of culture in his own time Contributors are Magdalena Bushart Neil H Donahue Charles W Haxthausen Michael W Jennings Joseph Masheck Geoffrey Waite and Joanna E Ziegler

The Spatial Logic of Social Struggle Nikolaus Fogle, 2011-04-07 Pierre Bourdieu's theory of practice is widely regarded as among the most innovative and illuminating fruits of recent social thought As evidence mounts that the spatial turn in the social sciences and humanities is no mere theoretical fad but rather an enduring paradigm of social and cultural research Bourdieu's status as a profoundly spatial thinker takes on a renewed importance The Spatial Logic of Social Struggle A Bourdieuan Topology focuses on Bourdieu's philosophy of space arguing that space is at once a condition for social knowledge a methodological instrument and a physical context for practice By considering Bourdieu's theory of social space and fields alongside his several accounts of socially potent physical spaces Nikolaus Fogle develops an understanding of the systematic co-determinations between social and physical space He traces Bourdieu's ideas about the spatiality of social life through his investigations of Algerian peasant villages and Gothic cathedrals as well as spaces of class lifestyle and cultural creation revealing that social and environmental struggles are only logical insofar as they are topological He also demonstrates how a Bourdieuan dialectical understanding of social and physical space can be brought to bear on contemporary issues in architecture and urban development This book will be useful and accessible not only to philosophers but also to architects geographers sociologists and other scholars in the social sciences and humanities who take an interest in the social theory of

Williams, 2018-12-13 What is the place of architecture in the history of art Why has it been at times central to the discipline and at other times seemingly so marginal What is its place now Many disciplines have a stake in the history of architecture sociology anthropology human geography to name a few This book deals with perhaps the most influential tradition of all art history examining how the relation between the disciplines of art history and architectural history has waxed and waned over the last one hundred and fifty years In this highly original study Mark Crinson and Richard J Williams point to a decline in the importance attributed to the role of architecture in art history over the last century which has happened without crisis or self reflection The book explores the problem in relation to key art historical approaches from formalism to feminism to the social history of art and in key institutions from the Museum of Modern Art to the journal *October* Among the key thinkers explored are Banham Baxandall Giedion Panofsky Pevsner Pollock Riegl Rowe Steinberg Wittkower and W Ifflin The book will provoke debate on the historiography and present state of the discipline of art history and it makes a powerful case for the reconsideration of architecture *Art Education, Scholastic and Industrial* Walter Smith, 1872 **Thinking of the Middle Ages** Benjamin A. doing These questions have given rise to considerable controversy which is fully reflected in the papers selected here The first section of the book is concerned with the medieval builders and their design methods the second focuses on engineering issues in the context of the infamous collapse of the choir at Beauvais in 1284 The following papers extend the analysis into the 15th century looking for example at Brunelleschi's dome for Florence Cathedral and deal with the often neglected structures of roofs towers and spires *Art And Architecture In Medieval France* Whitney S. Stoddard, 2018-02-20 This is an English language study on the architecture and art of medieval France of the Romanesque and Gothic periods between 1000 1500 In addition to essays on individual monuments there are general discussions of given periods and specific problems such as why did Gothic come into being Whitney Stoddard explores the interrelationship between all forms of medieval ecclesiastical art and characterization of the Gothic cathedral which he believes to have an almost metaphysical basis

Commonweal **Rage and Denials** Branko Mitrović, 2015-08-13 In *Rage and Denials* philosopher and architectural historian Branko Mitrović examines in detail the historiography of art and architecture in the twentieth century with a focus on the debate between the understanding of society as a set of individuals and the understanding of individuals as mere manifestations of the collectives to which they belong The conflict between these two views constitutes a core methodological problem of the philosophy of history and was intensely debated by twentieth century art historians one of the few art historical debates with a wide range of implications for the entire field of the humanities Mitrović presents the most significant positions and arguments in this dispute as they were articulated in the art and architectural historical discourse as well as in the wider context of the historiography and philosophy of history of the era He explores the philosophical content of scholarship engaged in these debates examining the authors positions the intricacies and implications of their arguments and the rise and dominance of collectivist art historiography after the 1890s He centers his study on the key art historical figures Erwin Panofsky Ernst Gombrich and Hans Sedlmayr while drawing attention to the writings of the less well known Vasilii Pavlovich Zubov *Rage and Denials* offers a valuable window onto how key aspects of modern research in the humanities took shape over the course of the twentieth century

Theology in Built Environments Sigurd Bergmann, 2017-07-12 Built space is both a physical entity as well as a socially and historically constructed place It constantly interacts with human beings affecting their behavior thinking and feeling Doing religious work in a particular environment implies acknowledging the surroundings to be integral to theology itself The contributors to this volume view buildings scriptures conversations prayers preaching artifacts music and drama and built and natural surroundings as contributors to a contextual theology The view of the environment in which religion is practiced as integrated with theology represents not just a new theme but also a necessity if one is to understand religion's own depth Reflections about space and place and how they reflect and affect religious experience provide a challenge and an urgent necessity for theology This is particularly important if religious practitioners are to become aware of how theology is given expression in the existential spatiality of life Can space set theology free This is a challenging question one that the editor hopes can be answered at least in part in this volume The diversity of theoretical concepts in aesthetics cultural theory and architecture are not regarded as a problem to be solved by constructing one overarching dominant theory Instead this diversity is viewed in terms of its positive potential to inspire discourse about theology and aesthetics In this discourse theology does not need to become fully

dependent on one or another theory but should always clearly present its criteria for choosing this or that theoretical framework This volume shows clearly how different modes of design in sacred spaces capture a sense of the religious *The Premodern Condition* Bruce Holsinger, 2005-12 Bruce Holsinger identifies and explains an affinity for medievalism and medieval studies among the leading figures of critical theory His book contains original essays by Bataille and Bourdieu translated into English that testify to the strange persistence of medievalisms in French postwar writings **Modern Perspectives in Western Art History** W. Eugene Kleinbauer, Medieval Academy of America, 1989-01-01 A collection of essays that reflect the breadth of twentieth century scholarship in art history Kleinbauer has sought to illustrate the variety of methods scholars have developed for conveying the unfolding of the arts in the Western world Originally published by Holt Rinehart and Winston 1971 Deforming American Political Thought Michael J. Shapiro, 2016-02-19 Deforming American Political Thought offers an alternative to the dominant American historical imagination treating issues that range from the nature of Thomas Jefferson's vision of an egalitarian nation to the persistence of racial inequality Presenting multifaceted arguments that transcend the myopic scope of traditional political discourses Michael J Shapiro summons disparate disciplines and genres architecture crime stories novels films and jazz blues music among others to provide approaches to the comprehension of diverse facets of American political thought from the founding to the present The book's various investigations disclose that there have always been dissenting voices articulated in diverse genres of expression that cast doubt on the moral purpose and exceptionalism of the American mind This highly anticipated updated second edition features a preface focusing on aesthetic theory and the contributions of artistic genres for political analysis and a completely new chapter on critical thinking about the US western and urban encounters afforded by the two HBO series Deadwood and The Wire respectively
