**A Narrative Approach to Organization Studies** Barbara Czarniawska-Joerges, 1998 From setting up the fieldwork to writing up the research this volume takes readers through the narrative approach to qualitative research with a focus on organization studies Inspired by the work of Bakhtin Eco Rorty and Silverman the author demonstrates that narratives are still the main carriers of knowledge in all societies Reworking Gender Karen Ashcraft, Dennis K Mumby, 2004 Reworking Gender is a remarkable analysis of the intersections of discourse gender and organizing that not only addresses contemporary metatheoretical concerns but also illuminates these issues with archival and interview data Reworking Gender systematically lays out arguments for the importance of work in our field for communication s connections with and potential contributions to related disciplines and for possible ways in which researchers can continue to challenge boundaries between presumably incommensurable discourses Without a doubt Reworking Gender will prove to be a landmark book in feminist critical cultural organization studies and organizational communication theorizing Patrice M Buzzanell Purdue University Reworking Gender A Feminist Communicology of Organization examines the place of gender and feminist scholarship in contemporary critical organization studies Departing from the common view of gender as a specialized branch of organization scholarship authors Dennis K Mumby and Karen Lee Ashcraft reposition feminism in a communication centered model that integrates recent developments in feminist critical and postmodern organizational studies Linking theory to practical projects the authors address many of the complex and often contradictory concerns of critical organizational scholarship including issues of discourse subjectivity power race and class In a compelling and timely fashion this important volume explores Gendered organization studies in the wake of the discursive turn The dynamic relationship between gender and organization The social construction of gendered work identities The intersection of gender race sexuality and class The dialectical relation of power and resistance With its interdisciplinary approach Reworking Gender A Feminist Communicology of Organization will be of significant interest to scholars and graduate students in such fields as organizational communication management and organization studies sociology and gender studies

**After Leadership** Brigid Carroll, Josh Firth, Suze Wilson, 2018-09-17 Leadership studies today resembles a bewildering diversity of theories concepts constructs and approaches struggling in huge part for meaning relevance and impact As Dennis Tourish so eloquently puts it much of the literature suffers from unrelenting triviality and sterile preoccupations Seeking to create a clean break from this current state of leadership studies After Leadership begins with the premise of a post apocalyptic world where only fragments of leadership science now remain echoing Alisdair McIntyre s imagining of such a scene as the basis for re establishing the foundations and focus of moral theory From these fragments the authors seek to construct a new

leadership studies that challenges much of the established thinking on leadership exposes its limitations and biases and most importantly seeks to construct the foundations of a more inclusive participatory bold relational and social platform for leadership in the future After Leadership thus imagines a brave new world where what leadership is and what we seek from it can be developed anew rather than remaining bound up in the problematic traditions and preoccupations that characterise leadership studies today Offering both full length chapter explorations that explore new ways of understanding and practicing leadership as well as shorter essays that aim to provoke further reflection on leadership and what we seek of it After Leadership offers a uniquely critical and creative collection that will inspire students scholars and leadership educators to reconsider their understanding and practice of leadership Halduskultuur 6 ,2005 *Process, Sensemaking, and Organizing* Tor Hernes,Sally Maitlis,2012-05-31 Process Sensemaking and Organizing is the first in a series of volumes which explore perspectives on process theories an emerging approach to the study of organizations that focuses on understanding activities interactions and change as essential properties of organizations rather than structures and state an approach which prioritizes activity over product change over persistence novelty over continuity and expression over determination Process and sensemaking may be seen as mutually interlocking phenomena and as such are cornerstones in process thinking This volume brings together contributions from an international group of scholars energized by process organization studies The collection offers perspectives from different disciplines insights from diverse theoretical traditions and contexts and parallels made with a range of cultural forms including art poetry and cookery At the same time the chapters exhibit a clear emphasis on a process ontology process theorizing and narrative thinking Across this rich and varied collection recurrent themes emerge that distinguish process theorizing from the more logico scientific variance oriented research that dominates organization studies today This book will appeal to academics researchers and graduate students in management organization studies and sociology who wish to better understand the emergent changing and flow like character of organizational life and expand their understanding of the nature of sensemaking as a basis for organizing **Text/Work** Stephen Linstead,2003-09-02 The concepts of social sciences social action and organizations as texts are no longer unfamiliar ones The use of language in social analysis has made researchers acutely aware of the importance of language use not only to contain and express experience but also to create second order accounts of these experiences This way of using language to shape our knowledge and guide social action it is urged makes social action and organization a text Text Work is an innovative exploration of our understanding of the textual nature of organizational life and considers the consequences of textual nature for organization studies How can organizations be profitably written into textual forms This is a bold investigation into a challenging and exciting area of study **The Varieties of Leadership at Novarum Pharmaceuticals** Robert Pernick,Floyd Kemske,2009-10-01 Storytelling is a time honored way of educating Case studies attempt to engage students but are limited because they do not develop characters or settings What is needed is a full length novel with

complex sympathetic characters and a story grounded in leadership and organizational behavior theories Novarum Pharmaceuticals is such a book Set in a large U S firm it follows the struggles of an executive vice president trying to launch an innovative joint venture with a Middle Eastern company The story proceeds from Nia Stevens first strategic proposal through various triumphs and setbacks to a final crisis in which she must choose between what she views as her career and her principles The main characters reveal a mix of motives and perceptions about each other and doing business in the Middle East They converge and clash and their actions change as the story unfolds Neither a tragedy nor a comedy the book is a plausible depiction of life within a modern corporation Novarum Pharmaceuticals embodies all the elements of a novel but unlike novels this one contains an index that professors and students alike can use to tie characters actions to theory The companion instructor s resource manual provides an extensive discussion framework for the professor with background material on the pharmaceutical industry resumes of the principle characters questions and suggested answers for every chapter descriptions of theory and concepts learning goals for each chapter and a bibliography of organization related fiction Novarum Pharmaceuticals will make a refreshing supplemental text in many courses in the undergraduate and graduate degree programs in business administration psychology sociology organization development public administration healthcare management and educational administration Immersion in this book gives students a deeper appreciation of the often conflicted nature of worker motivation better preparing them for navigating their own careers General business readers interested in the consequences of questionable ethical behavior and bad leadership will also find the book entertaining and useful
