Good Food Guide 1992:

The Good Food Guide 1991 Tom Jaine,1990 **Nutritionism** Gyorgy Scrinis,2013-06-18 Popularized by Michael Pollan in his best selling *In Defense of Food* Gyorgy Scrinis's concept of nutritionism refers to the reductive understanding of nutrients as the key indicators of healthy food an approach that has dominated nutrition science dietary advice and food marketing Scrinis argues this ideology has narrowed and in some cases distorted our appreciation of food quality such that even highly processed foods may be perceived as healthful depending on their content of good or bad nutrients Investigating the butter versus margarine debate the battle between low fat low carb and other weight loss diets and the food industry's strategic promotion of nutritionally enhanced foods Scrinis reveals the scientific social and economic factors driving our modern fascination with nutrition Scrinis develops an original framework and terminology for analyzing the characteristics and consequences of nutritionism since the late nineteenth century He begins with the era of quantification in which the idea of protective nutrients caloric reductionism and vitamins curative effects took shape He follows with the era of good and bad nutritionism which set nutricentric dietary guidelines and defined the parameters of unhealthy nutrients and concludes with our current era of functional nutritionism in which the focus has shifted to targeted nutrients superfoods and optimal diets Scrinis's research underscores the critical role of nutrition science and dietary advice in shaping our relationship to food and our bodies and in heightening our nutritional anxieties He ultimately shows how nutritionism has aligned the demands and perceived needs of consumers with the commercial interests of food manufacturers and corporations Scrinis also offers an alternative paradigm for assessing the healthfulness of foods the food quality paradigm that privileges food production and processing quality cultural traditional knowledge and sensual practical experience and promotes less reductive forms of nutrition research and dietary advice

Eating and Believing David Grumett, Rachel Muers, 2008-10-01 What are the links between people's beliefs and the foods they choose to eat In the modern Western world dietary choices are a topic of ethical and political debate but how can centuries of Christian thought and practice also inform them And how do reasons for abstaining from particular foods in the modern world compare with earlier ones This book will shed new light on modern vegetarianism and related forms of dietary choice by situating them in

the context of historic Christian practice It will show how the theological significance of embodied practice may be retrieved and reconceived in the present day Food and diet is a neglected area of Christian theology and Christianity is conspicuous among the modern world's religions in having few dietary rules or customs Yet historically food and the practices surrounding it have significantly shaped Christian lives and identities This collection prepared collaboratively includes contributions on the relationship between Christian beliefs and food practices in specific historical contexts It considers the relationship between eating and believing from non Christian perspectives that have in turn shaped Christian attitudes and practices It also examines ethical arguments about vegetarianism and their significance for emerging Christian theologies of food
