Media Talk Andrew Tolson, 2005-09-12 Over the past twenty years a focus on broadcast talk has emerged as an innovative approach to studying the media Adapting perspectives derived from Discourse and Conversation Analysis this approach investigates distinctive forms of mediated speech on TV and radio It provides original insights into the ways in which broadcasting stages discourse events interviews debates commentaries and verbal performances which are designed to attract and involve overhearing audiences Media Talk is the first book to provide a comprehensive review of this important work in terms which are accessible to students and non specialist readers It is however much more than a textbook being augmented throughout by the author s own research into contemporary sometimes controversial developments An introduction to this area of media studies and its distinctive methodologies is followed by chapters on news talk political talk

sports talk radio DJ talk talk shows celebrity interviews and reality TV The book is illustrated with examples from British and American radio and television Particular themes include the so called dumbing down of news and current affairs in increasingly conversational forms the design of forms of talk to appeal to particular target audiences the development of new forms of reality programming featuring unscripted verbal performances by ordinary people Memory, War and Trauma

Nigel C. Hunt,2010-05-13 Many millions of people are affected by the trauma of war Psychologists have a good understanding of how experiences of war impact on memory but the significance of external environmental influences is often disregarded Memory War and Trauma focuses on our understanding of the psychosocial impact of war in its broadest sense Nigel C Hunt argues that in order to understand war trauma it is critical to develop an understanding not only of the individual perspective but also of how societal and cultural factors impact on the outcome of an individual s experience This is a compelling book which helps to demonstrate why some people suffer from post traumatic stress while other people don t and how narrative understanding is important to the healing process Its multidisciplinary perspective will enable a deeper understanding of both individual traumatic stress and the structures of memory English Unlimited Intermediate B Combo with DVD-ROMs (2)
