Beck, 2010 The first basic thesis of Anti Roman Cryptograms in the New Testament Hidden Transcripts of Hope and Liberation is that the Jesus of history and his earliest and closest followers during his lifetime and during the decades after he had been crucified by the Romans had not only a deep longing for eternal life with God beyond the limits of this world but also a strong desire for liberation from Roman political economic and social oppression The second basic thesis of Anti Roman Cryptograms in the New Testament is that within the Christian Scriptures there are more hidden transcripts coded messages anti Roman cryptograms of hope and liberation for freedom now within this life than we have realized throughout most of the history of

interpretation Hidden transcripts of hope and liberation are coded so that oppressed people are able to communicate to their fellow oppressed people in ways in which their message and their intent are shielded from the perceptions of their oppressors These messages by the Jesus of history and by the writers of New Testament and related literature use the language of faith of salvation of Deity and of adversaries of Deity giving words that are commonly used by the oppressed people new and double meanings Within interaction with other scholars who are publishing studies of hidden transcripts this book is an analysis of hidden transcripts within each of the New Testament documents The book is designed to be used in New Testament Studies courses at undergraduate and or graduate levels by study groups and by all persons who desire a more adequate understanding of the Jesus of history his closest followers and their oral and written communications during the first three centuries C E **"It is the Spirit that Gives Life"** Gitte Buch-Hansen, 2010 Since Origen and Chrysostom John s Gospel has been valued as the most spiritual among the New Testament writings Although Origen recognizes the Stoic character of John s statement that God is pneuma 4 24 an examination of the gospel in light of Stoic physics has not yet been carried out Instead the Johannine spirit has been absorbed into the Word and lost its distinct character as physical mediator between the divine and humane spheres Combining her insight into Stoic physics and ancient physiology the author situates her thesis in the major discussions of modern Johannine scholarship and demonstrates new solutions to well known problems
