Stephen Sennott, 2004 A balance of sophistication and clarity in the writing, authoritative entries and strong cross referencing that links architects and structures to entries on the history and theory of the profession make this an especially useful source on a century of the world's most notable architecture. The contents feature major architects, firms and professional issues, buildings, styles and sites, the architecture of cities and countries, critics and historians, construction materials and planning topics, schools, movements and stylistic and theoretical terms. Entries include well selected bibliographies and illustrations.
