China in Revolution Joseph W. Esherick, 2022-08-04 This book includes eleven seminal essays by one of America's leading authorities on modern Chinese history with an illuminating preface by Prof Elizabeth Perry of Harvard University it covers a range of topics from the impact of imperialism to the 1989 protests that led to the Tiananmen massacre Chapters include an explanation of how China expanded its borders far beyond the Han Chinese heartland and maintained those borders in the transition from empire to nation how Sun Yat sen unexpectedly emerged as the Father of the Country and how a series of unexpected and contingent events brought the empire down in 1911 Despite conventional representations of a static and unified China this book proves Chinese society to be diverse and constantly changing especially after the Communist revolution which was a transformative event in modern Chinese history Esherick denounces traditional imagery of cultural uniformity which derives from excessive attention to the unitary state through chapters that explore the impact of the 1937-45 War of Resistance against Japan the dramatic wartime transformation of Chinese society in both Communist and Nationalist Guomindang areas and the nature of the new Communist regime in Northwest China In his book Esherick examines both the Marxist Leninist theory behind Mao's notion of the restoration of capitalism against which he waged the Cultural Revolution of the 1960s and the political theater of the 1989 protest movement Throughout the book the contingency of history the need for careful empirical research and the important yet limited role of history is highlighted as the key to understanding the present or predicting the future of China

Yankel's Tavern Glenn Dynner, 2013-11-18 Awarded Honorable Mention for the Jordan Schnitzer Book Award In nineteenth century Eastern Europe the Jewish run tavern was often the center of leisure hospitality business and even religious festivities This unusual situation came about because the nobles who owned taverns throughout the formerly Polish lands believed that only Jews were sober enough to

run taverns profitably a belief so ingrained as to endure even the rise of Hasidism's robust drinking culture. As liquor became the region's boom industry, Jewish tavernkeepers became integral to both local economies and local social life, presiding over Christian celebrations and dispensing advice, medical remedies and loans. Nevertheless, reformers and government officials blaming Jewish tavernkeepers for epidemic peasant drunkenness sought to drive Jews out of the liquor trade. Their efforts were particularly intense and sustained in the Kingdom of Poland, a semi-autonomous province of the Russian empire that was often treated as a laboratory for social and political change. Historians have assumed that this spelled the end of the Polish Jewish liquor trade. However, newly discovered archival sources demonstrate that many nobles helped their Jewish tavernkeepers evade fees, bans and expulsions by installing Christians as fronts for their taverns. The result, a vast underground Jewish liquor trade, reflects an impressive level of local Polish Jewish co-existence that contrasts with the more familiar story of anti-Semitism and violence. By tapping into sources that reveal the lives of everyday Jews and Christians in the Kingdom of Poland, Yankel's Tavern transforms our understanding of the region during the tumultuous period of Polish uprisings and Jewish mystical revival.

The European Peasant Family and Society Richard L. Rudolph, 1995-01-01. In recent years, the peasant household has become a central focal point of social history. This is true not only because the peasant represents the major element of European society through the nineteenth century, but also because many of the main issues in modern historical debate can be studied within the sphere of the peasant family. This book deals with the European peasant family during the period of transformation from agrarian to industrial society, the time called by some the period of protoindustrialization. The essays in this volume explore some of the major issues concerning the influence of the economy, society and institutions on the peasant household and conversely the influence of the peasant household on the outside world. Themes dealt with include the ways in which the physical environment and the economy may make for very different family structures and even affect intra-family relationships, the effects of inheritance, marriage and kinship strategies, as well as social pressure on peasant family structure and demography, the debate about changing gender roles and status, the debate over the manner and effects of class formation, questions of social and political agency, the nature of gender and parent-child relations, the validity of protoindustrial theory and the role of peasants in initiating industrialization as consumers, producers and as a labor force. In

examining these themes the essays provide both case studies and innovative analysis by preeminent international scholars in the fields of family and women s history economic history and demography

[The Invention of Terrorism in Europe, Russia, and the United](#)

States Carola Dietze, 2021-07-27 Terrorism's roots in Western Europe and the USA This book examines key cases of terrorist violence to show that the invention of terrorism was linked to the birth of modernity in Europe Russia and the United States rather than to Tsarist despotism in 19th century Russia or to Islam sects in Medieval Persia Combining a highly readable historical narrative with analysis of larger issues in social and political history the author argues that the dissemination of news about terrorist violence was at the core of a strategy that aimed for political impact on rulers as well as the general public Dietze's lucid account also reveals how the spread of knowledge about terrorist acts was from the outset a transatlantic process Two incidents form the book's centerpiece The first is the failed attempt to assassinate French Emperor Napoleon III by Felice Orsini in 1858 in an act intended to achieve Italian unity and democracy The second case study offers a new reading of John Brown's raid on the arsenal at Harpers Ferry in 1859 as a decisive moment in the abolitionist struggle and occurrences leading to the American Civil War Three further examples from Germany Russia and the US are scrutinized to trace the development of the tactic by first imitators With their acts of violence the invention of terrorism was completed Terrorism has existed as a tactic since then and has essentially only been adapted through the use of new technologies and methods

Unfree Labor Peter KOLCHIN, 2009-06-30 Two massive systems of unfree labor arose a world apart from each other in the late sixteenth and early seventeenth centuries The American enslavement of blacks and the Russian subjection of serfs flourished in different ways and varying degrees until they were legally abolished in the mid nineteenth century Historian Peter Kolchin compares and contrasts the two systems over time in this magisterial book which clarifies the organization structure and dynamics of both social entities highlighting their basic similarities while pointing out important differences discernible only in comparative perspective These differences involved both the masters and the bondsmen The independence and resident mentality of American slaveholders facilitated the emergence of a vigorous crusade to defend slavery from outside attack whereas an absentee orientation and dependence on the central government rendered serfholders unable successfully to defend serfdom Russian serfs who generally lived on larger holdings than American slaves and faced less immediate interference in their everyday lives found it easier to assert their communal autonomy but showed relatively little solidarity with peasants outside their own villages American slaves by contrast were both more individualistic and more able to identify with all other blacks both slave and free Kolchin has discovered apparently universal features in master bondsman relations a central focus of his study but he also shows their basic differences as he compares slave and

serf life and chronicles patterns of resistance If the masters had the upper hand the slaves and serfs played major roles in shaping and setting limits to their own bondage This truly unprecedented comparative work will fascinate historians sociologists and all social scientists particularly those with an interest in comparative history and studies in slavery
