## **End User Searching In The Health Sciences:**

*End User Searching in the Health Sciences* M. Sandra Wood, Ellen Brassil Horak, Bonnie Snow, 2019-12-09 This book first published in 1986 provides a comprehensive and detailed look at online biomedical database searching by end users. Experts fully assess the numerous implications of end user searching and synthesize a wide variety of views and successful practices. By examining the types of users, institutional settings, products used, and applications, this important volume probes the specific variations among programs and provides a solid overview of end user searching in the health science field. The volume includes informative chapters on determining content and structure of online educational materials, training the end user, the issues in implementing end user search systems, and much more.

## **User Education in Health Sciences**

**Libraries** M. Sandra Wood, 1995 Here is ready access to a wide range of information for librarians who teach users how to best utilize information resources. Library and information science students and practitioners can learn from the educational programs that have been developed over the last decade as presented in this volume to build and expand their roles as consultants and educators. Bringing together the best information on the subject from the pages of *Medical Reference Services Quarterly*, this book is intended to create an interest in user education in libraries and generate ideas for new or expanded user education programs.

1979-1990 Henryk Sawoniak, 2012-02-14 No detailed description available for 1979-1990.

*Encyclopedia of Library and Information Science* Allen Kent, 1994-05-12 The *Encyclopedia of Library and Information Science* provides an outstanding resource in 33 published volumes with 2 helpful indexes. This thorough reference set, written by 1300 eminent international experts, offers librarians, information computer scientists, bibliographers, documentalists, systems analysts, and students convenient access to the techniques and tools of both library and information science. Impeccably researched, cross-referenced, alphabetized by subject, and generously illustrated, the *Encyclopedia of Library and Information Science* integrates the essential theoretical and practical information accumulating in this rapidly growing field.

**Trauma Informatics** Kimball I. Maull, Jeffrey S. Augenstein, 2012-12-06 Information and the technology to rapidly transmit, analyze, document, and disperse this information are increasing arithmetically, if not logarithmically. Arguably, no discipline better exemplifies this trend than medicine. It can be further argued that care of the trauma patient is one of the

better examples of informatics and the potential benefit to the health professionals who care for these patients Maull and Augenstein have provided us with a primer on informatics and its use in trauma care The subject matter is timely and covers the gamut of trauma care from prehospital to rehabilitation Who will benefit from trauma informatics A simple answer would be anyone who takes care of trauma patients From a broader perspective however at least three examples illustrate how trauma informatics can be used today to exert a positive effect on patient outcome The first example is care of combat casualties including battlefield resuscitation evacuation acute care and ultimate return to the continental United States Current technology is such that via global positioning satellite a corpsman could transmit to a remote area the vital signs and pertinent physical findings of a combat casualty Furthermore the location of the corpsman and the casualty would be precisely known and consultation and destination disposition would be possible The injured person when admitted to a combat support hospital could be continuously monitored and additional remote consultation obtained
