Geoengineering, the Anthropocene and the End of Nature Jeremy Baskin, 2019-05-17 This book takes a critical look at solar geoengineering as an acceptable means for addressing climate change Baskin explores the assumptions and imaginaries which animate engineering the climate and discusses why this climate solution is so controversial The book explains geoengineering s past its revival in the mid 2000s and its future prospects including its shadow presence in the Paris climate accord The main focus however is on dissecting solar geoengineering today its rationales underpinning knowledge relationship to power and the stance towards nature which accompanies it Baskin explores three competing imaginaries associated with geoengineering an Imperial imaginary an oppositional Un Natural imaginary and a conspiratorial Chemtrail imaginary He seeks to explain why solar geoengineering has struggled to gain approval and why resistance to it persists despite the support of several powerful actors He provocatively suggests that reconceptualising our present as the Anthropocene might unwittingly facilitate the normalisation of geoengineering by providing a sustaining socio technical imaginary This book is essential reading for those interested in climate policy political ecology and science technology The Love of Nature and the End of the World Shierry Weber Nicholsen, 2003-02-28 A psychological exploration of studies how the love of nature can coexist in our psyches with apathy toward environmental destruction Virtually everyone values some aspect of the natural world Yet many people are surprisingly unconcerned about environmental issues treating them as the province of special interest groups Seeking to understand how our appreciation for the beauty of nature and our indifference to its destruction can coexist in us Shierry Weber Nicholsen explores dimensions of our emotional experience with the natural world that are so deep and painful that they often remain unspoken The Love of Nature and the End of the World is a gathering of meditations and collages Its evocations of our emotional attachment to the natural world and the emotional impact of environmental deterioration are meant to encourage individual and collective reflection on a difficult dilemma Nicholsen draws on work in environmental philosophy and ecopsychology the writings of psychoanalytic thinkers such as Wilfred Bion Donald Meltzer and D W Winnicott and ideas from Buddhist and Sufi traditions She shows how our emotional responses to the vulnerabilities of the natural world range from intense caring and compassion through grief and outrage to diffuse depression Individual chapters focus on silence and the process whereby we move from the unspoken to the spoken the love of nature the perceptual reciprocity with the natural world to which we might mature beauty in the

human and natural realms the psychological impact of the destruction of the natural world and reflections on the future Tunguska, or the End of Nature Michael Hampe, 2015-06-04 On June 30 1908 a mysterious explosion erupted in the skies over a vast woodland area of Siberia Known as the Tunguska Event it has been a source of wild conjecture over the past century attributed to causes ranging from meteors to a small black hole to antimatter In this imaginative book Michael Hampe sets four fictional men based on real life scholars a physicist G nter Hasinger and Steven Weinberg a philosopher Paul Feyerabend a biologist Adolf Portmann and a mathematician Alfred North Whitehead adrift on the open ocean in a dense fog to discuss what they think happened The result is a playful and highly illuminating exploration of the definition of nature mankind s role within it and what its end might be Tunguska Or the End of Nature uses its four man setup to tackle some of today s burning issues such as climate change environmental destruction and resource management from a diverse range of perspectives With a kind of foreboding it asks what the world was like and will be like without us whether we are negligible and the universe random whether nature can truly be explained whether it is good or evil or whether nature is simply a thought we think This is a profoundly unique work a thrillingly interdisciplinary piece of scholarly literature that Living Through the End of Nature Paul Wapner, 2013-02-08 How probes the mysteries of nature and humans alike environmentalism can reinvent itself in a postnature age a proposal for navigating between naive naturalism and technological arrogance Environmentalists have always worked to protect the wildness of nature but now must find a new direction We have so tamed colonized and contaminated the natural world that safeguarding it from humans is no longer an option Humanity s imprint is now everywhere and all efforts to preserve nature require extensive human intervention At the same time we are repeatedly told that there is no such thing as nature itself only our own conceptions of it One person s endangered species is another s dinner or source of income In Living Through the End of Nature Paul Wapner probes the meaning of environmentalism in a postnature age Wapner argues that we can neither go back to a preindustrial Elysium nor forward to a technological utopia He proposes a third way that takes seriously the breached boundary between humans and nature and charts a co evolutionary path in which environmentalists exploit the tension between naturalism and mastery to build a more sustainable ecologically vibrant and socially just world Beautifully written and thoughtfully argued Living Through the End of Nature provides a powerful vision for environmentalism's future The Economy of Nature Explained and Illustrated on the Principles of Modern Philosophy. Louise Hickman, Neil Spurway, 2015-09-18 Up until the time views on the laws of nature of Newton scientists regarded the understandings of the physical world at which they were arriving as glimpses of the working of the Creator's mind Thus the generalisations being formulated about the behaviour of matter the Laws of Nature were seen as the Creator's injunctions to created matter as to how it was to act They were laws in the same sense as laws Divine or human about how people should behave that is why the same word was used for both And even now scientific laws are occasionally spoken of as being obeyed However it is doubtful whether any practising scientist religious believer or not now thinks of laws in the way that the word literally implies How instead scientists do or should view scientific laws has been debated since the time of Hume and Kant and it is a vigorous field of investigation among current philosophers of science In this book scientists physical and biological historians and students of ideas all of them theologically informed tackle this topic from many angles They do so in relation to the lead public lecture at the conference from which the book stems given by the eminent and iconoclastic philosopher of science Professor Nancy Cartwright She asked the question How could laws make things happen and her answer was They couldn t Globalization/Glocalization: Developments in Theory and Application ,2021-11-29 In the immense literature on globalization the work of Roland Robertson stands out In particular his insistence that globalization manifests itself primarily as glocalization the simultaneity of the global and the local of homogenization and heterogenization continues to influence how a wide variety of observers understand the process including those who contest it In honour of Robertson's lifetime contributions this volume brings together a set of essays that demonstrate the cogency of his approach point out directions in which it can be further developed and illustrate the insight it can provide in topics as varied as religion football wine morality and UFOs Contributors include Peter Beyer John Boli Didem Buhari Gulmez Rebecca Catto Richard Giulianotti Ulf Hannerz David Inglis Paul James Habibul Haque Khondker Anne Sophie Krossa Frank Lechner Kristian Naglo John H Simpson Manfred B Steger and George M Thomas The True Principle of Education.
