Endangered Self:

The Endangered Self Gill Green, Elisa Sobo, 2002-01-04 Fills important gap in literature by focusing on ways in which an HIV positive status affects people's sense of identity and social relationships Key addition to the exciting new field of Risk Studies Illustrated throughout with interviews with people living with HIV and AIDS in the USA and UK *The Endangered Self* Richard K. Fenn, Donald Capps, 1992 *Progress in Self Psychology, V. 4* Arnold I. Goldberg, 2013-05-13 The fourth volume in the Progress in Self Psychology series continues to explore the theoretical yield and clinical implications of the work of the late Heinz Kohut Learning from Kohut features sections on supervision with Kohut and on the integration of self psychology with classical psychoanalysis Developmental contributions examine self psychology in relation to constitutional factors in infancy Clinical presentations focusing on optimum frustration and the therapeutic process and on the self psychological treatment of a case of intractable depression elicit the animated commentary that makes this volume like its predecessors as enlivening as it is instructive *Progress in Self Psychology, V. 7* Arnold I. Goldberg, 2013-05-13 A special section of papers on the evolution current status and future development of self psychology highlights The Evolution of Self Psychology volume 7 of the Progress in Self Psychology series A critical review of recent books by Basch Goldberg and Stolorow et al is part of this endeavor Theoretical contributions to Volume 7 examine self psychology in relation to object relations theory and reconsider the relationship of psychotherapy to psychoanalysis Clinical contributions deal with an intersubjective perspective on countertransference the trauma of incest and envy in the transference *Progress in Self Psychology, V. 1* Arnold I. Goldberg, 2013-06-17 The premier volume in the Progress in Self Psychology Series was completed two years after Heinz Kohut's death in 1981 Hence this volume has a unique status in the history of self psychology it bears the imprint of Kohut while charting a course of theoretical and clinical growth in the post Kohut era Biographical reminiscences about Kohut Strozier Miller and commentaries on Kohut's The Self Psychological Approach to Defense and Resistance chapter seven of How Does Analysis Cure M Shane P Tolpin Brandchaft Oremland are juxtaposed with a section of self psychological reassessments of interpretations Basch A and P Ornstein Goldberg Clinical papers cover the selfobject transferences Hall Shapiro patient compliance Wolfe and the self pity response Wilson while theoretical contributions present ideas of Stolorow Bacal White and Detrick that are foundational to their subsequent writings This volume helped to shape the theoretical and clinical agenda of self psychology in the decades following Kohut's death *Progress in Self Psychology, V. 16* Arnold I. Goldberg, 2013-06-17 Volume 16 of Progress in Self Psychology How Responsive Should We Be illuminates the continuing tension between Kohut's emphasis on the patient's subjective experience and the post Kohutian intersubjectivists concern with the therapist's own subjectivity by focusing on issues of therapeutic posture and degree of therapist activity Teicholz provides an integrative context for examining this tension by discussing affect as the common denominator underlying the analyst's empathy subjectivity and authenticity Responses to the tension encompass the stance

of intersubjective contextualism advocacy of active responsiveness and emphasis on the thorough going bidirectionality of the analytic endeavor Balancing these perspectives are a reprise on Kohut's concept of prolonged empathic immersion and a recasting of the issue of closeness and distance in the analytic relationship in terms of analysis of the tie to the negative selfobject Additional clinical contributions examine severe bulimia and suicidal rage as attempts at self state regulation and address the self reparative functions that inhere in the act of dreaming Like previous volumes in the series volume 16 demonstrates the applicability of self psychology to nonanalytic treatment modalities and clinical populations Here self psychology is brought to bear on psychotherapy with placed children on work with adults with nonverbal learning disabilities and on brief therapy Rector's examination of twinship and religious experience Hagman's elucidation of the creative process and Siegel and Topel's experiment with supervision via the internet exemplify the ever expanding explanatory range of self psychological insights

The Search for the Self Heinz Kohut, 2022-04-01 The re issuing of the four volumes of the author's writings is a major publishing event for psychoanalysts who are interested in both the theoretical and the therapeutic aspects of psychoanalysis These volumes contain the author's pre self psychology essays as well as those he wrote in order to continue to expand on his groundbreaking ideas which he presented in *The Analysis of the Self* *The Restoration of the Self* and in *How Does Analysis Cure* These volumes of *The Search for the Self* permit the reader to understand not only the above three basic texts of psychoanalytic self psychology more profoundly but also to appreciate the author's sustained openness to further changes to dare to present his self psychology as in continued flux influenced by newly emerging empirical data of actual clinical practice The current re issue of the four volumes of *The Search for the Self* would assure that the younger generation of psychoanalysts would be exposed to a clinical theory that could contribute greatly to solving the therapeutic dilemmas facing psychoanalysis today This is Volume two

Rice as Self Emiko Ohnuki-Tierney, 1993 In this engaging account of the crucial significance of rice for the Japanese Emiko Ohnuki Tierney examines how people use the metaphor of a principal food such as rice corn or wheat in conceptualizing themselves in relation to other peoples who eat other foods *Rice as Self* shows how the Japanese identity was born through discourse with the Chinese the first historical other It shows how rice agriculture in itself introduced from outside was ironically appropriated as a dominant metaphor of the Japanese self Since then rice and rice paddies have served as the vehicles for their deliberation of selves and others Using for evidence such diverse sources as myth histories of the eighth century the imperial accession ritual woodblock prints novels day to day discourse and opinion polls Ohnuki Tierney shows that throughout Japan's history the cultural importance of rice has been deeply embedded in Japanese cosmology both of the elite and common folk rice as soul rice as deity and ultimately rice as self of the family the community and the nation at large This she emphasizes has been so even though rice has not been the staple food of the Japanese as is commonly held Using Japan as an example Ohnuki Tierney proposes a new and complex cross cultural model for the interpretation of selves and others The historical transformations of the Japanese identity have

been intimately related not only to their encounter with foreigners the external other but also to the process of the marginalization of minorities within Japanese society the internal other and of external others who ceased to be the privileged other The model takes into account the power inequities both within and outside a given society It has broad applications especially to people for whom foreign cultural hegemony is part and parcel of a complex often ambivalent process of self identity The Shattered Self Richard B. Ulman, Doris Brothers, 2013-05-13 Ulman and Brothers utilize a unique clinical research population of rape and incest victims and Vietnam combat veterans to argue that trauma results from real occurrences that have as their unconscious meaning the shattering of central organizing fantasies of self in relation to selfobject Their innovative treatment approach revolves around the transformation of these shattered fantasies in the intersubjective context of the transference countertransference neurosis

Francis, Hans-Georg Ziebertz, 2011-06-22 This book reflects on the idea that religion represents a force in the public realms of society The empirical evidence reveals a regained relevance for and commitment to religion re emerging in secularized countries but also that it does so in a new form unexpected foreign and maybe even dangerous If religion regains public significance in social debates what are its characteristics in terms of topics and interests actors and parties How is this experienced and evaluated by different groups in society What are the motives of religious groups and churches to re enter the public domain and are they effective What is the importance of religious groups claiming participation consulting steering and dominating in public debates How do different religious and nonreligious groups evaluate the impact of religion on the public environment and under which conditions can it be regarded to be functional or dysfunctional Scholars who address these questions do so from a theological or a religious studies perspective They reflect on the phrase public

significance of a religion in its political cultural and typical religious dimension The book points out what tendencies can be observed when different religions profile themselves competitively in public debate and to what extent ethnic and national identities intervene in this interreligious interaction

The Child's Song Donald Capps,1995-01-01 Theological ideas and biblical injunctions have frequently been employed to legitimate the physical abuse of children Some theological ideas are inherently abusive because they create fear in a child s mind causing a child to feel alone odd and of little worth Donald Capps exposes the abuses that theology and the Bible have inflicted on vast numbers of children In particular he is concerned with the hidden abuses of children by well intentioned adults and the role that religion plays in the legitimization of these abuses

Religious Voices in Self-Narratives Marjo Buitelaar,Hetty Zock,2013-07-31 In present day pluralistic and individualized societies the question of how individuals appropriate religious traditions has become particularly relevant In this volume psychologists anthropologists and historians examine the presence of religious voices in narrative constructions of the self The focus is on the multiple ways religious stories and practices feature in self narratives about major life transitions The contributions explore the ways in which such voices inform the accommodation and interpretation of these transitions In addition to being inspired by Dan McAdams approach to life stories as personal myths that inform us about the quests of individuals for a satisfactory balance between agency and communion most of the contributors have found the theory of the dialogical self developed by Hubert Hermans particularly useful Thus the contributions explore the ways in which identity formation is shaped by internal dialogues between personal and collective voices in the context of the specific constellations of power in which these voices are embedded The volume is divided into three parts addressing theoretical and methodological considerations religious resources in narratives on life transitions and religious positioning in diaspora

In this book it becomes impossible to stand apart from the analytic field as abstract concepts such as dissociation intersubjectivity and unconscious communication as well as newly coined ones like Relational K not and Body Words come alive through a vivid unfolding of analytic process You are invited into the mind of the analyst as she draws from reverie memory and affect to inspire offerings that enliven the moment moving the analytic pair forward in affective freedom and self definition Body Words identify the subjective linkages we make to describe experiencing within and between self and other that leads us to know whether we or our patient are delivering the message in a manner that feels real Each chapter illustrates how Pizer arrived at this important concept and others in a way that is full of rich experience near clinical moments that posed significant challenges Body Words and the Analyst's Use of Self is a rare window that allows readers new and seasoned clinicians of various theoretical persuasions to become intimate witnesses to the analyst's subjectivity and the creativity of the analytic partnership The Restoration of the Self Heinz Kohut, 2012-12-21

In his foundational work The Restoration of the Self noted psychoanalyst Heinz Kohut boldly challenges what he called the limits of classical analytic theory and the Freudian orthodoxy Here Kohut proposes a psychology of the self as a theory in its own right one that can stand beside the teachings of Freud and Jung Using clinical data Kohut explores issues such as the role of narcissism in personality when a patient can be considered cured and the oversimplifications and social biases that unduly influenced Freudian thought This volume puts forth some of Kohut's most influential ideas on achieving emotional health through a balanced creative and joyful sense of self Kohut speaks clearly from his identity as a psychoanalyst healer showing that he is more of a psychoanalyst than most and yet calling for major theoretical revisions including a redefinition of the essence of psychoanalysis American Journal of Psychotherapy **Federal Register**, 2013 **The Metaphysics of Self and World**

Elie Maynard Adams, 1991 A great fissure occurred in Western civilization in the early modern period with the divorce between the humanities and the sciences and the rise of scientific naturalism The Metaphysics of Self and World is a philosophical exploration of the relationship between the individual the culture and the world It is in the author's words a philosophy of the humanities a philosophy of humanity and a philosophy of social reality It explores the implications of a

world view that would integrate the perspective of the sciences with humanistic ways of thought E M Adams claims that we do violence to ourselves as human beings by trying to fit into the world as delineated in scientific categories Rejecting cultural subjectivism and scientific naturalism he argues for the irreducibility and validity of the categories of the humanities and for a fully developed humanistic philosophy of self and world In generating this world view he utilizes the humanities as a source of culture therapy in order to close the fissure in Western civilization Author note E M Adams is Kenan Professor of Philosophy Emeritus at the University of North Carolina Chapel Hill He has written numerous books and articles and a festschrift celebrating his work Mind Value and Culture Essays in Honor of E M Adams edited by David Weissbord was published in 1989
