## **Endolaryngeal Surgery:**

*Surgery of Larynx and Trachea* Marc Remacle, Hans Edmund Eckel, 2010-01-08 This comprehensive volume covers all the subspecialties of laryngology from phonosurgery to cancer Each surgical procedure is explained and well illustrated in a step by step manner In addition coverage evaluates different surgical methods such as endoscopic versus open surgery and the use of cold instrument versus laser so that the reader receives guidance for the use of these complimentary methods

**Atlas of Phonomicrosurgery and Other Endolaryngeal Procedures for Benign and Malignant Disease** Steven M. Zeitels, 2001 This atlas of endolaryngeal surgery will serve as an enduring compilation of magnified images of laryngeal pathology The microlaryngeal photography contained in this book was obtained from a sidearm of the microscope simulating the surgeon's proximal view during the procedures This technique allows pictures to be taken at various magnifications and from different perspectives as surgeons often prefer to work at different powers The text is designed to serve as a pictorial reference of clinical pathologies and their surgical management with duplication of the types of lesions intended to demonstrate subtle clinical variations that affect surgical decisions The main focus of the text is phonomicrosurgery the most common reason to perform endolaryngeal surgery and one of the most dynamically evolving subspecialties with an exciting future as molecular laryngology develops and methods to reconstitute the layered microstructure of the vocal folds evolve Many of the cases are displayed to exhibit the interface between the deep surface of lesion and the underlying vocal fold tissue which facilitates understanding of how pathology arises within the layered microstructure **Atlas of Airway**

**Surgery** Angelo Ghidini, Francesco Mattioli, Sergio Bottero, Livio Presutti, 2017-05-30 This superbly illustrated atlas provides step by step descriptions of surgical procedures to the airways based on use of the sheep as an animal model which has been demonstrated scientifically to be comparable to the human The procedures covered tracheotomy laryngotracheoplasty slide tracheoplasty tracheal reconstruction partial cricotracheal reconstruction and main endoscopic techniques are relevant to a range of frequent surgical indications such as stenosis laryngotracheomalacia and tracheal tumor The book is the first to describe such surgery on the basis of this animal model and includes a full description of preparation of the model The practical guidance provided will equip surgical trainees with the knowledge required before embarking on these procedures in humans but will also be highly relevant to more experienced surgeons wishing to upgrade their skills The book is the outcome of a successful collaboration between the Head and Neck Surgery Departments of the University Hospital of Modena and the Bambino Gesù Hospital in Rome Textbook of Laryngology Albert L. Merati, Steven A. Bielamowicz, 2006-08

Although many books focus on one or another aspect of laryngology such as voice swallowing or airway problems few cover the breadth of the discipline from a teaching standpoint The editors sought collaboration from a broad range of international contributors in this text which avoids the cover all reference nature of extant texts by having each contributor write in direct consumable units for the reader thus providing an ideal resource for both teaching and learning Covers every aspect of

laryngology without bias on one particular aspect Designed specifically to meet student needs rather than trying to unsuccessfully serve multiple audiences
