**Procedures in Gastrointestinal Radiology** Julian Dobranowski, David A. Stringer, Sat Somers, Giles W. Stevenson, 2012-12-06 Dr Dobranowski and his associates are to be highly commended for this excellent manual I am not aware of a similar text covering the subject Although all of us perform gastrointestinal studies in a different manner this text provides an excellent overview The reader will discover that the text is especially well written and focuses on the important issues relating to GI contrast studies Because Dr Stevenson's group performs endoscopic procedures they are included in the manual These authors are recognized scholars and leaders in gastrointestinal radiology Thus it is easy to understand why the manual is so well done I am particularly impressed with the emphasis placed on the patient radiologist relationship before during and after completion of a study All of us who teach gastrointestinal radiology are concerned about the decline in the number of gastrointestinal contrast studies We are not sure how we can continue to teach our residents the proper techniques and maintain high quality teaching programs in gastrointestinal radiology A manual of this type is thus timely and appropriate The manual will be a valuable addition to the library of all radiologists It will be particularly useful for residents who are learning how to perform GI contrast studies

**Glucagon in 1987** J. Picazo, 2012-12-06 I am very pleased to say once again that I was delighted at being invited to chair this Third International Workshop on Glucagon Glucagon in 1987 The two previous ones were held in Madrid under the auspices of the Medical School of the Universidad Complutense of that city the first in May 1978 and the second in October 1981 which resulted in two books Glucagon in 1979 and Glucagon in Gastroenterology and Hepatology 1982 Gastroenterology both published by MTP Press where the mounting interest in and developments concerning the therapeutic applications of glucagon were reflected This time the meeting was held in Barcelona under the auspices of the Escuela de Patología Digestiva of the Universidad Autónoma de Barcelona a change that we especially welcomed because it is not very often that we are able to assemble in our city such a distinguished group of scientists from all over the world As can be seen from the title of the present book this workshop focussed once again on the current status of glucagon in gastroenterology and hepatology because although much has been said and discussed about the subject already it still raises exciting and intriguing issues for debate There were two parts to this meeting The gastroenterology session was concerned with the physiology and pathophysiology of glucagon in the gastrointestinal tract and its applications in diagnosis endoscopy and radiology
