Une Transition Juste NJ Ayuk, 2023-06-30

EN SEULEMENT QUELQUES DÉCENNIES les pays du monde entier sont devenus bien plus interdépandants qu'on n'aurait jamais pu l'imaginer Notre regard sur le monde évolue et avec lui la demande pour que les cultures et les institutions politiques de la planète pensent globalement se fait croissante Si penser globalement est souvent pavé de bonnes intentions agir globalement sans tenir compte des réalités locales peut produire des résultats involontairement néfastes

Dans *Une Transition juste* le célèbre auteur et entrepreneur camerounais NJ Ayuk montre comment cette triste réalité advient alors que les ambitieuses politiques de l'Agence internationale de l'énergie AIE en matière d'énergie verte touffent et paralysent les économies énergétiques de l'Afrique Avec une abondance naturelle de ressources pétrolières et gazières l'Afrique a le potentiel d'être un leader mondial de l'énergie mais l'énergie verte seule ne permettra pas d'opérer cette transformation

Une Transition juste analyse en détail la possibilité d'un avenir radieux pour les pays africains et les facteurs qui y font obstacle NJ Ayuk nous présente un récit détaillé dans lequel il aborde avec expertise des sujets importants comme la réalité de la production énergétique la valeur du gaz naturel en Afrique l'impact néfaste de l'aide internationale en Afrique l'adoption des nouvelles technologies ou encore la création de débouchés économiques pour les femmes Avec une gouvernance réfléchie du flair pour les perspectives d'avenir et l'attention toute particulière que les pays touchés par des formes de grande envergure maintiennent le continent africain est en mesure d'opérer une transition vers les énergies renouvelables juste et florissante pour toutes les parties concernées

La Transition énergétique Philippe Murer, 2014-04-30

INEDIT La transition énergétique ou passage des énergies anciennes aux énergies renouvelables est un débat crucial pour au moins trois raisons différentes la rapide diminution des réserves de pétrole le possible réchauffement du climat la possibilité de créer des centaines de milliers d'emplois dans la fabrication et l'installation des énergies vertes qui remplaceront terme les 65 milliards d'euros d'énergies fossiles importés chaque année Le débat technique scientifique a très amplement relayé l'opinion publique est relativement bien informée Mais le débat sur la faisabilité économique de cette transition la taille des investissements réaliser n'a pas eu lieu Les énergies renouvelables sont-elles seront-elles moins chères ou plus chères que les énergies classiques Seront-elles suffisamment abondantes Peut-on les stocker Comment financer et réaliser concrètement ce programme Trouvons un plan réaliste pour passer aux énergies renouvelables et ne nous contentons pas d'incantations

1999 European Wind Energy Conference E.L. Petersen, 2014-01-02 The 1999 European Wind Energy Conference and Exhibition was organized to review progress and present and discuss the wind energy business technology and science for the future The Proceedings

contain a selection of over 300 papers from the conference They represent a significant update to the understanding of this increasingly important field of energy generation and cover a full range of topics

Le guide de l'éolien, techniques et pratiques Corinne Dubois, 2011-07-07 L'énergie éolienne est un moyen de production performant efficace et durable En termes de production d'électricité elle est l'une des filières les plus propres les plus sûres et les plus rapides mettre en place tout en étant renouvelable Pourtant parfois cette technologie a suscité la polémique Peu d'infrastructures de production d'énergie ont suscité autant d'avis contradictoires au sein même de groupes de pensée et aussi peu d'objectivité scientifique et technique Ainsi cet ouvrage vous permettra de mieux comprendre cette technologie et toutes les étapes nécessaires la réalisation d'un projet pour transformer une idée et du vent en électricité renouvelable

Énergétique éolienne Jean Hladik, Michel Bremont, 1984 Les auteurs couvrent l'ensemble des problèmes liés aux utilisations de l'énergie éolienne et leur développement tout en se limitant leurs aspects les plus aisément accessibles

Bataille rangée sur le front éolien Stéphanie Dechézelles, 2023-11-23 Une analyse sociologique sans parti pris des conditions de réception de l'option éolienne et des mobilisations qui en contestent le bienfond et sa mise en œuvre sur le terrain en France

Énergies renouvelables Dhaker Abbes, Arnaud Davigny, Bruno François, Nicolas Waldhoff, 2023-02-21 Ce manuel propose des résumés de cours des exercices et problèmes corrigés couvrant l'ensemble des systèmes d'énergie renouvelable Il inclut également des tendances actuelles telles que le stockage de l'énergie solaire et l'autoconsommation photovoltaïque ou éolienne Les exercices et les problèmes sont classés par niveau de difficulté et par compétences et sont corrigés de manière détaillée De nombreux exemples sont fournis avec les calculs et les graphiques aidant visualiser les différentes technologies et méthodologies mathématiques Cet ouvrage s'adresse aux étudiants de BTS BUT des cycles universitaires et des écoles d'ingénieurs

La transition énergétique en chantier Marie-José Fortin, Yann Fournis, 2016-04-27 T00:00:00-04:00 Présentée comme une réponse aux bouleversements climatiques et une alternative à l'usage massif des énergies fossiles la transition énergétique qui s'amorce fait débat Dans ses versions les moins exigeantes elle désigne d'abord et avant tout un processus de très lente sortie du piège reposant sur les mécanismes de marché comme la bourse du carbone la valorisation des technologies vertes et l'utilisation accrue des formes d'énergie renouvelable l'autre bout du spectre de propositions la transition énergétique renvoie un ambitieux projet de reconfiguration des modes d'appropriation de l'énergie ainsi que de diminution globale nette de la consommation énergétique de toute nature Parce qu'elles sont irréductibles leur seule dimension technique et qu'elles impliquent des débats publics ces options indiquent que les choix en matière énergétique seront plus que jamais des choix de société Or ces choix se matérialisent par des configurations institutionnelles et territoriales spécifiques qui constituent autant de chemins de la transition énergétique Ainsi loin de s'imposer de manière uniforme cette transition prendra des formes variées témoignant de l'état des rapports entre énergie économie et communautés territoriales C'est l'examen de ces formes dans leurs particularités nationales et territoriales ainsi qu'aux conflits d'acteurs et aux dynamiques institutionnelles qu'elles recouvrent que souhaite contribuer le présent
