Sustainable Policies and Practices in Energy, Environment and Health Research Walter Leal Filho, Diogo Guedes Vidal, Maria Alzira Pimenta Dinis, Ricardo Cunha Dias, 2021-12-15 This book aims to give a contribution to a more comprehensive and interdisciplinary understanding of the cross cutting issues on energy environment and health research topics in the current world scenario where nations all over the world are struggling to accomplish the United Nations Sustainable Development Goals and to ensure sustainable patterns for all This interdisciplinary implies a commitment between all fields of science working together to provide knowledge that could result in the promotion of quality of life At the present it is evident that not all people benefit from sustainable policies and practices and the communication between health energy environmental and social problems is undeniable A call for different views could be a pathway attracting universities stakeholders organizations and civil society to deeply discuss how one solution does not fit all societies Few publications are coherently handling this matter This book is expected to fill this gap and to develop an interest in a larger audience working in general sustainable development and cross cutting issues This book is produced by the European School of Sustainability Science and Research ESSSR It gives special emphasis to state of the art descriptions of approaches methods initiatives and projects from universities stakeholders organizations and civil society across the world regarding cross cutting issues in energy environment and health research

Energy and Environmental Challenges to Security Stephen Stec, Besnik Baraj, 2009-01-25 On 21 November 2007 the grand and elegant Delegates Hall of the Hungarian Parliament was the scene of the opening of a conference to discuss some of the most pressing issues of the day those related to our unending thirst for energy its environmental consequences and the challenges that these bear on security Over the next 3 days scientists parliamentarians and their guests confronted challenged teased and cajoled each other in a NATO Advanced Research Workshop ARW entitled Energy and Environmental Challenges to Security affirming that knowledge and public service hold the keys to solving our greatest challenges The magnitude of the security challenge was confirmed while this volume was being prepared In mid 2008 the International Energy Agency issued a report concluding that US 45 trillion would be needed over the next half century to prevent energy shortages and greenhouse gas emissions from undermining global economic growth But lest such large numbers cause us all to shrug this volume brings attention to some of the more manageable aspects of the environment and energy security challenge from addressing conflict resources such as illegal timber that contribute to corruption and regional instability to means and mechanisms to enable the diversification of energy

Whiting, 2013-08-29 Researchers and practitioners explore the effect of evolving global economic and political powers on energy security within the UK and puts forward practical options for moving towards a more energy secure system over both the short and long terms *Impacts of Megaconferences on the Water Sector* Asit K. Biswas, Cecilia Tortajada, 2009-02-20 Since the late 1990s megaconferences in the water related sectors have become regular occurrences The latest one in Mexico City in March 2006 is estimated to have cost a total of 205 million and had 19 000 participants In spite of such huge costs and organizational efforts not a single water megaconference has ever been seriously evaluated in terms of its overall impacts on the water sector This book is the first pioneering study to assess the impacts of the megaconferences on water policies programs and projects at global regional and national levels The results are bleak The evaluation indicated that except for the UN Water Conference held in Argentina in 1977 the impacts of the subsequent megaconferences have been at best marginal in terms of knowledge generation and application poverty alleviation environmental conservation and or increasing availability of investments funds for the water sector *Governing the Atom* John Byrne, Steven M. Hoffman, 2020-02-21 Promoted as a form of limitless low cost energy without the polluting effects of its fossil fuel counterparts nuclear power has enjoyed unparalleled support in several countries Despite the development of an extensive set of policy and institutional mechanisms to foster its use nuclear technology has been troubled by a wide range of problems and continues to pose risks many believe are far greater than society should accept The legacy of failure ranges from catastrophic accidents like that at Chernobyl to the declaration of bankruptcy by the Washington Public Power Supply

System Governing the Atom explores why support for the technology remains substantial The first part of this volume examines the social institutions that have accompanied the development of nuclear power The second part details the numerous accommodations which have been required of society beginning with the technology s Impact on communities and geographic regions particularly affected by mining and milling The technology s inherent tendency towards normal accidents and the conflict between expert and public opinion on the dangers involved is examined as are the on going problems of waste disposal and decommissioning The volume concludes with an examination of nuclear power developments in France Germany Russia and the Commonwealth of Independent States Eastern Europe Korea and Japan The volume provides a needed vehicle for the timely consultation and dissemination of current research on important energy policy issues Governing the Atom provides insightful commentary regarding the initiation and development of nuclear technology It will be of interest to policymakers energy and environmental experts sociologists and historians of technology and all those interested in the problem of democracy in a technological society *Energy Resources* Kenneth J.
