## **Energy Markets Concerted Actions Needed By Ferc To Confront Challenges That Impede Effective Oversight:**

**Energy Markets** Jim Wells, 2002-11 This report discusses the Federal Energy Regulatory Commission's FERC efforts to revise its approach to regulating and overseeing the nation's natural gas and electric power industries in light of these industries' evolution from highly regulated monopolies to competitive energy markets. The report contains recommendations to the Chairman of FERC on developing and implementing an effective regulatory and oversight approach for these markets. It also contains a matter for congressional consideration on the need to review FERC's legal authorities to determine whether revisions are warranted in view of the change to competitive energy markets. **United States** Steve Isser, 2015-04-16 The electric utility industry in the US is technologically complex and its structure as a classic network industry makes it intricate in business terms as well so deregulation of such a complicated industry was a particularly detailed process. Steve Isser provides a detailed and comprehensive analysis of the history of the transformation of this complex industry from the 1978 Energy Policy Act to the present, covering the economic, legal, regulatory, and political issues and controversies in the transition from regulated utilities to competitive electricity markets. The book is a multidisciplinary study that includes a comprehensive review of the economic literature on electricity markets, the political environment of electricity policymaking, administrative and regulatory rulemaking, and the federal case law that restrained state and federal regulation of electricity. Isser offers a valuable case study of the pitfalls and problems associated with the deregulation of a complex network industry. **Human capital key principles for effective strategic workforce**
