Gender, Intersectionality and Climate Institutions in Industrialised States Gunnhildur Lily Magnúsdóttir, Annica Kronsell, 2021-06-16 This book explores how climate institutions in industrialized countries work to further the recognition of social differences and integrate this understanding in climate policy making With contributions from a range of expert scholars in the field this volume investigates policy making in climate institutions from the perspective of power as it relates to gender It also considers other intersecting social factors at different levels of governance from the global to the local level and extending into climate relevant sectors The authors argue that a focus on climate institutions is important since they not only develop strategies and policies they also reproduce power relations promote specific norms and values and distribute resources The chapters throughout draw on examples from various institutions including national ministries transport and waste management authorities and local authorities as well as the European Union and the UNFCCC regime Overall this book demonstrates how feminist institutionalist theory and intersectionality approaches can contribute to an increased understanding of power relations and social differences in climate policy making and in climate relevant sectors in industrialized states In doing so it highlights the challenges of path dependencies but also reveals opportunities for advancing gender equality equity and social justice Gender Intersectionality and Climate Institutions in Industrialized States will be of great interest to students and scholars of climate politics international relations gender studies and policy studies The Open Access version of this book available at <https://doi.org/10.4324/9781003052821> has been made available under a Creative Commons Attribution Non Commercial No Derivatives 4.0 license [Innovating Energy Access for Remote Areas: Discovering Untapped Resources](#) Schäfer, Martina, Kammen, Daniel, Kebir, Noara, Philipp, Daniel, 2015-02-16 This volume centers on the idea that innovative approaches for energy access can work with previously underutilized or unrecognized resources as this may lead to circumstances for the development of successful and sustainable energy programs Such untapped resources may be seen in the discovering of synergies in areas such as pre-existing service infrastructures supply chain and value chain management natural resource availability financing schemes and leap frog technologies Additionally decentralized approaches can contribute to climate change adaptation measures and increase resiliency for vulnerable communities Of course small scale solutions have clear limitations in regard to global climate and it is important to consider how far they can extend and aggregate impact This book assembles a selection of articles collected from the 2014 Energy Access Conference at UC Berkeley aiming to consider technical financial human institutional and natural resource capital Im Fokus der Konferenz Innovating Energy Access for Remote Areas Discovering Untapped Resources die vom 10 bis zum 12 April 2014 an der University of California stattfand war der Zugang zu moderner Energieversorgung in strukturschwachen Regionen Dieser Tagungsband trägt eine Reihe von innovativen Ansätzen zusammen die auf der Konferenz diskutiert wurden In den Beiträgen spiegeln sich aktuelle Konzepte Theorien Methoden und Techniken im Bereich der dezentralen

A Just Transition NJ Ayuk, 2023-03-07 The book addresses the many problems with the West s current approach to development in Africa showing how foreign aid and misguided investments have often prevented African countries from meeting their own needs and offers concrete suggestions for a viable program of electrification economic development and capacity building that will lead to climate friendly energy production Kirkus Reviews Mr Ayuk shows how the oil and gas industry can unleash economic development and prosperity across the continent The late OPEC Secretary General Mohammad Barkindo In just a few short decades the many countries of our planet have become interconnected beyond our wildest imaginations And as our view of the world has expanded there has been a rise in the demand for cultures and political institutions around the world to think globally While thinking globally is often well meaning acting globally without consideration for local countries can unintentionally cause harmful results In *A Just Transition* renowned Cameroonian author and entrepreneur NJ Ayuk reveals how this sobering reality is unfolding as the International Energy Agency s ambitious green energy IEA policies have stifled and crippled the energy economies of Africa When the IEA set a hard requirement for countries around the world to embrace green energy sources the burgeoning energy economies of Africa watched in horror as funding and business interest in their oil and gas energy projects evaporated With a natural abundance of oil and gas resources Africa has the potential to be a global energy leader But this transformation cannot happen for African countries through green energy alone *A Just Transition* is an insightful exploration into the possibility of a bright future for African countries and the factors that stand in the way of its manifestation NJ Ayuk takes listeners on a detailed expert journey through the following topics The reality of energy poverty The value of natural gas in Africa How foreign aid actually harms Africa Embracing new technology Creating opportunities for women And much more With thoughtful governance a keen eye for opportunity and the due consideration of the countries affected by a sweeping legislation it is possible for countries in Africa to make a transition to renewable energy that is not only just but prosperous for all involved
