Energy and Emissions Markets Tom James, Peter C. Fusaro, 2011-08-24 Written by best selling author Peter C Fusaro and renowned energy market expert and commentator Tom James this book demonstrates that the forces of energy and environmental issues are linked more than ever before The beginning of European emissions trading in 2005 and the implementation of the Kyoto protocol have accelerated efforts already underway in the US to use market forces to remediate environmental issues Topics such as emissions trading renewable energy trading the fourth dimension in energy trading and new outcomes on green project finance will be analyzed in this book

The Energy Journal , 2005 Derivatives , **The Future of Oil as a Source of Energy** , 2003 A comprehensive analysis of the future of oil that assesses the present realities and prospects of the oil sector tracing the growth of alternative and renewable energy sources and examining the impact of environmental concerns

The Future of Oil as a Source of Energy The Emirates Center for Strategic Studies and Research, 2002-08-12 This book examines various aspects of the future of oil as a source of energy including future oil supply oil demand and market stability It reflects the analysis and assessments of the energy experts who gathered at the ECSSR's Sixth Annual Energy Conference entitled The Future of Oil as a Source of Energy Although the future supply of oil is difficult to forecast due to many uncertainties around

production and reserve data it is estimated that oil from the Gulf and other non syndicated oil producing regions will form the larger part of global oil supplies after 2010 The volume also explores the potential of alternative energy sources like gas hydrogen and renewable sources Despite the projected increase in energy demand due to population growth and higher standards of living in the developed world heightened environmental concerns and policies to reduce damaging emissions are likely to reduce oil s share in the energy market over time A combination of conversion technologies and energy sources including natural gas renewable energy and hydrogen now has the potential to form more than niche markets in the currently oil dominated energy sector at least in certain parts of the globe Nevertheless it is expected that oil will continue to be the energy source of choice for most regions
