Energy Humanities Imre Szeman, Dominic Boyer, 2017-04-22 Energy humanities is a field of scholarship that like medical humanities and digital humanities before it overcomes traditional boundaries between the disciplines and between academic

and applied research Like its predecessors energy humanities highlights the essential contribution that the insights and methods of the human sciences can make to areas of study and analysis once thought best left to the natural sciences This isn't a case of the humanities simply helping their cross campus colleagues to learn the mechanics of communication so that they might better articulate their ideas Rather these fields of scholarship are ones that demonstrate how the scale and complexity of the issues being explored demand insights and approaches that transcend old school disciplinary boundaries Energy Humanities A Reader offers a carefully curated selection of the best and most influential work in energy humanities that has appeared over the past decade To stay true to the diverse work that makes up this emergent field selections range from anthropology and geography to philosophy history and cultural studies to recent energy focused interventions in art and literature The three readers all agree that this is an important ground breaking collection of work Provided by publisher

Musicological Identities Jacqueline Warwick, 2017-07-05 No music scholar has made as profound an impact on contemporary thought as Susan McClary a central figure in what has been termed the new musicology In this volume seventeen distinguished scholars pay tribute to her work with essays addressing three approaches to music that have characterized her own writings reassessing music's role in identity formation particularly regarding gender sexuality and race exploring music's capacity to define and regulate perceptions and experiences of time and advancing new modes of analysis more appropriate to those aspects and modes of musicking ignored by traditional methods Contributors include in overlapping categories many fellow pioneers current colleagues and former students and their essays like McClary's own work address a wide range of repertoires ranging from the established canon to a variety of popular genres The collection represents the generational arrival of the new musicology into full maturity dividing fairly evenly between pre eminent scholars of music and a group of younger scholars who have already made their mark in significant ways But the collection is also and fundamentally interdisciplinary in nature in active conversation with such fields as history anthropology philosophy aesthetics media studies film music studies dramatic criticism women's studies and cultural studies **The ^AOxford**

Matthews, A. M. Schumann, 1995-11 The first reconnaissance of all the major planets of the Solar System culminated in the Voyager 2 encounter with Neptune in August 1989 Neptune itself was revealed as a planet with gigantic active storms in its atmosphere and off center magnetic field and a system of tenuous lumpy rings Whereas only two satellites were known prior to the encounter Voyager discovered six more Triton the largest satellite was revealed as a frozen icy world with clouds and layers of haze and with vertical plumes of particles reaching five miles into the thin atmosphere This latest Space Science Series volume presents the current level of understanding of Neptune its rings and its satellites derived from the data

received from the Voyager The book's chapters are written by the world's leading authorities on various aspects of the Neptune system and are based on papers presented at an international conference held in January 1992 Covering details of Neptune's interior atmosphere rings magnetic fields and near space environment as well as the small satellites and the remarkable moon Triton this volume is a unique resource for planetary scientists and astronomers requiring a comprehensive analysis of Neptune viewed in the context of our knowledge of the other giant planets Until another spacecraft is sent to Neptune Neptune and Triton will stand as the basic reference on the planet
