Energy Security Cooperation in Northeast Asia

Bo Kong,Jae H. Ku,2015-04-24 Drawing on cutting edge research from leading scholars this book investigates state preferences for regime creation and assesses state capacity for executing these preferences in Northeast Asia s energy domain defined as the geographical area comprising the following countries Russia Mongolia China Japan South Korea and North Korea It examines questions pertaining to how states perceive the need and necessity for establishing a regime when it comes to the issue of energy and how much commitment they make to the effort in Northeast Asia The book analyses the factors that shape each country s fundamental energy interests in the region how these interests impact their attitudes toward engaging the region on energy security and the way they carry out their regional engagement Based on countries interests in promoting institutionalized regional energy cooperation and their capacity for forging that cooperation the collection assesses each state s role in contributing to an energy regime in Northeast Asia It then concludes with a critique on the decade plus quest for energy security cooperation in Northeast Asia and suggests ways forward for facilitating regional energy security cooperation This book will be of great interest to scholars

and students of environmental policy energy policy security studies Asian studies and international relations *Renewable Energy in East Asia* Christopher M. Dent, 2014-11-27 Energy is crucial to the functioning of any human society and central to understanding East Asia's economic miracle. The region's rapid development over the last few decades has been inherently energy intensive and the impact on global energy security, climate change and the twenty-first century global system generally is now very significant and will become more so over foreseeable years and decades to come. The region is already the world's largest energy consumer and greenhouse gas emitter so establishing cleaner energy systems in East Asia is both a regional and global challenge and renewable energy has a critically important part to play in meeting it. This book presents a comprehensive study of renewable energy development in East Asia. It begins by examining renewable energy development in global and historic contexts and situates East Asia's position in the recent worldwide expansion of renewables. This same approach is applied on sector-specific chapter studies on wind, solar, hydropower, geothermal, ocean wave and tidal and bioenergy and to general trends in renewable energy policy. Governments play a critical role in promoting renewables and their contribution to tackling climate change and other environmental challenges. Christopher M. Dent argues this is particularly relevant to East Asia where state capacity practice has been increasingly allied to ecological modernisation thinking to form what he calls new developmentalism, the principal foundation on which renewables have developed in the region as well as how East Asia's low carbon development is being generally promoted. *Renewable Energy in East Asia* will be of huge interest to students and scholars of Asian studies, economics, political economy, energy studies, business development, international relations and environmental studies. It will also appeal to researchers working on the subject matter in government, business, international organisations, think tanks and civil society organisations.

Energy Conservation in East Asia

Elspeth Thomson, Youngho Chang, Jae-Seung Lee, 2011 As East and Southeast Asia continue to modernize and urbanize their demand for energy will soar. Besides seeking to import fossil fuels from the Middle East, Africa, the Caspian Region, Russia, Latin America, Australia etc, it is imperative for these Asian countries to cooperate in substantially raising the efficiency with which energy is consumed. This book offers a comprehensive examination of East and Southeast Asia's energy conservation policies. It begins with a summary of the current and projected energy supply and demand patterns in the region and a discussion about the need and basis for cooperation in energy conservation. This is followed by an examination of the energy conservation policies and progress to date in seven ASEAN countries and in China, Japan and Korea.

Complexity, Security and Civil Society in East Asia

Peter Hayes, Kiho Yi, 2015-06-22 *Complexity, Security and Civil Society in East Asia* offers the latest understanding of complex global problems in the region including nuclear weapons, urban insecurity, energy and climate change. Detailed case studies of China, North and South Korea and Japan demonstrate the importance of civil society and civic diplomacy in reaching shared solutions to these problems in East Asia and beyond. Each chapter describes regional civil society initiatives that tackle complex challenges to East Asia's security. In doing so, the book identifies key

pressure points at which civil society can push for constructive changes especially ones that reduce the North Korean threat to its neighbors Unusually this book is both theoretical and practical Complexity Security and Civil Society in East Asia presents strategies that can be led by civil society and negotiated by its diplomats to realize peace security and sustainability worldwide It shows that networked civic diplomacy offers solutions to these urgent issues that official complex diplomacy cannot By providing a new theoretical framework based on empirical observation this volume is a must read for diplomats scholars students journalists activists and individual readers seeking insight into how to solve the crucial issues of our time

Energy Security and the Indian Ocean Region Dennis Rumley, Sanjay Chaturvedi, 2015-07-24 First published in 2005 this book is the second volume produced by the Indian Ocean Research Group IORG The Indian Ocean Region has become increasingly important to discussions on energy security not only because of the critical importance of regional states as energy suppliers but also because of the essential role of the Ocean as an energy route The main purpose of this volume is to provide an elaborate and critical evaluation of some of these issues and their implications for regions outside the Indian Ocean

Energy Market Integration in East Asia Yanrui Wu, Fukunari Kimura, Xunpeng Shi, 2013-12-04 East Asian nations through the dialogue between ASEAN and its partners have been promoting energy market integration EMI for a decade The formation of the East Asian Summit EAS group in 2005 adds new momentum to the EMI course in the region The objective of this edited volume is to present new insights into the understanding of EMI in East Asia and draw implications for further development This book is the first publication of its kind exclusively focusing on EMI in East Asia The chapters are written by a distinguished group of specialists in the field of energy policy business and economics The covered topics range from the general debates about EMI to regional policy responses A variety of qualitative and quantitative methods are employed in this book For qualitative methods public goods theory and the comparative study method are two examples The quantitative methods include economic growth theory principle component approach input output table computable general equilibrium CGE models and econometric techniques Important policy implications can be drawn from the findings One clear message is that EMI should be promoted actively but in a gradual incremental manner Other policy implications are related to inter regional governance infrastructure development and gas market integration The content has not been published elsewhere and hence makes a unique contribution to the literature There are also case studies of specific energy sectors such as petroleum and natural gas Overall this book should be of interest to a wide audience such as academia business analysts and policy makers

South Asia Trade and Energy Security Narottam P. Banskota, 2012 Today policy makers in both developed and developing countries are pursuing regionalization as a means to achieve easier market access economies of scale and welfare gains South Asia Trade and Energy Security explains how regional economic cooperation in trade and energy security could help facilitate the economic transformation of the region reducing poverty and expanding production Currently intra regional trade in South Asia is constrained by tariff and non tariff barriers A fully functional free trade area as

envisaged in the South Asian Free Trade Area agreement has yet to be realized This book explains the current patterns and limitations of energy trade between countries in South Asia and how the growing demand for energy could be met by working closely with energy rich Iran Burma and Central Asian countries Cross border cooperation between India and China Chinese investment in Tibet and Xinxiang and water relations are also discussed Policymakers geopolitical strategists and academics working in Asian Studies will appreciate this detailed analysis of how globalization and regional cooperation in trade and energy are playing a transformative role in South Asia s economic development Comparing Institution-Building in East Asia H. Yoshimatsu, 2014-05-29 Yoshimatsu explores the causes and implications of the diverse degree of institution building in East Asia by examining two processes of initiating and developing multilateral institutions in five policy areas trade finance food security energy security and the environment

Energy and Non-Traditional Security (NTS) in Asia Mely Caballero-Anthony, Youngho Chang, Nur Azha Putra, 2012-06-07 Traditional notions of security are premised on the primacy of state security In relation to energy security traditional policy thinking has focused on ensuring supply without much emphasis on socioeconomic and environmental impacts Non traditional security NTS scholars argue that threats to human security have become increasingly prominent since the end of the Cold War and that it is thus critical to adopt a holistic and multidisciplinary approach in addressing rising energy needs This volume represents the perspectives of scholars from across Asia looking at diverse aspects of energy security through a non traditional security lens The issues covered include environmental and socioeconomic impacts the role of the market the role of civil society energy sustainability and policy trends in the ASEAN region

China's Search for Energy Security Suisheng Zhao, 2014-06-11 China s rapid economic growth in the recent decades has produced an unprecedented energy vulnerability that could threaten the sustainability of its economic development a linchpin to social stability and ultimately the regime legitimacy of the Chinese Communist Party CCP as well as the foundation for China s rising power aspirations What is the Chinese perception of the energy security and challenges how has the Chinese government responded to the challenges What are the international implications of China s search for energy security This collection of contributions by leading scholars seeks answers to these extremely important questions The book is divided into three parts Part I presents an overview of China s sense of energy security and its strategic responses Part II examines China s energy policy making processes the efforts to reform and reorganize the energy sector and reset policy priorities Part III focuses on the international implications of China s search for energy security This book consists of articles published in the Journal of Contemporary China
