Energy Structures And Environmental Futures:

Energy Structures and Environmental Futures Torleif Haugland, Helge Ole Bergesen, Kjell Roland, 1998 This book examines the history and prospects of the European energy sector for the last twenty five and the next twenty five years The authors analysis is rooted in a careful examination of the factors that have shaped energy in Europe over the last quarter century its regulatory systems its corporate structures and its regulatory and environmental structures They conclude that whatever major changes may occur the structures of the twentieth century are not going to yield easily to economic internationalization nor to political environmentalism **Energy and the Politics of the North Atlantic** George A.

Gonzalez, 2013-01-01 Documents how energy resource acquisition has been the driving motivator for European and American international relations Ecological Public Health Geof Rayner, Tim Lang, 2013-06-19 What is public health To some it is

about drains water food and housing all requiring engineering and expert management To others it is the State using medicine or health education and tackling unhealthy lifestyles This book argues that public health thinking needs an overhaul a return to and modernisation around ecological principles Ecological Public Health thinking outlined here fits the twenty first century s challenges It integrates what the authors call the four dimensions of existence the material biological social and cultural aspects of life Public health becomes the task of transforming the relationship between people their circumstances and the biological world of nature and bodies For Geof Rayner and Tim Lang this is about facing a number of long term transitions some well recognized others not These transitions are Demographic Epidemiological Urban Energy Economic Nutrition Biological Cultural and Democracy itself The authors argue that identifying large scale transitions such as these refocuses public health actions onto the conditions on which human and eco systems health interact Making their case Rayner and Lang map past confusions in public health images definitions and models This is an optimistic book arguing public health can be rescued from its current dilemmas and frustrations This century s agenda is unavoidably complex however and requires stronger and more daring combinations of interdisciplinary work movements and professions locally nationally and globally Outlining these in the concluding section the book charts a positive and reinvigorated institutional purpose *Energy, the Modern State, and the American World System* George A. Gonzalez, 2018-03-01 Energy and the

modern state The political economy of energy Urban sprawl in the U S and the creation of the Hitler regime Urban sprawl the Great Depression and the start of World War II U S economic elites nuclear power and solar energy Global oil politics Plutonium and U S foreign policy Conclusion energy and the global order **Energy And Environmental Studies For The**

Near Future Azim Doğuş TUNCER, Bekir Can LÜTFÜOĞLU, Afşin GÜNGÖR, Onur KARAMAN, 2019-10-10 **American Empire and the Canadian Oil Sands** George A. Gonzalez, 2016-04-08 Throughout the US oil and gas shale are being hydrofracked to produce petroleum and natural gas Oil or tar sands from Canada is being processed thereby generating large amounts of crude This book places the unconventional fossil fuels revolution that is taking place in North America

within the context of great power politics Energy and Empire George A. Gonzalez, 2012-09-01 What set the United States on the path to developing commercial nuclear energy in the 1950s and what led to the seeming demise of that industry in the late 1970s Why in spite of the depletion of fossil fuels and the obvious dangers of global warming has the United States moved so slowly toward adopting alternatives In Energy and Empire George A Gonzalez presents a clear and concise argument demonstrating that economic elites tied their advocacy of the nuclear energy option to post 1945 American foreign policy goals At the same time these elites opposed government support for other forms of energy such as solar that cannot be dominated by one nation While researchers have blamed safety concerns and other factors as helping to arrest the expansion of domestic nuclear power plant construction Gonzalez points to an entirely different set of motivations stemming from the loss of America's domination control of the enrichment of nuclear fuel Once foreign countries could enrich their own fuel civilian nuclear power ceased to be a lever the United States could use to economically politically dominate other nations Instead it became a major concern relating to nuclear weapons proliferation **Envisioning Our Environmental Future**

B.H. Desai, 2022-09-09 With the Stockholm 50 Conference held on 23 June 2022 the global movement to protect the environment has reached a 50 year milestone The first UN Conference on the Human Environment also held in Stockholm from 5-16 June 1972 proved to be the watershed in addressing this problem and as the world assembles once more in the Swedish capital it is time to think aloud and look ahead In his address in 1972 the then Swedish Prime Minister Olof Palme said The decisive question is in which direction we will develop there is no individual future neither for people nor for nations The only other head of government to attend in 1972 Indian Prime Minister Indira Gandhi highlighted the development as one of the primary means of improving the environment of living of providing food water sanitation and shelter of making the deserts green and mountains habitable and drew attention to the wisdom of the Atharva Veda What of thee I dig out Let that quickly grow over Let me not hit thy vitals or thy heart As we look back over 50 years we need to assess what has gone wrong in the trajectory travelled so far and look ahead to the future of our environment at this juncture and beyond As a scholarly journal for global decision makers Environmental Policy and Law has sought to envision what lies ahead in the 21st century by inviting outstanding scholarly works from around the world The 22 articles which resulted from this invitation are presented in this book Envisioning Our Environmental Future which is organised in three parts Testing Times Global Ideas and Sectoral Ideas The book is a sequel to Our Earth Matters IOS Press which was published on 5 June 2021 Bharat H Desai is Professor of International Law and Jawaharlal Nehru Chair in International Environmental Law at the Centre for International Legal Studies School of International Studies of Jawaharlal Nehru University New Delhi He is Editor in Chief of the global journals Environmental Policy and Law Amsterdam IOS Press and Yearbook of International Environmental Law Oxford Oxford University Press Prof Desai's ideas and proposals are reflected in his published books and in journals of international repute **Energy Hedging in Asia: Market Structure and Trading Opportunities** P. Fusaro, T.

James,2005-08-02 This book focuses on the latest developments in the Asia Pacific community in terms of how deregulation and privatization are bringing more risk to energy companies In the light of these market changes interest in energy risk management has grown substantially and is becoming a fiduciary responsibility of energy companies As energy trading power exchanges and hedging techniques establish themselves in the oil power and gas sectors so then do newer derivatives markets emerge in LNG hedging weather derivatives and freight hedging Fusaro and James as seasoned market practitioners in the region focus on these market changes and examine the future of Asian energy hedging **Energy Economics, Finance, and Management in Developing and Emerging Economies** Hooi Hooi Lean,Jin Hooi Chan,2025-09-15 Energy Economics Finance and Management in Developing and Emerging Economies provides a comprehensive exploration of how developing nations can navigate the challenges of energy transition while managing scarce resources With a focus on practical strategies the book delves into economic frameworks financing mechanisms and management practices tailored for emerging economies By addressing the interplay between global energy dynamics and local constraints it equips policymakers researchers and industry professionals with actionable insights to foster sustainable development and economic resilience The book also emphasizes the critical role of innovation community engagement and international collaboration highlighting case studies best practices and adaptable solutions designed for diverse socio economic contexts Provides fresh and essential insights into the needs of developing and emerging economies in the energy transition Breaks down opportunities regulatory tactics and financial incentives for renewable and sustainable energy sources Includes a wide range of case studies from experts across the globe *The Future of Energy Efficiency in Post-COVID-19 Era* Muhammad Mohsin,Yu Hao,Abdul Khaliq Rasheed,Muhammad Irfan,FengSheng Chien,2025-02-10 The COVID 19 pandemic has led several governments to impose movement control resulting in serious challenges towards the research development and commercialization of sustainable energy generation and conversion technologies As a result of the economic slowdown in many parts of the world the poor are in distress Experts believe that a fast recovery from the COVID 19 epidemic or any future disaster will need clean and sustainable energy However questions arise on what type of renewable energy technologies will ensure our resilience in the face of future disasters like COVID 19 that aids rebuilding economies and puts nations on track to meet global climate and sustainable development goals Therefore this Research Topic primarily aims at compiling recent progress on energy generation conversion and resource utilization that would help resolve energy problems amidst and post Covid 19 pandemic *Cities for Smart Environmental and Energy Futures* Stamatina Th.
