## **Enforcing The Work Ethic Rhetoric And Everyday Life In A Work Incentive Program:**

**Enforcing the Work Ethic** Gale Miller, 1991-01-22 This analysis based on a year's observation of social relations in a Work Incentive Program WIC office explores the ways in which staff members organize their interactions with clients coworkers and supervisors Miller focuses on rhetoric persuasive discourse as a central aspect of everyday work and as a means of analyzing activities and relationships He shows for example how staff members clients and supervisors rhetorically define and justify organizational purposes or typical and preferred organizational solutions to problems The book offers an alternative image and orientation to low level human service professionals and emphasizes how they actively participate in the creation and maintenance of troublesome work relationships *Against Critical Thinking in Health, Social Care and Social Work* Tom Grimwood, 2023-09-08 This book stages a provocative dialogue between social work health and social care and contemporary philosophy in order to inform theory and practice in a complex and challenging world Today the social world is marked by deep rooted complexities tensions and challenges Health workers and social workers are constantly reminded to employ critical thinking to navigate this world through their practice But given how many of these challenges pose significant problems for the theories that these subjects have traditionally drawn upon should we now be critical of critical thinking its assumptions its basis and its aspirations itself Arguing that health and social work theory must reconsider its deep rooted assumptions about criticality in order to navigate complex neoliberalism post truth and the relationship between language and late capitalism it examines how the fusion of theory and practice can re imagine critical thinking for health social care and social work It will be of interest to all scholars students and professionals of social work and health and social care

**Becoming Miracle Workers** Gale Miller, 2017-11-30 Brief therapy is a postmodern treatment mode that treats problems as social constructions encouraging those seeking treatment to replace personal troubles negative stories with new problem solving skills positive stories The significant differences discussed in this book do not involve sociologists and brief therapists The differences are between brief therapists on the one hand and practitioners of psychotherapy and family therapy on the other One indicator of these is brief therapists describing the people who seek their services as clients The terminology may be contrasted with the language of patients used by many other therapists At the very least this difference suggests how brief therapy departs from therapy approaches that are based on the medical model *Becoming Miracle Workers* takes the reader inside Northland Clinic one of the most innovative and important centers of brief therapy in the world Based on twelve years of research Miller's book discusses how brief therapy has evolved into its present postmodern form He describes the details of brief therapist client interactions and the behind the scenes discussions among brief therapists about their clients problems This readable account of the workings of brief therapy invites readers to sit in on brief therapy sessions provides them with new understandings of personal troubles as social constructions and shows how brief therapists help their clients develop new untroubled life stories

*The Deviant Mystique* Scott Grills, Robert Prus, 2003-02-28 Adopting a symbolic interactionist perspective and building extensively on the ethnographic research tradition this book analyzes the mystique that often accompanies deviance by examining deviance as an ongoing feature of community life Because deviance is approached in nonprescriptive ways as a product of community interchange the emphasis here is on the ways in which deviance is defined engaged and regulated It is examined as the product of human association as something that is generated by people as they interact with one another assume viewpoints and initiatives and try to influence and resist one another within the context of community life Prus and Grills do not attempt to address various deviant behaviors instead they provide readers with a glimpse into how deviance is formulated practiced viewed and treated Who defines deviance Why What are the effects of deviance on others How do subcultures form These and other questions are answered in this unique approach to the study of deviance Providing a conceptually coherent framework for approaching the study of deviance as an ongoing feature of the human community the authors pay special attention to the many theaters of operation in which people come together and engage one another with respect to morality and deviance Recognizing that audience definitions of deviance are pivotal to community notions of reality and actual interaction consideration is given to the interrelated processes of defining deviance identifying deviants regulating deviance informally and formally and experiencing treatment and disinvolvement This thoughtful consideration serves to shed new light on the mystique that has been created around ideas about deviance

**Narrative Productions of Meanings**

Donileen R. Loseke, 2019-04-08 In *Narrative Productions of Meanings* Exploring the Work of Stories in Social Life Donileen R. Loseke examines the importance of stories in an anti science anti fact era where a multitude of personal social and political problems surround meaning This book's basic argument is that within such a world narrative productions of meaning are particularly important because stories can appeal simultaneously to thinking feeling and moral evaluation and because they can do this in ways that have cultural interactional and personal dimensions This book develops a framework for social science examinations of narrative it outlines relationships between stories storytelling and culture and it explores the characteristics of several types of stories including self stories stories that persuade mass audiences that public resources

are required to resolve intolerable conditions and stories that justify the contents of public policy. It concludes with relationships between stories and democratic politics. In multiple ways this analysis crosses common divides. It draws from literature spanning multiple disciplines; it treats thinking, feeling, and moral evaluation as inseparable; it bridges cultural and social psychological perspectives; and it demonstrates relationships between story structure and the work people do with stories.

**Context and Method in Qualitative Research** Gale Miller, Robert Dingwall, 1997-06-11 A critical examination of the principles and practice of qualitative research is provided in this book which examines the interplay between context and method making it invaluable for both the experienced and the beginning researcher. A range of methodological and practical issues central to the concerns of qualitative researchers are addressed. These include the validity and plausibility of qualitative methods, the problems encountered using specific techniques in a range of social settings, and the moral issues raised in qualitative research. These themes are related to practical issues which are illustrated by a breadth of examples and in depth case studies. The contributors look at the methods and strategies that they have used to study everyday life and make suggestions to readers on why and how they might conduct their own studies. They raise issues that go beyond cookbook discussions of issues such as how to enter social settings, manage the subjects of one's research, and ask good questions in the process of formulating research strategies. These issues are addressed within the framework of the larger purposes and uses of qualitative research where specific methodological problems are not used as ends in themselves.

**Project Team Rewards** Jöran Beel, 2007-11-04 This book gives you a comprehensive introduction to rewards in general and project team rewards in particular. Motivation theories and their impact on designing a reward system are explained. Throughout the book six so-called reward questions are considered that need to be answered for designing a reward system. These reward questions are: Rewarding or not rewarding? Whom to reward? What to reward? What kind of reward? How much reward? When to reward? In addition, impacts of variable factors that may influence the answers to the reward questions are identified and explained. Some of those factors are employee's age, the company's culture, but also project characteristics such as goal clarity, applied success criteria, project duration, or member fluctuation. Please note that this book originally was written as a Master's Thesis. Accordingly, you should not expect to read a normal text book but a Master's Thesis. make sense of ourselves and others It introduces two primary changes First some attention is devoted to the new social movements that emphasize social change through identity transformation rather than through structural change Second the text now also looks more closely at the importance of emotions in constructing public consciousness of social problems When the first edition was published Teaching Sociology noted Loseke does a superb job explaining the relationship between sociology and social problems in a text that is very well researched and engaging yet with tremendous attention to detail and accuracy Would provide a solid base for any social problems class Contemporary Sociology wrote that the book is engagingly well written in a personal unpretentious style and well informed by the author's knowledge of the professional literature
