Engaging People In Sustainability:

Engaging People in Sustainability Daniella Tilbury, David Wortman, 2004 The book is based on the exchange of professional experiences which featured in an IUCN CEC workshop in August 2002 Practitioners from around the world shared their models of good practice and explored the challenges involved in engaging people in sustainability The difficulties facing practitioners vary between country and context but some challenges are universal A lack of clarity in communicating what is meant by sustainable development An ambition to educate everyone to bring about a global citizenship Social organisational or institutional factors constrain change to sustainable development yet there is an emphasis on formal education and community educators do not receive the same support A lack of balance in addressing the integration of environmental social and economic dimensions leading to an interpretation that ESD is mainly about environment and conservation issues New learning rather than teaching approaches are called for to promote more debate in society Yet few are trained or experienced in these new approaches Practitioners need support to explore new ways of promoting learning Foreword ed The Palgrave Handbook of Global Sustainability Robert Brinkmann, 2023-04-04 The field of sustainability continues to evolve as a discipline The world is facing multiple sustainability challenges such as climate change water depletion ecosystem loss and environmental racism The Handbook of Sustainability will provide a comprehensive reference for the field that examines in depth the major themes within what are known as the three E s of sustainability environment equity and economics These three themes will serve as the main organizing body of the work In addition the work will include sections on history and sustainability major figures in the development of sustainability as a discipline and important organizations that contributed or that continue to contribute to sustainability as a field The work is explicitly global in scope as it considers the very different issues associated with sustainability in the global north and south

The Theory-Story Reader for Social Studies Bretton A. Varga, Erin C. Adams, 2024 Theory holds the capacity to help educators see the world differently challenge problematic assumptions and practices that cultivate harm and illuminate pathways towards access equity justice joy and love While it is easy to underestimate the role of theory in such pursuits throughout social studies education this book shows that theory is always already present in all productions of teaching and learning In this collection well established scholars highlight a broad range of theories that are currently being used to alter the landscape of social studies instruction Important to these efforts is the position that theory does not exist in a vacuum but rather is the reflection of a certain set of concepts and the relationship that one holds to those ideas Taking this further each chapter author employs storytelling as a means to share their personal history and unpack how they came to understand their selected theoretical topic They address a breadth of

concepts such as Black feminism psychoanalysis racial capitalism settler colonialism sustainability and technoskepticism

Book Features The only resource of its kind that pairs storying with a far reaching range of theories actively being used by scholars in the field of social studies education and research Brief chapters arranged alphabetically by concept provide structure while also staying true to the book's framing of theory as being curious fragmented nomadic and discursive Embedded connections within each chapter meant to help readers understand the relational and entangled nature of theory Contributors include Sohyun An Kristen Duncan Jillian Ford Jim Garrett Wayne Journell Noreen Naseem Rodriguez Muna Saleh Sandra Schmidt Sarah Shear Cathryn van Kessel and Amanda Vickery

Engaging Environmental Education

,2010-01-01 As more attention is devoted to the increasing and complex socio ecological issues facing the planet new insights and new ways of thinking are being sought about the learning and agency of children and adults in relation to these environmental concerns The contributors to this book address the critically important dual challenge of making environmental education engaging while engaging individuals institutions and communities Rather than treating students and citizens as passive recipients of other people's knowledge the book highlights the importance of engaging learners as active agents in thinking about and constructing a more sustainable and equitable quality of life The case studies emphasize socio cultural approaches to environmental learning within and outside formal education in a diverse range of international contexts including Canada Denmark Korea the Netherlands South Africa Sweden the United Kingdom and the United States The authors not only illuminate the challenges and complexity of engaging youth and adults in meaningful learning as well as informed action on complex environmental issues but also document and offer important insights into promising ways in which these challenges might be addressed In addition to the many stimulating ideas and strategies for building the learning capacities of individuals and organizations for creating ecologically sustainable communities and societies further important questions are raised that educators policymakers and researchers might consider

Environmental Impact V J.

Casares,2020-08-18 Formed of a collection of papers from the 5th International Conference on Environmental and Economic Impact on Sustainable Development the included works examine the most serious problems affecting sustainable development The papers consider the impact of economic constraints on the environment taking into account the social aspects as well as the over use of natural resources Uncontrolled development can also result in damage to the environment in terms of the release of toxic substances and hazardous waste Therefore decisions have to be made as to whether some forms of development are compatible with environmental protection particularly in cases of possible serious contamination and toxicity More constructive and progressive approaches are required to ensure sustainability A major motivation is to learn from past failure to avoid repeating similar mistakes while attempting to prevent emerging threats to environmental and ecological systems Fundamental to these concepts is the analysis of the inherent risk and the development of appropriate strategies
