Engaging Teachers:

Everyone at the Table Ellen Behrstock-Sherratt, Allison Rizzolo, Sabrina W. Laine, Will Friedman, 2013-05-01 A proven method for working with teachers to design better evaluations There is no magic formula for successfully designing a teacher evaluation system However there is abundant evidence that suggests involving teachers in the process will reduce the likelihood of opposition gridlock and reform failure Everyone at the Table provides materials to genuinely engage teachers in the evaluation process The book is a research based and field tested practical guide for school leaders With this resource educators will have the tools they need to develop meaningful teacher evaluations Offers a collaborative approach to designing teacher evaluations Includes a companion web based resource with video This research based program outlines a solid plan for improving teacher effectiveness through evaluation reform *EBOOK: ENGAGING TEACHERS* Trevor Gale, Kathleen Densmore, 2003-04-16 This is a useful interesting and valuable work The authors ask the difficult questions and attempt answers which although complex are written in an accessible and open manner It deserves to be widely read Educational Review Engaging Teachers makes a deliberate attempt to reclaim the education discourse captured by new right politics and connect it with a radical democratic agenda for schooling On its agenda are education markets policy leadership professionalism and communities Engaging with these is conceived on at least two levels First as an invitation to teachers to become involved in reconstructing schooling for socially just purposes and in democratic ways From this perspective the politics of engagement is not simply a matter of acquiescence or resistance but is informed by a commitment to generate alternatives teachers parents and students making things happen rather than having things done to them Also signalled is an intent to work collectively exploring and acting on common interests and across uncommon ground Second the book also celebrates teachers engaging in these reconstructive efforts in attractive and meaningful ways The attraction is decisions about schooling made by those they affect as well as decisions that are meaningful because they engage the interests of all

Engaging Teachers Gale, Trevor, Densmore, Kathleen, 2003-04-01 Engaging Teachers makes a deliberate attempt to reclaim the education discourse captured by new right politics and connect it with a radical democratic agenda for schooling On its agenda are education markets policy leadership professionalism and communities Engaging with these is conceived on at least two levels

Fraser, 2020-07-07

Examining teacher education in an international context this book captures the diversity of the world s educators Many countries confront surprisingly similar challenges in preparing K 12 educators for success while national contexts also make for surprising differences In *Teaching the World s Teachers* education historians Lauren Lefty and James W Fraser and their contributors make a convincing case for approaching these shared challenges from a more global and historically minded perspective Written by education scholars from eleven different countries Argentina Brazil Catalonia Spain China England Finland Ghana Israel Singapore South Africa and the United States this book provides histories of teacher education reforms between roughly 1980 and 2020 The authors show how international trends that emerged during this period collided with national and regional contexts to produce unique teacher education systems in different nations While in some countries the embrace of markets and competition led to a deregulation of the teacher preparation field in others teaching became a highly regulated and centralized affair At the same time ideas and structural models cross borders and education leaders borrow from each other while reshaping plans in each place Opening with a broad historical overview of global teacher education models beginning in the late eighteenth century *Teaching the World s Teachers* argues that the field has long been characterized by cross border connections but shaped by geopolitical hierarchies of power In an era when teacher quality is widely recognized as one of the most important factors in a child s education this volume encourages dialogue among teacher educators and policymakers around the world By understanding the context and contingency of where we have been the authors hope that readers will walk away with a more empowered sense of where we are headed in the all important task of teaching the world s teachers Contributors Kwame Akyeampong Richard Andrews Azeem Badroodien Maria In s G F Marcondes de Souza Gustavo E Fischman James W Fraser Guangwei Hu Arie Kizel Jari Lavonen Lauren Lefty Wei Liao Jason
