## End Of Labour History:

*The End of Labour History?* Marcel van der Linden, 1993 The essays in this 1994 book aim to integrate labour history within the broader discipline of social history and to demonstrate the continuing vitality and validity of the sub discipline Each essay is in itself a response to criticisms of the ways in which labour historians have approached their subjects

**Global Histories of Work** Andreas Eckert, 2016-09-12 Global Histories of Work is the first title in the new series Work in Global and Historical Perspective This collection of selected articles written by leading scholars in different disciplines provides both an introduction and numerous insights into themes debates and methods of Global Labour History as they have been developed over the last years The contributions to the volume discuss crucial historiographical developments present different professions that have gained new attention in the context of an emerging Global Labour History critically engage the boundaries of free labour and the ambiguities contained in this concept and take up and historicize current debates about informal labour Global Histories of Work will familiarize readers with a burgeoning field of high academic social and political relevance

*Working on Rights* Anna Delius, 2023-11-20 This book is the first to connect global labor history and the history of human rights By focusing on democratic labor oppositions in Spain and Poland between 1960 and 1990 it shows how workers in authoritarian regimes addressed repression and whether they developed a language of rights in the light of a globally dynamic human rights discourse The study argues that the democratic labor oppositions in Spain and Poland were both variants of emancipatory and democracy oriented social movements with global interconnections that emerged in the 1960s It reveals that the demands for free and independent trade unions which in both countries became a flashpoint in the fight for broader democratic demands was not always discussed in rights terms but rather presented as an inevitable necessity At the same time these labor movements and their intellectual allies morally delegitimized state repression against workers and thereby employed the concepts of democracy participation solidarity progress and eventually rights Integrating the history of two European semi peripheric societies into a broader narrative this book is relevant for readers interested in global labor history human rights history and the history of democratization in Europe in the late twentieth century

*The Lifework of a Labor Historian: Essays in Honor of Marcel van der Linden*, 2018-10-16 The Life Work of a Labor Historian Essays in Honor of Marcel van der Linden eds Ulbe Bosma and Karin Hofmeester presents the latest developments in the history of labor and capitalism As part of Global Labor History Jan Lucassen Magaly Rodrigues Garcia Sidney Chalhoub and Willem van Schendel discuss new concepts of work and workers including sex workers slaves in Brazil and voluntary communal laborers in North East India while Andreas Eckert shows the relevance of area studies Jürgen Kocka presents a history of capitalism and its critics to date Pepijn Brandon analyzes Marx's ideas on the link between free and coerced labor and Jan Breman looks at the effects of capitalism on rural solidarity through the lens of Tocqueville

*In the Shadow of War and Empire* Gökem Akgöz, 2023-12-14 In the Shadow of War and Empire offers a site specific history of Ottoman and Turkish

industrialisation through the lens of a mid nineteenth century cotton factory in the Turkish Manchester the name chosen by the Ottomans for the industrial complex they built in the 1840s in Istanbul which in the contemporary words of one of the country's most prominent contemporary Marxist theorists became the secret to and the basis of Turkish capitalism in the 1930s

**Knights Across the Atlantic** Steven Parfitt, 2016-11-17 Knights Across the Atlantic tells the story of the Knights of Labor one of the great social movements of American history in Britain and Ireland

Work and Labour in the Cities of Roman Italy Miriam J. Groen-Vallinga, 2022-11-17 Work and labour are fundamental to an understanding of Roman society In a world where reliable information was scarce and economic insecurity loomed large social structures and networks of trust were of paramount importance to the way work was provided and filled in Taking its cue from New Institutional Economics this book deals with the wide range of factors shaping work and labour in the cities of Roman Italy under the early empire from families and familial structures to labour collectives slavery education and apprenticeship To illuminate the complexity of the market for labour this monograph offers a new analysis of the occupational inscriptions and reliefs from Roman Italy placing them in the wider context by means of documentary evidence like apprenticeship contracts legal sources and material remains This synthesis therefore provides a comprehensive analysis of the ancient sources on work and labour in Roman urban society leading to a novel interpretation of the market for work and a fuller understanding of the daily lives of nonelite Romans For some of them work was indeed a source of pride whereas for others it was merely a means to an end or a necessity of life

**Reworking Class** John R. Hall, 2018-09-05 The twelve essays in this volume propose new directions in the analysis of class John R Hall argues that recent historical and intellectual developments require reworking basic assumptions about classes and their dynamics The contributors effectively abandon the notion of a transcendent class struggle They seek instead to understand the historically contingent ways in which economic interests are pursued under institutionally socially and culturally structured circumstances In his introduction Hall proposes a neo Weberian venue intended to bring the most promising contemporary approaches to class analysis into productive exchange with one another Some of the chapters that follow rework how classes are conceptualized Others offer historical and sociological reflections on questions of class identity A third cluster focuses on the politics of class mobilizations and social movements in contexts of national and global economic change

Labour and the politics of Empire Neville Kirk, 2017-02-01 This is a pathbreaking comparative and trans national study of the neglected influences of nation empire and race upon the development and electoral fortunes of the Labour Party in Britain and the Australian Labor Party from their formative years of the 1900s to the elections of 2010 Based upon extensive primary and secondary source based research in Britain and Australia over several years it makes a new and original contribution to the fields of labour imperial and British world history The book offers the challenging conclusion that the forces of nation empire and race exerted much greater influence upon Labour politics in both countries than suggested by traditionalists and revisionists alike The book will appeal to undergraduates postgraduates

scholars in history and politics and all those interested in and concerned with the past present and future of Labour politics in Britain Australia and more generally *The Long End of the First World War* Katrin Bromber, Katharina Lange, Heike Liebau, Anorthe Wetzels, 2018-10-04 Eigene und Fremde Welten Herausgegeben von Jörg Baberowski Stefan Rinke und Michael Wildt Mit dem Gedenken an den Ausbruch des Ersten Weltkriegs hat sich die Art der Erinnerung an dieses welthistorische Ereignis verändert Die Beiträge dieses Bandes zielen darauf ab Verknüpfungen zwischen individuellen Kriegserfahrungen Geschichtsschreibung und Erinnerung herzustellen und so den Begriff eines statischen klar definierten Endes des Ersten Weltkrieges zu hinterfragen eines Konstrukts das hauptsächlich auf europäischen Entwicklungen beruht

**Prisms of Work** Michael Rösser, 2023-12-18 The phenomenon of labour takes the character of a prism Labour is thereby always context dependent and constituted through the actions of all protagonists involved in any labour relationship On the basis of three case studies in colonial German East Africa the construction of the Central Railway 1905 1916 the Otto Plantation in Kilossa 1907 1916 and the palaeontological Tendaguru Expedition 1909 1911 labour and labour relations are analysed The focus lies on hitherto neglected actors and groups of actors of labour in the colonial context of East Africa These were especially German companies and their staff white subaltern railway sub contractors and labour recruiters Indian skilled workers and qualified East African workers Furthermore all three sites of labour proved to have their individual logics and characteristics But all of them were in tension between the global and the local coercion and voluntariness machine and manual labour skilled and unskilled labour reproductive and wage labour as well as between black and white Michael Rösser's dissertation has been awarded with honorary distinction by the European Network in Universal and Global History ENIUGH Work in a Modern Society Jürgen Kocka, 2010-02-01 Whereas the history of workers and labor movements has been widely researched the history of work has been rather neglected by comparison This volume offers original contributions that deal with cultural social and theoretical aspects of the history of work in modern Europe including the relations between gender and work working and soldiering work and trust constructions and practices The volume focuses on Germany but also places the case studies in a broader European context It thus offers an insight into social and cultural history as practiced by German speaking scholars today but also introduces the reader to ongoing research in this field

**The Amsterdam International** Geert Van Goethem, 2017-11-28 This book charts the turbulent history of the International Federation of Trade Unions IFTU from its foundation in 1913 to its dissolution in 1945 Established to protect and advance the interests of workers of all countries and to further international solidarity the IFTU from the outset was beset by difficulties Within a year the First World War split the fledgling organisation underlining national interests and creating resentment between some of the most powerful union interests Although these differences were patched up after the end of hostilities the Revolution in Russia and rise of Soviet Communism with own aspirations to leadership of international labour soon created new tensions within the IFTU *Contested Sites* Paul A. Pickering, Alex Tyrrell, 2017-05-15

The second half of the nineteenth century witnessed a new phenomenon in public monuments and civic ornamentation. Whereas in former times public statuary had customarily been reserved for warriors and statesmen, kings and rulers of men, a new trend was emerging for towns to commemorate their own citizens. As the subjects immortalised in stone and bronze broadened beyond the traditional ruling classes to include radicals and reformers, it necessitated a corresponding widening of the language and understanding of public statuary. *Contested Sites* explores the role of these commemorations in radical public life in Britain. Despite recent advances in the understanding of the importance of symbols in public discourse, political monuments have received little attention from historians. This is to be regretted for commemorations are statements of public identity and memory that have their politics; they are embedded in complex class, gender and power relations that determine what is remembered or forgotten. Examining monuments, plaques and tombstones commemorating a variety of popular movements and reforming individuals, the contributions in *Contested Sites* reveal the relations that went into the making of public memory in modern Britain and its radical tradition. *British Trade Unions and Industrial Politics* John McIlroy, Nina Fishman, Alan Campbell, 2019-06-26. First published in 1999, this volume describes the political climate and state of trade unions after the second world war in Britain. Detailing the transition of individuals who had survived in the war or had taken part in the war effort to going back to a civilian life in 1945, following the rise of the Labour party in Britain until 1964.

**Rethinking Labour's Past** Nathan Yeowell, 2022-01-13. The Labour Party after Jeremy Corbyn is charting a new direction. Here Nathan Yeowell has brought together a remarkable array of contributors to provide expert insight into twentieth century British history and Labour politics and how they might shape thinking about Labour's future. Reframing the span of Labour history and its effects on contemporary British politics, the book provides fresh thinking and analysis of various traditions, themes and individuals. These include the shifting significance of 1945, the need for more grounded interpretations of Tony Blair's legacy and the enduring importance of place, identity and aspiration to the evolution of the party. Contributions from leading historians such as Patrick Diamond, Steven Fielding, Ben Jackson, Glen O'Hara and Florence Sutcliffe Braithwaite are supplemented by those with experience of Labour electoral politics such as Rachel Reeves and Nick Thomas-Symonds. The result is an intellectually rich and politically relevant roadmap for Labour's future. **The NUM and British Politics** Andrew Taylor, 2017-03-02. From its formation in 1944, the National Union of Mineworkers (NUM) was one of the most powerful and important players on the British political and industrial stage. Whilst the nation relied upon coal for its electricity production, domestic heating and railway transportation, the miners and their unions would always play a central role in national politics, with the ability to cause massive disruption to the nation should they decide to strike, as they did in 1972 and 1974. However, as the country began to move towards other forms of energy such as oil and gas, the power of the mineworkers correspondingly decreased, leaving the once mighty union to come to terms with a very different world by the early eighties. *The NUM and British Politics* makes use of union material and party and government archives as well as oral

testimony much of it highly confidential to present the first overall account of the evolving nature of the tripartite relationship between the miners the NUM and the state      Before the Unions Catharina Lis, Jan Lucassen, Hugo Soly, 1994 This volume examines a wide variety of collective and organized labour movements in what is arguably a distinct period in labour history The approach is a comparative one looking particularly at the United Kingdom Germany France and the Low Countries but also at Western Europe in general      Unpicking Gender Jutta Schwarzkopf, 2018-01-18 The Lancashire cotton industry doubtless counts among the most thoroughly researched industries in Britain Cotton processing has attracted attention both as the pioneer of industrialization and the harbinger of industrial decline in many ways typifying the development of the British economy from unchallenged global leader to the demise of large sectors of its manufacturing industry Yet among the spate of book and articles published about the industry there is a conspicuous lacuna Gender though rarely addressed specifically permeates the industry's historiography nonetheless This study tackles head on the notion of gender within the cotton industry during the period 1880 1914 not so much to trace its effects on the industry itself but instead concentrating on the ways gender radicalized particularly the female workers in the Lancashire mills In so doing it promotes the view that it was women weavers experience of the way in which gender inequality in the labour process clashed with varying degrees of inequality in the other spheres of their lives that caused many of them to organize for the franchise Their experience of equality in the labour process both sensitized them to inequality elsewhere and empowered them to fight against it by showing it to be a product of society rather than nature Drawing on the examples provided by disenfranchised working class men and middle class women alike they accounted for inequality in terms of their exclusion from the polity In the process of holding their own against male co workers supervisory staff employers labour activists politicians and even many middle class women they evolved their own version of working class femininity which differed in important ways from the female domesticity that had a vibrant existence in labour rhetoric but rarely beyond      **Labour's Lost Leader** Paul Tyler, 2007-06-29 The life story of Will Crooks has a Dickensian resonance As a working class child born into abject poverty he experienced the rigours of Poplar Workhouse and Poor Law school Nearly forty years later Crooks became Chairman of the Poplar Board of Guardians the very board that had given him shelter during his challenging early years Crooks was a member of the Coopers Union for fifty five years and a leading pioneer of the trade union and Labour movement for over thirty This significant and sometimes controversial figure has been overlooked by modern historians Here Paul Tyler presents a pioneering political biography of a significant Labour figure at both a local and national level and an important reinterpretation of the early trade union and labour movement from the 1880s to the 1920s
