Romans, Barbarians, and the Transformation of the Roman World Ralph W. Mathisen, Danuta Shanzer, 2016-04-08 One of the most significant transformations of the Roman world in Late Antiquity was the integration of barbarian peoples into the social cultural religious and political milieu of the Mediterranean world The nature of these transformations was considered at the sixth biennial Shifting Frontiers in Late Antiquity Conference at the University of Illinois at Urbana Champaign in March of 2005 and this volume presents an updated selection of the papers given on that occasion complemented with a few others These 25 studies do much to break down old stereotypes about the cultural and social segregation of Roman and barbarian populations and demonstrate that contrary to the past orthodoxy Romans and barbarians interacted in a multitude of ways and it was not just barbarians who experienced ethnogenesis or cultural assimilation The same Romans who disparaged barbarian behavior also adopted aspects of it in their everyday lives providing graphic examples of the ambiguity and negotiation that characterized the integration of Romans and barbarians a process that altered the concepts of identity of both populations The resultant late antique polyethnic cultural world with cultural frontiers between Romans and barbarians that became increasingly permeable in both directions does much to help explain how the barbarian settlement of the west was accomplished with much less disruption than there might have been and how barbarian populations were integrated seamlessly into the old Roman world

Why America Is Not a New Rome Vaclav Smil, 2010-01-29 An investigation of the America Rome analogy that goes deeper than the facile comparisons made on talk shows and in glossy magazine articles America's post Cold War strategic dominance and its pre recession affluence inspired pundits to make celebratory comparisons to ancient Rome at its most powerful Now with America no longer perceived as invulnerable engaged in protracted fighting in Iraq and Afghanistan and suffering the worst economic downturn since the Great Depression comparisons are to the bloated decadent ineffectual later Empire In *Why America Is Not a New Rome* Vaclav Smil looks at these comparisons in detail going deeper than the facile analogy making of talk shows and glossy magazine articles He finds profound differences Smil a scientist and a lifelong student of Roman history focuses on several fundamental concerns the very meaning of empire the actual extent and nature of Roman and American power the role of knowledge and innovation and demographic and economic basics population dynamics illness death wealth and misery America is not a latter day Rome Smil finds and we need to understand this in order to look ahead without the burden of counterproductive analogies Superficial similarities do not imply long term political demographic or economic outcomes identical to Rome's

The Huns, Rome and the Birth of Europe Hyun Jin Kim, 2013-04-18 The Huns have often been treated as primitive barbarians with no advanced political organisation Their place of origin was the so called backward steppe It has been argued that whatever political organisation they achieved they owed to the civilizing influence of the Germanic peoples they encountered as they moved west This book argues that the steppes of Inner Asia were far from backward and that the image of the primitive Huns is vastly misleading They already

possessed a highly sophisticated political culture while still in Inner Asia and far from being passive recipients of advanced culture from the West they passed on important elements of Central Eurasian culture to early medieval Europe which they helped create Their expansion also marked the beginning of a millennium of virtual monopoly of world power by empires originating in the steppes of Inner Asia The rise of the Hunnic Empire was truly a geopolitical revolution *Roman Empire Decline* Amelia Khatri, AI, 2025-01-30 *Roman Empire Decline* offers a compelling examination of history's most powerful empire's dissolution methodically analyzing the complex factors that led to Rome's fall in 476 CE The book uniquely weaves together three critical elements political instability during the Crisis of the Third Century severe economic deterioration and mounting external pressures from Germanic tribes and Persian forces Through a careful examination of archaeological evidence and contemporary accounts including writings from historians Tacitus and Ammianus Marcellinus the text reveals how these forces worked in concert to undermine the empire's foundations The narrative progresses chronologically from the Severan dynasty through the deposition of Romulus Augustulus with particular focus on the tumultuous third through fifth centuries CE During this period the empire witnessed unprecedented challenges including the reign of 26 different emperors in just 49 years widespread currency debasement and evolving relationships with neighboring peoples Rather than presenting a simplified fall from grace narrative the book offers a nuanced analysis of how complex diplomatic relationships military engagements and cultural exchanges shaped the empire's trajectory Drawing parallels between ancient Rome and modern nation states the book presents fresh perspectives on long debated topics while maintaining scholarly rigor and accessibility It challenges readers to consider broader patterns in state governance and economic systems making the material relevant to contemporary discussions of political and economic sustainability The analysis incorporates recent archaeological findings from across Europe and the Mediterranean providing new insights into this pivotal period of world history **Classics Transformed in Jewish, Israeli, and Palestinian Receptions**, 2025-02-19 *Classics Transformed in Jewish Israeli and Palestinian Receptions* invites the reader to view classical antiquity through the writings of poets translators and scholars emerging from modern Jewish diasporas Mandatory Palestine and the State of Israel who engaged with Greek and Roman literary precedents Whereas these voices have up to now been mostly studied independently of one another as separate fields of research this volume brings some of these distinct voices who nevertheless share a connection to Greco Roman antiquity into conversation with one another Taking its cue from the crisis of humanism following the Holocaust the chapters take as their themes the destruction of home displacement and different forms of wandering and homecomings drawing connections to acts of translation and transmission of the classics to form a picture of cultural and textual states of alterity The volume shows that Jewish Israeli and Palestinian responses to the classics are entangled and even complementary despite their different trajectories The chapters included here focus particularly on critical moments in Jewish and Palestinian existence when the reception of classical humanism is closely linked to issues of survival On offer here

is a historically grounded investigation into the ways Jews Israelis and Palestinians have used classical antiquity and classical philology to validate their identity in a rapidly changing society *Transformations of Late Antiquity* Manolis

Papoutsakis,2016-12-05 This book focuses on a simple dynamic the taking in hand of a heritage the variety of changes induced within it and the handing on of that legacy to new generations Our contributors suggest from different standpoints that this dynamic represented the essence of late antiquity As Roman society and the societies by which it was immediately bounded continued to develop through to the late sixth and early seventh centuries the interplay between what needed to be treasured and what needed to be explored became increasingly self conscious versatile and enriched By the time formerly alien peoples had established their post classical polities and Islam began to stir in the East the novelties were more clearly seen if not always welcomed and one witnesses a stronger will to maintain the momentum of change of a forward reach At the same time those in a position to play now the role of heirs were well able to appreciate how suited to their needs the Roman past might be but how by taking it up in their turn they were more securely defined and yet more creatively advantaged Transformation is a notion apposite to essays in honour of Peter Brown The transformation of the classical heritage is a theme to which he has devoted and continues to devote much energy All the essays here in some way explore this notion of transformation the late antique ability to turn the past to new uses and to set its wealth of principle and insight to work in new settings To begin there is the very notion of what it meant to be Roman and how that notion changed Subsequent chapters suggest ways in which fundamental characteristics of Roman society were given new form not least under the impact of a Christian polity Augustine naturally finds his place and here the emphasis is on the unfettered stance that he took in the face of more broadly held convictions on miracles for example and the errors of the pagan past The discussion then moves on to **Collapse and Transformation** Guy D. Middleton,2020-04-09 The years c 1250 to 1150 BC

in Greece and the Aegean are often characterised as a time of crisis and collapse A critical period in the long history of the region and its people and culture they witnessed the end of the Mycenaean kingdoms with their palaces and Linear B records and through the Postpalatial period the transition into the Early Iron Age But on closer examination it has become increasingly clear that the period as a whole across the region defies simple characterisation there was success and splendour resilience and continuity and novelty and innovation actively driven by the people of these lands through this transformative century The story of the Aegean at this time has frequently been incorporated into narratives focused on the wider eastern Mediterranean and most infamously the Sea Peoples of the Egyptian texts In twenty five chapters written by 25 specialists Collapse and Transformation instead offers a tight focus on the Aegean itself providing an up to date picture of the archaeology before and after the collapse of c 1200 BC It will be essential reading for students and scholars of the Aegean and eastern Mediterranean regions as well as providing data and a range of interpretations to those studying collapse and resilience more widely and engaging in comparative studies Introductory chapters discuss notions of collapse

and provide overviews of the Minoan and Mycenaean collapses These are followed by twelve chapters which review the evidence from the major regions of the Aegean including the Argolid Messenia and Boeotia Crete and the Aegean islands Six chapters then address key themes the economy funerary practices the Mycenaean pottery of the mainland and the wider Aegean and eastern Mediterranean region religion and the extent to which later Greek myth can be drawn upon as evidence or taken to reflect any historical reality The final four chapters provide a wider context for the Aegean story surveying the eastern Mediterranean including Cyprus and the Levant and the themes of subsistence and warfare The New Cambridge Medieval History: Volume 1, C.500-c.700 Paul Fouracre, Rosamond McKitterick, David Abulafia, 1995 Sample Text

Balance Glenn Hubbard, Tim Kane, 2013-05-21 In this groundbreaking book two economists explain why economic imbalances cause civil collapse and why America could be next From the Ming Dynasty to Ottoman Turkey to Imperial Spain the Great Powers of the world emerged as the greatest economic political and military forces of their time only to collapse into rubble and memory What is at the root of their demise and how can America stop this pattern from happening again A quarter century after Paul Kennedy's Rise and Fall of the Great Powers Glenn Hubbard and Tim Kane present a bold sweeping account of why powerful nations and civilizations break down under the heavy burden of economic imbalance Introducing a profound new measure of economic power Balance traces the triumphs and mistakes of imperial Britain the paradox of superstate California the long collapse of Rome and the limits of the Japanese model of growth Most importantly Hubbard and Kane compare the twenty first century United States to the empires of old and challenge Americans to address the real problems of our country's dysfunctional fiscal imbalance Without a new economics and politics of balance they show the inevitable demise ahead *The Roman Empire Divided* John Moorhead, 2013-11-26 In 400 the mighty Roman Empire was almost as large as it had ever been within three centuries advances by Germanic peoples in western Europe Slavs in eastern Europe and Arabs around the eastern and southern shores of the Mediterranean had brought about the loss of most of its territory Ranging from Britain to Mesopotamia this book explores the changes that resulted from these movements It shows the different paths away from the classical past that were taken and how the relatively unified civilization of the ancient Mediterranean gave place to the very different civilizations that cluster around the sea today This comprehensive and authoritative second edition has been thoroughly revised and updated line by line and contains several new sections dealing for instance with the new evidence provided by recent finds like the Staffordshire Treasure and the widespread effects of the plague As well as a completely new bibliographical essay The Roman Empire Divided now also includes six maps and an expanded selection of illustrations fully integrated in the text *The Cambridge Companion to the Age of Attila* Michael Maas, 2014-09-29 This book examines the age of Attila roughly the fifth century CE an era in which western Eurasia experienced significant geopolitical and cultural changes The Roman Empire collapsed in western Europe replaced by new barbarian kingdoms but it continued in Christian Byzantine guise in the eastern Mediterranean New states and peoples

changed the face of northern Europe while in Iran the Sasanian Empire developed new theories of power and government At the same time the great Eurasian steppe became a permanent presence in the European world This book treats Attila the notorious king of the Huns as both an agent of change and a symbol of the wreck of the old world order *Barbarian Migrations and the Roman West, 376-568* Guy Halsall,2007-12-20 This is a major survey of the barbarian migrations and their role in the fall of the Roman Empire and the creation of early medieval Europe one of the key events in European history Unlike previous studies it integrates historical and archaeological evidence and discusses Britain Ireland mainland Europe and North Africa demonstrating that the Roman Empire and its neighbours were inextricably linked A narrative account of the turbulent fifth and early sixth centuries is followed by a description of society and politics during the migration period and an analysis of the mechanisms of settlement and the changes of identity Guy Halsall reveals that the creation and maintenance of kingdoms and empires was impossible without the active involvement of people in the communities of Europe and North Africa He concludes that contrary to most opinions the fall of the Roman Empire produced the barbarian migrations not vice versa *Understanding Collapse* Guy D. Middleton,2017-06-26 Understanding Collapse explores the collapse of ancient civilisations such as the Roman Empire the Maya and Easter Island In this lively survey Guy D Middleton critically examines our ideas about collapse how we explain it and how we have constructed potentially misleading myths around collapses showing how and why collapse of societies was a much more complex phenomenon than is often admitted Rather than positing a single explanatory model of collapse economic social or environmental Middleton gives full consideration to the overlooked resilience in communities of ancient peoples and the choices that they made He offers a fresh interpretation of collapse that will be accessible to both students and scholars The book is an engaging introductory level survey of collapse in the archaeology history literature which will be ideal for use in courses on the collapse of civilizations sustainability and climate change It includes up to date case studies of famous and less well known examples of collapses and is illustrated with 25 black and white illustrations 3 line drawings 16 tables and 18 maps
