End Users Focus 1 E:

End-User Computing: Concepts, Methodologies, Tools, and Applications Clarke, Steve, 2008-02-28 Covers the important concepts methodologies technologies applications social issues and emerging trends in this field Provides researchers managers and other professionals with the knowledge and tools they need to properly understand the role of end user computing in the modern organization

Local and Metropolitan Communication Systems Toshiharu Hasegawa, Yukata Takahashi, Guy Pujolle, Hideaki Takagi, 2013-03-19 We are witnessing an ever increasing thrust toward the era of multimedia information networks largely spurred by the U S Government s proposal for the National Information Infrastructure in the fall of 1993 While more people are subscribing to the services of narrowband ISDN the implementation of broadband ISDN by means of Asynchronous Transfer Mode ATM has accelerated since the formation of the ATM Forum in 1993 In the meantime frame relay may prevail for inter LAN connections In the upper layer of the network commercial use of Internet is rapidly emerging To ensure the successful development of technology it is vital to use a judicious approach in assessing the architecture and performance of the systems that implement the technology It is this spirit that underlies the present conference which is intended to provide an international forum for the presentation of recent research results in the area of local and metropolitan communication systems This conference has two sets of predecessors It is the third in a series of international conferences on Local and Metropolitan Communication Systems LAN the first was held in Toulouse in 1986 and the second in Palma de Mallorca in 1991 It is also the fourth in a triennial series organized by Kyoto University and others on the performance of communication related systems the previous ones were held in Tokyo 1985 and Kyoto 1988 1991

SEC Docket United States. Securities and Exchange Commission, 2013

Encyclopedia of Library and Information Sciences John D. McDonald, Michael Levine-Clark, 2017-03-15 The Encyclopedia of Library and Information Sciences comprising of seven volumes now in its fourth edition compiles the contributions of major researchers and practitioners and explores the cultural institutions of more than 30 countries This major reference presents over 550 entries extensively reviewed for accuracy in seven print volumes or online The new fourth edition which includes 55 new entire entries and 60 revised entries continues to reflect the growing convergence among the disciplines that influence information and the cultural record with coverage of the latest topics as well as classic articles of historical and theoretical importance

Grid Computing: Software Environments and Tools Omer F. Rana, Jose Cardoso Cunha, 2007-07-03 Grid Computing requires the use of software that can divide and farm out pieces of a program to as many as several thousand computers This book explores processes and techniques needed to create a successful Grid infrastructure Leading researchers in Europe and the US look at the development of specialist tools and environments which will encourage the convergence of the parallel programming distributed computing and data management communities Specific topics covered include An overview of structural and behavioural properties of Computer Grid applications Discussion of alternative programming techniques Case studies

displaying the potential of Computer Grids in solving real problems This book is unique in its outline of the needs of Computational Grids both in integration of high end resources using OGSA Globus and the loose integration of Peer 2 Peer Entropia United Devices Readers will gain an insight on the limitations of existing approaches as well as the standardisation activities currently taking place Positioning Central Bank Digital Currency in the Payments Landscape Manisha Patel,Safari Kasiyanto,Andre Reslow,2024-10-02 The IMF is frequently approached by central banks seeking guidance on the balance between central bank digital currency CBDC fast payment systems FPS and electronic money e money solutions Common questions arising include Do central banks need a CBDC when already equipped with other well established digital payments systems For central banks with less developed solutions Should central banks establish one system over the other This discussion is then compounded by the reality of constrained resources This note focuses on the comparison of retail CBDC that is the presence of digital central bank money available to the general public with FPS and e money systems from a payments perspective and how CBDC may support a jurisdiction s vision on payments in the digital age The note does not seek to advocate for CBDC over an FPS or e money The balance of arguments for any one system may change over time and the choice may not be mutually exclusive in many jurisdictions In the future it is possible to envisage the coexistence of an FPS e money and CBDC in many payment landscapes across the world Through good design all three systems could meet central bank objectives such as payments efficiency and supporting financial inclusion some benefits are unique to CBDC such as maintaining access to central bank money in an increasingly digitalized age While central banks will make choices unique to their circumstances it remains important for central banks to establish a strategy that allows them at minimum to monitor trends and core benefits of multiple solutions as developments occur to allow them to plan adapt and drive developments in their payments landscape Human Interface and the Management of Information. Designing Information Environments Michael J. Smith,Gavriel Salvendy,2009-07-14 The 13th International Conference on Human Computer Interaction HCI Inter tional 2009 was held in San Diego California USA July 19 24 2009 jointly with the Symposium on Human Interface Japan 2009 the 8th International Conference on Engineering Psychology and Cognitive Ergonomics the 5th International Conference on Universal Access in Human Computer Interaction the Third International Conf ence on Virtual and Mixed Reality the Third International Conference on Internati alization Design and Global Development the Third International Conference on Online Communities and Social Computing the 5th International Conference on Augmented Cognition the Second International Conference on Digital Human Mod ing and the First International Conference on Human Centered Design A total of 4 348 individuals from academia research institutes industry and gove mental agencies from 73 countries submitted contributions and 1 425 papers that were judged to be of high scientific quality were included in the program These papers dress the latest research and development efforts and highlight the human aspects of the design and use of computing systems The papers accepted for presentation thoroughly cover the entire field of human computer

interaction addressing major advances in knowledge and effective use of computers in a variety of application areas
