Routledge Handbook of Minorities in the Middle East Paul S Rowe, 2018-09-20 The Routledge Handbook of Minorities in the Middle East gathers a diverse team of international scholars each of whom provides unique expertise into the status and prospects of minority populations in the region The dramatic events of the past decade from the Arab Spring protests to the rise of the Islamic state have brought the status of these populations onto centre stage The overturn of various long term autocratic governments in states such as Tunisia Egypt Libya and Yemen and the ongoing threat to government stability in Syria Iraq and Lebanon have all contributed to a new assertion of majoritarian politics amid demands for democratization and regime change In the midst of the dramatic changes and latent armed conflict minority populations have been targeted marginalized and victimized Calls for social and political change have led many to contemplate the ways in which citizenship and governance may be changed to accommodate minorities or indeed if such change is possible At a time when the survival of minority populations and the utility of the label minority has been challenged this handbook answers the following set of research questions What are the unique challenges of minority populations in the Middle East How do minority populations integrate into their host societies both as a function of their own internal choices and as a response to majoritarian consensus on their status Finally given their inherent challenges and the vast sweeping changes that have taken place in the region over the past decade what is the future of these minority populations What impact have minority populations had on their societies and to what extent will they remain prominent actors in their respective settings This handbook presents leading edge research on a wide variety of religious ethnic and other minority populations By reclaiming the notion of minorities in Middle Eastern settings we seek to highlight the agency of minority communities in defining their past present and future

Genocide of Indigenous Peoples Robert Hitchcock, 2017-09-08 An estimated 350 to 600 million indigenous people reside across the globe. Numerous governments fail to recognize its indigenous peoples living within their borders. It was not until the latter part of the twentieth century that the genocide of indigenous peoples became a major focus of human rights activists, non-governmental organizations, international development and finance institutions such as the United Nations and the World Bank, and indigenous and other community based organizations. Scholars and activists began paying greater attention to the struggles between Fourth World peoples and First Second and Third World states because of illegal actions of nation states against indigenous peoples, indigenous groups' passive and active resistance to top down development, and concerns about the impacts of transnational forces including what is now known as globalization. This volume offers a clear message for genocide scholars and others concerned with crimes against humanity and genocide: much greater attention must be paid to the plight of all peoples indigenous and otherwise, no matter how small in scale, how little known, how invisible or hidden from view.

Sudan's Nuba Mountains People Under Siege Samuel Totten, 2017-06-08 This collection of first person accounts chronicles the experiences of 12 humanitarians who entered Sudan illegally to variously provide food, medical care, and spiritual support to the besieged people of the Nuba Mountains. A diverse group of men and women of various ages, professions, and religious beliefs, the chroniclers describe in detail the tragedies of the current war in the state of South Kordofan, their own close calls with death, and why they are committed to helping a little known group of people, Nuba civilians. As the United Nations, the African Union, and all nongovernmental organizations are forbidden from crossing the border.

Human Rights and Diversity David P. Forsythe, Patrice C. McMahon, 2003-01-01 The development and study of human rights have increased significantly over time and have seen an intensified interest at the dawn of the twenty first century. Much can be learned about the status of universal human rights by approaching the subject from regional perspectives. These diverse vantage points shed new light on the importance and complexity of the issues. David P. Forsythe and Patrice C. McMahon have brought together a collection of essays from top scholars in their fields. Each essay examines how a region, as defined by geography or culture, affects the standards and practice of human rights in a particular area. The issues discussed include human rights and child labor in South Asia, women's rights in Muslim states, the prospects and challenges of human rights in the Middle East, the role of women and tradition in Africa, and accommodating diversity in Europe. The collection also includes essays commenting on the parameters and intersections of international human rights in relation to area studies.
