The Cultural Contradictions of Progressive Politics Donald L. Rosdil, 2012-09-10 Why do some U S cities like Seattle and Boston impose social exactions and sustainability targets on private investment while others like Las Vegas and Houston offer property tax and fee remissions to business tolerate environmentally hazardous activities such as oil drilling and express skepticism even about recycling mandates The behavior of the former cities appears especially puzzling in view of globalization processes that seemingly offer many more options to mobile capital and expose cities vulnerability to private investment decisions Cultural Contradictions examines the paradoxical finding that some U S cities can impose burdensome regulations and extract social and environmental contributions from the private sector despite an apparently weak bargaining position It uses cultural change and the growth of non traditional subcultures to explain why cities adopt these

progressive policies Responding to the urban policy literature's tendency to prioritize economic considerations over other kinds of causal factors the book demonstrates the joint impact of culture and economics in encouraging policy outcomes which emphasize social justice human rights and environmental sustainability in large U S cities The book makes several specific contributions to urban literature First it argues that cities in which nontraditional cultural beliefs and practices thrive and which are strongly linked to dynamic economic sectors such as information services professional scientific and technical services financial services and education and health care services are especially likely to adopt progressive policies It establishes this claim using both statistical analysis of large N city samples and a closer investigation of four case studies Second it reveals how progressive policies are a plausible response to psychological concerns associated with unconventional ways of life and the nature of postindustrial society Finally the book indicates how these new ways of life and postindustrial economic sectors grow in mutually reinforcing ways in order to make these policies acceptable to local economic elites and therefore favorable to the city's future development

Islamic Empires Justin Marozzi, 2019-08-29 Outstanding illuminating compelling a riveting read. Peter Frankopan Sunday Times. Islamic civilization was once the envy of the world. From a succession of glittering cosmopolitan capitals Islamic empires lorded it over the Middle East, North Africa, Central Asia and swathes of the Indian subcontinent. For centuries the caliphate was both ascendant on the battlefield and triumphant in the battle of ideas; its cities unrivalled powerhouses of artistic grandeur, commercial power, spiritual sanctity and forward looking thinking. **Islamic Empires** is a history of this rich and diverse civilization told through its greatest cities over fifteen centuries from the beginnings of Islam in Mecca in the seventh century to the astonishing rise of Doha in the twenty first. It dwells on the most remarkable dynasties ever to lead the Muslim world: the Abbasids of Baghdad, the Umayyads of Damascus and Cordoba, the Merinids of Fez, the Ottomans of Istanbul, the Mughals of India and the Safavids of Isfahan and some of the most charismatic leaders in Muslim history from Saladin in Cairo and mighty Tamerlane of Samarkand to the poet prince Babur in his mountain kingdom of Kabul and the irrepressible Maktoum dynasty of Dubai. It focuses on these fifteen cities at some of the defining moments in Islamic history from the Prophet Mohammed receiving his divine revelations in Mecca and the First Crusade of 1099 to the conquest of Constantinople in 1453 and the phenomenal creation of the merchant republic of Beirut in the nineteenth century.

Dennett, 2006-02-02 The New York Times bestseller a crystal clear constantly engaging Jared Diamond exploration of the role that religious belief plays in our lives and our interactions For all the thousands of books that have been written about religion few until this one have attempted to examine it scientifically to ask why and how it has shaped so many lives so strongly Is religion a product of blind evolutionary instinct or rational choice Is it truly the best way to live a moral life Ranging through biology history and psychology Daniel C Dennett charts religion's evolution from wild folk belief to domesticated dogma Not an antireligious screed but an unblinking look beneath the veil of orthodoxy *Breaking the Spell* will be read and debated by believers and skeptics alike *Bedouin, Settlers, and Holiday-Makers* Donald P. Cole, Soraya Altorki, 1998-09-01 The arid regions impose strict limits upon human existence and activity And yet by respecting those limits the flourishing and stable culture of these regions has for centuries been sustained In the late twentieth century however forces such as modernization globalization and the politics and economics of nations became so great that major changes in the old ways had to take place for the sake of survival Egypt's northwest coast where meager coastal rains have supported a sparse but thriving population of Bedouin saw the arrival of settlers from the Nile Valley accustomed to a very different way of life and production and hordes of tourists whose empty silent structures effectively turned the most productive strip of the coastal range into an artificial desert This study documents the great accommodations that took place to ensure the arid rangelands of the northwest coast continue to be viable for the demands of human existence imposed on them A main thesis of this study the authors write is that change in the northwest coast of Egypt has strong parallels in other arid regions of the wider Arab world and specific comparisons are made to change underway elsewhere especially regarding the transformation of Arab nomadic pastoralist production to a new form of ranching and the related changes of sedentarization and the monetization of most aspects of livelihood
