## **Ending The Cycle Of Violence Community Responses To Children Of Battered Women:**

*Ending the Cycle of Violence* Einat Peled, Peter G. Jaffe, Jeffery L. Edleson, 1994-09-16 Canadian and American contributors to this book describe a wide range of programs offered to deal with the direct and indirect victims of men who batter. These include individual treatment options for children who witness the violence, parenting programs for men who batter, and prevention programs targeting high school students. For those involved in providing family services, the book is guaranteed to be both informative and thought provoking. John Hunsley in *The Canadian Family Psychologist* There is a great deal to reflect upon in every section of the book. The chapters on assessment of children exposed to family violence and on providing individual and group therapy for children of abused women take up some very important issues. This book is to be highly commended for its unequivocal espousal of the tenet that a child who witnesses the abuse of his or her mother is an abused child. Chris Goddard in *Child Abuse Review* This is an invaluable collection of papers that both raises awareness regarding the growing body of research that indicates the negative psychological effects domestic violence has on children even if they themselves are not the target of the violence as well as offering practical suggestions for clinicians. It is a useful resource book for anyone working with the issue of family violence. G. Smith in *European Child Adolescent Psychiatry* Although there is a growing body of research on children of battered women, there has been little practical information available on intervention with these children. *Ending the Cycle of Violence* is the first volume to cover the varied and complex arena of intervention with children of battered women. It provides an overview of current practices including strategies and program models. The expert contributors present a concise and accessible look into four major areas: living in a violent culture, shelters and domestic violence, counseling, child protection services, and the criminal justice system, and prevention and education in schools and communities. Practitioners who work with battered women and their children, shelter and domestic violence program staff, battered women's advocates and counselors will find this book most useful. It will also be helpful to all professionals working with children in schools, child protective services, youth programs, health and mental health agencies, institutions, group homes, and foster care settings. *Ending the Cycle of Violence* also provides an overview of innovations in this field that can enhance policymakers' ability to further develop services for this at-risk population.

*Ending the Cycle of Violence* Einat Peled, 1995 This work covers the complex issues involved in intervention with children of battered women and provides an overview of current practice including strategies and program models. *Children and Interparental Violence* B. B. Robbie Rossman, Honore M. Hughes, Mindy S. Rosenberg, 2013-06-17 The past decade has seen a burgeoning of research and conceptualization on the implications of parental violence exposure on children's development and well-being. Meanwhile, seemingly daily accounts of violent tragedies committed by our youth bring to our attention the urgency of conveying this information. With these ideas in mind, *Children and Interparental Violence* focuses on children's exposure to violence between their caretakers and the subsequent effects on child development. To this end, the authors

review current theories research and treatment strategies of the 1990s paying specific attention to families ethnic backgrounds parents sexual orientation and forensic and legal issues all factors affecting the nature and severity of impact Prevention and intervention models including great detail on risk and protective factors techniques and programs are discussed as well as research evaluating their usefulness Keeping in mind the goal of integrating practice and policy with current violence and developmental research and theory numerous case examples take the reader from the lab and classroom into the session room and courtroom

**Family Violence** Robert L. Hampton, 1999-01-01 The first edition of this book was also the first volume in the *Issues in Children's and Families Lives* book series. Like the others in the series, this volume is devoted to issues affecting children and their families. The decision to devote the first volume to family violence was made because it was recognized that violence remains one of the major factors undermining the quality of family life, especially for women and children. It can be acknowledged that there has been some progress in the areas of social policy and clinical practice, and yet the number of individuals and families affected by violence is still at an alarming level. The chapters in this second edition testify to the ongoing expansion of knowledge in the field of family and intimate violence. They attempt to summarize some of the best of current scholarship conducted by family violence researchers. Several chapters address issues of prevention, treatment, and intervention services. The contributors are all leaders in the field and reflect a variety of disciplines and different approaches. The diverse perspectives brought to bear on

the subject by professionals from a range of disciplines add to the richness of this volume      Domestic Violence Margi Laird McCue, 2007-12-19 This thoroughly revised second edition is an examination of domestic violence from social legal and historical perspectives Domestic Violence A Reference Handbook provides straightforward and objective coverage that considers all aspects of the issue through a careful combination of facts statistics case studies and victims stories This volume in ABC CLIO s Contemporary World Issues series examines the causes and historical roots of domestic violence providing the facts and analyses to foster a better understanding The work analyzes the complex dynamics of domestic violence from three perspectives legal social and psychological This reference is an important source of information for those touched by domestic violence and for those seeking to understand it      **Cruel But Not Unusual** Cathy Vine, Ramona Alaggia, 2006-04-21 Violence in families and intimate relationships affects a significant proportion of the population from very young children to the elderly Although no one is immune to violence some groups are particularly vulnerable Cruel but Not Unusual Violence in Canadian Families is the first book to offer a national survey of the latest research and practice and it reflects on the patriarchal roots and societal conditions in Canada that have led to the long standing abuse of women and children While feminist theories provide an overarching framework a broad range of approaches is offered to examine and respond to critical aspects of this serious social problem Topics include systemic oppression of Aboriginal families and communities violence in a francophone minority context child corporal punishment abuse in the lives of people with disabilities the objectification of older adults mother blaming intimate violence in same sex relationships and new approaches to solving the problem of violence in Canadian families      *Preventing Child Abuse and Improving Responses to Families in Crisis* United States. The book aims to explore the exciting opportunities offered by a systemic approach for mental health professionals and psychotherapists when working with families and other systems where domestic violence in intimate relationships is of concern. The main purpose of the book lies in the application of systemic thinking to safety and to understanding the complexity of domestic violence on family relationships over time. The authors outline their approach to these complex issues based on their eight years of joint experience in the Reading Safer Families project. They draw from a broad field of family psychology and systemic psychotherapy to distill the theories, methods, and techniques most helpful to practitioners working in modern public and voluntary agencies. Their systemic approach to issues of risk, responsibility, and collaboration provides a coherent framework within which to integrate practice. The book also provides a practice-oriented and detailed approach to risk assessment, risk management, and family reunification. This book will be of interest to practitioners in clinical and educational psychology, social work, nursing, psychiatry, probation, health visiting, counselling, and psychotherapy who work with individuals living in intimate relationships where violence may be of concern, and also to practice supervisors, trainers, trainees, and students in these disciplines. *The Battered Woman Syndrome, Fourth Edition* Lenore E.
