Ending The Terror:

Turning Points in Ending the Cold War Kiron K. Skinner, 2013-09-01 The expert contributors examine the end of détente and the beginning of the new phase of the cold war in the early 1980s Reagan's radical new strategies aimed at changing Soviet behavior the peaceful democratic revolutions in Poland and Hungary the events that brought about the reunification of Germany the role of events in Third World countries the critical contributions of Gorbachev and Yeltsin and more **Ending the Fossil Fuel Era** Thomas Princen, Jack P. Manno, Pamela L. Martin, 2015-05-15 A provocative call for delegitimizing fossil fuels rather than accommodating them accompanied by case studies from Ecuador to Appalachia and from Germany to Norway Not so long ago people North and South had little reason to believe that wealth from oil gas and coal brought anything but great prosperity But the presumption of net benefits from fossil fuels is eroding as widening circles of people rich and poor experience the downside A positive transition to a post fossil fuel era cannot wait for global agreement a swap in of renewables a miracle technology a carbon market or lifestyle change This book shows that it is now possible to take the first step toward the post fossil fuel era by resisting the slow violence of extreme extraction and combustion exiting the industry and imagining a good life after fossil fuels It shows how an environmental politics of transition might occur arguing for going to the source rather than managing byproducts for delegitimizing fossil fuels rather than accommodating them for engaging a politics of deliberately choosing a post fossil fuel world Six case studies reveal how individuals groups communities and an entire country have taken first steps out of the fossil fuel era with experiments that range from leaving oil under the Amazon to ending mountaintop removal in Appalachia *The Oxford Handbook of the French Revolution* David Andress, 2015 The Oxford Handbook of the French Revolution brings together a sweeping range of expert and innovative contributions to offer engaging and thought provoking insights into the history and historiography of this epochal event Each chapter presents the foremost summations of academic thinking on key topics along with stimulating and provocative interpretations and suggestions for future research directions Placing core dimensions of the history of the French Revolution in their transnational and global contexts the contributors demonstrate that revolutionary times demand close analysis of sometimes tiny groups of key political actors whether the king and his ministers or the besieged leaders of the Jacobin republic and attention to the deeply local politics of both rural and urban populations Identities of class gender and ethnicity are interrogated but so too are conceptions and practices linked to citizenship community order security and freedom each in their way just as central to revolutionary experiences and equally amenable to critical analysis and reflection This Handbook covers the structural and political contexts that build up to give new views on the classic question of the origins of revolution the different dimensions of personal and social experience that illuminate the political moment of 1789 itself the goals and dilemmas of the period of constitutional monarchy the processes of destabilisation and ongoing conflict that ended that experiment the key issues surrounding the emergence and experience of terror and the short and long term

legacies for both good and ill of the revolutionary trauma for France and for global politics **Insurgencies** Antonio Negri, Celebrated political prisoner Antonio Negri explores the drama of modern revolutions from Machiavelli's Florence and Harrington's England to the American French and Russian revolutions and puts forward a new notion of how power and action must be understood if we are to achieve a radically democratic future Making Sense of War Amir Weiner, 2012-01-16 In *Making Sense of War* Amir Weiner reconceptualizes the entire historical experience of the Soviet Union from a new perspective that of World War II Breaking with the conventional interpretation that views World War II as a post revolutionary addendum Weiner situates this event at the crux of the development of the Soviet not just the Stalinist system Through a richly detailed look at Soviet society as a whole and at one Ukrainian region in particular the author shows how World War II came to define the ways in which members of the political elite as well as ordinary citizens viewed the world and acted upon their beliefs and ideologies The book explores the creation of the myth of the war against the historiography of modern schemes for social engineering the Holocaust ethnic deportations collaboration and postwar settlements For communist true believers World War II was the purgatory of the revolution the final cleansing of Soviet society of the remaining elusive human weeds who intruded upon socialist harmony and it brought the polity to the brink of communism Those ridden with doubts turned to the war as a redemption for past wrongs of the regime while others hoped it would be the death blow to an evil enterprise For all it was the Armageddon of the Bolshevik Revolution The result of Weiner's inquiry is a bold compelling new picture of a Soviet Union both reinforced and enfeebled by the experience of total war

The Enlightenment that Failed Jonathan I. Israel, 2019-11-28 *The Enlightenment that Failed* explores the growing rift between those Enlightenment trends and initiatives that appealed exclusively to elites and those aspiring to enlighten all of society by raising mankind's awareness freedoms and educational level generally Jonathan I Israel explains why the democratic and radical secularizing tendency of the Western Enlightenment after gaining some notable successes during the revolutionary era 1775 1820 in numerous countries especially in Europe North America and Spanish America ultimately failed He argues that a populist Robespierriest tendency sharply at odds with democratic values and freedom of expression gained an ideological advantage in France and that the negative reaction this generally provoked caused a more general anti Enlightenment reaction a surging anti intellectualism combined with forms of religious revival that largely undermined the longings of the deprived underprivileged and disadvantaged and ended by helping albeit often unwittingly conservative anti Enlightenment ideologies to dominate the scene *The Enlightenment that Failed* relates both the American and the French revolutions to the Enlightenment in a markedly different fashion from how this is usually done showing how both great revolutions were fundamentally split between bitterly opposed and utterly incompatible ideological tendencies Radical Enlightenment which had been an effective ideological challenge to the prevailing monarchical aristocratic status quo was weakened then almost entirely derailed and displaced from the Western consciousness in the 1830s and 1840s by the rise of

Marxism and other forms of socialism *The Family on Trial in Revolutionary France* Suzanne Desan, 2006-06-19 Annotation

The Imperial Nation Josep M. Fradera, 2021-06-08 How the legacy of monarchical empires shaped Britain France Spain and the United States as they became liberal entities Historians view the late eighteenth and early nineteenth centuries as a turning point when imperial monarchies collapsed and modern nations emerged Treating this pivotal moment as a bridge rather than a break The Imperial Nation offers a sweeping examination of four of these modern powers Great Britain France Spain and the United States and asks how after the great revolutionary cycle in Europe and America the history of monarchical empires shaped these new nations Josep Fradera explores this transition paying particular attention to the relations between imperial centers and their sovereign territories and the constant and changing distinctions placed between citizens and subjects Fradera argues that the essential struggle that lasted from the Seven Years War to the twentieth century was over the governance of dispersed and varied peoples each empire tried to ensure domination through subordinate representation or by denying any representation at all The most common approach echoed Napoleon's special laws which allowed France to reinstate slavery in its Caribbean possessions The Spanish and Portuguese constitutions adopted specialness in the 1830s the United States used comparable guidelines to distinguish between states territories and Indian reservations and the British similarly ruled their dominions and colonies In all these empires the mix of indigenous peoples European origin populations slaves and indentured workers immigrants and unassimilated social groups led to unequal and hierarchical political relations Fradera considers not only political and constitutional transformations but also their social underpinnings Presenting a fresh perspective on the ways in which nations descended and evolved from and throughout empires The Imperial Nation highlights the ramifications of this entangled history for the subjects who lived in its shadows

Waiting for the End Earl G. Ingersoll, 2007 Waiting for the End examines two dozen contemporary novels within the context of a half century of theorizing about the function of ending in narrative That theorizing about ending generated a powerful dynamic a quarter century ago with the advent of feminist criticism of masculinist readings of the role played by ending in fiction Feminists such as Theresa de Lauretis in 1984 and more famously Susan Winnett in her 1991 PMLA essay Coming Unstrung were leading voices in a swelling chorus of theorist pointing out the masculinist bias of ending in narrative With the entry of feminist readings of ending it became inevitable that criticism of fiction would become gendered through the recognition of difference transcending a simple binary of female male to establish a spectrum of masculine to feminine endings regardless of the sex of the writer Accordingly Waiting for the End examines pairs of novels one pair by Margaret Atwood and one by Ian McEwan to demonstrate how a writer can offer endings at either end of the gender spectrum

The Citizenship Experiment René Koekkoek, 2020-01-23 The Citizenship Experiment explores the fate of citizenship ideals in the Age of Revolutions While in the early 1790s citizenship ideals in the Atlantic world converged the twin shocks of the Haitian Revolution and the French Revolutionary Terror led the American French and Dutch publics to abandon the notion of a shared Atlantic revolutionary vision of citizenship Instead they forged conceptions of citizenship that

were limited to national contexts restricted categories of voters and advanced stages of civilization Weaving together the convergence and divergence of an Atlantic revolutionary discourse debates on citizenship and the intellectual repercussions of the Terror and the Haitian Revolution Koekkoek offers a fresh perspective on the revolutionary 1790s as a turning point in the history of citizenship

The Will to Arise Caleb Oluremi Oladipo,2006 One of the most important developments of Christianity in the twentieth century was its transformation in South Africa where it became a vibrant religion rooted in African idioms and cultures The church also became engaged in the struggle against social and political injustice and church leaders employed the vocabularies of faith to secure civil liberty This hard hitting book focuses on post apartheid Christian character and establishes the theological and spiritual authority of African Christians calling contemporary Christians to renew their faith and Christian identity It shows too that one cannot seriously consider contemporary Christianity apart from the African experience

The Cambridge History of the Age of Atlantic Revolutions: Volume 2, France, Europe, and Haiti Wim Klooster,2023-11-09 Volume II delves into the revolutions of France Europe and Haiti with particular focus on the French Revolution and the changes it wrought The demarcation between property and power and the changes in family life religious practices and socio economic relations are explored as well as the preoccupation with violence and terror both of which were conspicuous aspects of the revolution Simultaneous movements in England Germany Hungary Ireland Italy and Poland Lithuania are also discussed The volume ends with the Haitian Revolution and its impact on neighboring countries revealing how the revolution was comprised of several smaller revolutions and how once the independent black State of Haiti was established an effort was made to fulfill the promises of freedom and equality

Hubris, Self-Interest, and America's Failed War in Afghanistan Thomas P. Cavanna, 2015-07-22 This book describes the conduct of the US led post 9 11 war in Afghanistan Adopting a long term perspective it argues that even though Washington initially had an opportunity to achieve its security goals and give Afghanistan a chance to enter a new era it compromised any possibility of success from the very moment it let bin Laden escape to Pakistan in December 2001 and found itself locked in a strategic overreach Given the bureaucratic and rhetorical momentum triggered by the war on terror in America the Bush Administration was bound to deploy more resources in Afghanistan sooner or later despite its focus on Iraq The need to satisfy unfulfilled counter terrorism objectives made the US dependent on Afghanistan s warlords which compromised the country s stability and tarnished its new political system The extension of the US military presence made Washington lose its leverage on the Pakistan army leaders who aware of America s logistical dependency on Islamabad supported the Afghan insurgents their historical proxies more and more openly The extension of the war also contributed to radicalize segments of the Afghan and Pakistani populations destabilizing the area further In the meantime the need to justify the extension of its military presence influenced the US led coalition into proclaiming its determination to democratize and reconstruct Afghanistan While highly opportunistic the emergence of these policies proved both self defeating and unsustainable due to an inescapable collision between the US led coalition s inherent self interest hubris limited knowledge limited attention span and limited resources and on the other hand Afghanistan s inherent complexity As the critical contradictions at the very heart of the campaign increased with the extension of the latter s duration scale and cost America s leaders entrapped in path dependence lost their strategic flexibility Despite debates on troops resource allocation and more sophisticated doctrines they repeated the same structural mistakes over and over again The strategic overreach became self sustaining until its costs became intolerable leading to a drawdown which has more to do with a pervasive sense of failure than with the accomplishment of any noble purpose or strategic breakthrough

The Theological Turn in Contemporary Gothic Fiction Simon Marsden, 2018-09-21 This study examines theological themes and resonances in post 1970 Gothic fiction It argues that contemporary Gothic is not simply a secularised genre but rather one that engages creatively and often subversively with theological texts and traditions This creative engagement is reflected in Gothic fiction s exploration of theological concepts including sin and evil Christology and the messianic resurrection eschatology and apocalypse Through readings of fiction by Gothic and horror writers including Stephen King Joyce Carol Oates Peter Straub William Peter Blatty and others this book demonstrates that Christianity continues to haunt the Gothic imagination and that the genre s openness to the mysterious numinous and non rational opens space in which to explore religious beliefs and experiences less easily accessible to more overtly realist forms of representation The book offers a new

perspective on contemporary Gothic fiction that will be of interest to students and scholars of contemporary Gothic and of the relationship between literature and religion more generally **A Critical Dictionary of the French Revolution**
François Furet, Mona Ozouf, 1989 The French Revolution that extraordinary event that founded modern democracy continues to provoke a reevaluation of essential questions This volume presents the research of a wide range of international scholars into those questions 58 color illustrations 10 halftones
