## **Endless Space Frontier A History Of The House Committee On Science And Astronautics 1959 1978:**

The Endless Space Frontier Ken Hechler,1982      **NASA and the Space Industry** Joan Lisa Bromberg,1999-05-04 A timely exploration of the relationships between NASA and the private sector An interesting read Spaceflight Few federal agencies have more extensive ties to the private sector than NASA NASA s relationships with its many aerospace industry suppliers of rocket engines computers electronics gauges valves O rings and other materials have often been described as partnerships These have produced a few memorable catastrophes but mostly technical achievements of the highest order Until now no one has written extensively about them In **NASA and the Space Industry** Joan Lisa Bromberg explores how NASA s relationship with the private sector developed and how it works She outlines the various kinds of expertise public and private sectors brought to the tasks NASA took on describing how this division of labor changed over time She explains why NASA sometimes encouraged and sometimes thwarted the privatization of space projects and describes the agency s role in the rise of such new space industries as launch vehicles and communications satellites      **Frontiers for the American Century** James Spiller,2016-04-29 This book compares the cultural politics of the U S space and Antarctic programs during the Cold War It analyzes how culturally salient terms especially the nationalist motif of the frontier were used to garner public support for these strategic initiatives and more generally United States internationalism during this period      *Journal of the British Interplanetary Society* ,1982      Eyeing the Red Storm Robert M. Dienesch,2016-04 In 1954 the U S Air Force launched an ambitious program known as WS 117L to develop the world s first reconnaissance satellite The goal was to take photographic images from space and relay them back to Earth via radio Because of technical issues and bureaucratic resistance however WS 117L was seriously behind schedule by the time Sputnik orbited Earth in 1957 and was eventually cancelled The air force began concentrating instead on new programs that eventually launched the first successful U S spy satellites Eyeing the Red Storm examines the birth of space based reconnaissance not from the perspective of CORONA the first photo reconnaissance satellite to fly but rather from that of the WS 117L Robert M Dienesch s revised assessment places WS 117L within the larger context of Dwight D Eisenhower s presidency focusing on the dynamic between military and civilian leadership Dienesch demonstrates how WS 117L promised Eisenhower not merely military intelligence but also the capacity to manage national security against the Soviet threat As a fiscal conservative Eisenhower believed a strong economy was the key to surviving the Cold War and saw satellite reconnaissance as a means to understand the Soviet military challenge more clearly and thus keep American defense spending under control Although WS 117L never flew it provided the foundation for all subsequent satellites breaking theoretical barriers and helping to overcome major technical hurdles which ensured the success of America s first working reconnaissance satellites and their photographic missions during the Cold War      *Journal of Space Law* ,1982      *Fallen Astronauts* Colin Burgess,Kate Doolan,Bert Vis,2016 Near the end of the Apollo 15 mission David Scott and fellow moonwalker James Irwin conducted a secret ceremony unsanctioned by

NASA they placed on the lunar soil a small tin figurine called The Fallen Astronaut along with a plaque bearing a list of names By telling the stories of those sixteen astronauts and cosmonauts who died in the quest to reach the moon between 1962 and 1972 this book enriches the saga of humankind s greatest scientific undertaking Project Apollo and conveys the human cost of the space race Many people are aware of the first manned Apollo mission in which Gus Grissom Ed White and Roger Chaffee lost their lives in a fire during a ground test but few know of the other five fallen astronauts whose stories this book tells as well including Ted Freeman and C C Williams who died in the crashes of their T 38 jets the Gemini Twins Charlie Bassett and Elliot See killed when their jet slammed into the building where their Gemini capsule was undergoing final construction and Ed Givens whose fatal car crash has until now been obscured by rumors Supported by extensive interviews and archival material the extraordinary lives and accomplishments of these and other fallen astronauts including eight Russian cosmonauts who lost their lives during training unfold here in intimate and compelling detail Their stories return us to a stirring time in the history of our nation and remind us of the cost of fulfilling our dreams This revised edition includes expanded and revised biographies and additional photographs
