Endogenous Development Networking Innovation Institutions And Cities:

Endogenous Development Antonio Vázquez Barquero, 2002 The beginning of the twenty first century has been characterized by the expansion of economic politics and institutional relations Using international case studies this book illustrates the local answer to the challenge of increasing competition The book introduces the idea of endogenous development identifying the theoretical roots and defining its main features It then goes on to indicate how this concept can be used to understand economic dynamics and to show how the concept is relevant in economic analysis and policy implementation in times of globalization After an introduction discussing globalization and development the book is organized in three parts Part one defines and discusses the concept of endogenous development Part two analyses the processes involved in the mechanics of capital accumulation and local development examining the role of institutions in development processes and the functions of cities in globalization Part three argues that a new generation of development policies is beginning to take shape based on the fact that greater competition and globalization increases spatial diversity and stimulates strategic behaviour This work will be of essential interest to academics and policy makers in planning and development and development economics Endogenous Development Antonio Vazquez Barquero, 2002

Drivers of Innovation, Entrepreneurship and Regional Dynamics Karima Kourtiti, Peter Nijkamp, Roger R. Stough, 2011-06-10 The need for informed and effective insights into key concepts and models of regional development and growth from an endogenous growth perspective has risen over the past decade These recent advances address in particular local and regional assets and characteristics comprising inter alia creativity knowledge innovation forces and entrepreneurship Access to and exploitation of these modern forms of human and social capital are of paramount importance for the dynamic regional economic environment in a city or region This volume offers an overview and critical treatment of the spatial economic roots opportunities and impacts of new growth strategies mainly from an evidence based perspective In the various contributions to this volume relevant findings and strategic options are interpreted and discussed from both an analytical and a policy perspective to help cultivate creativity human capital development and innovation as well as entrepreneurial activity with a view to exploit the drivers of economic development in order to strengthen the competitive edge of cities and regions

The Rise of the Networking Region Are Vegard Haug, 2016-02-17 How regions and cities adapt to a Network Society and a globalized environment the policies they pursue and how structures of governance are transformed in the pursuit of those policies are major themes in this volume These issues are addressed with specific reference to the Nordic regions of Europe Covering the four Nordic countries of Denmark Finland Norway and Sweden plus the Faroe Islands this volume charts the changes in networking activities and related development initiatives that have taken place over the last ten years This means analysing regions in their pursuit of new policies partnerships and styles of representation Through this process regions are becoming partners and players in European integration and a movement of integrative regionalism is taking

shape which is different from inward looking identity regionalism or self centred competitive regionalism and takes regions beyond lobbying in Brussels *Trade Relations Between the EU and Africa* Yenkon Ngangjoh-Hodu, Francis A.S.T.

Matambalya, 2009-10-16 This timely volume advances an alternative set of inter related interdisciplinary perspectives and debates which contribute to overlapping genres and discourses on development economics and trade relations between the EU and Africa **The Global Economic Crisis and the Developing World** Ashwini Deshpande, Keith Nurse, 2012-06-14

The world economy is currently in the throes of a global economic crisis reminiscent of the great depressions of the 1930s and the 1870s As back then the crisis has exposed the major structural imbalances in financial and credit markets in addition to global trade forcing many governments developed and developing to impose debilitating austerity measures that are exacerbating the structural weaknesses that caused the crisis in the first place This volume offers historical insights into the origins of the contemporary crisis as well as detailed analyses of the financial and trade dimensions an assessment of the technological and innovation context along with perspectives on the implications for unemployment and gender imbalances

The Politics of Aid Selectivity Wil Hout, 2007-06-28 The first extended analysis of selectivity policies of important bilateral and multilateral aid donors this book combines a policy analytical with a quantitative empirical approach Bringing out the conflicts that may exist between foreign assistance agendas and the desire of governments in developing countries to set priorities for their national development policies the author describes in detail the policies of aid selectivity adopted by the World Bank the Netherlands and the United States since the end of the 1990s including the underlying assumptions looks at key decisions related to a selection of developing countries compares policy making and different approaches to selectivity in the United Kingdom with those in developing countries Critical and analytical in style this book is among other areas an invaluable resource for students of various sub fields of development studies and policy analysis as well as appealing to researchers and policy makers working in the area of foreign assistance across the globe **Building Businesses in**

Emerging and Developing Countries Elie Virgile Chrysostome, Rick Molz, 2014-04-16 This book focuses on the challenges and opportunities facing companies in emerging and developing countries China and India have become the primary business destination for many global companies that are looking for market opportunities and low costs of production whilst Morocco Dubai Brazil Malaysia and Russia are also being targeted This new edited volume helps develop a better understanding of the realities of doing business in emerging and developing countries in particular exploring the dynamics between corporations both indigenous and multinational and local pressures in developing transitional and emerging economies The book points out the benefits and pitfalls of doing business in emerging and developing countries as well as the adjustments that are necessary for success It also discusses entrepreneurship in emerging and developing countries exploring its new realities from women s entrepreneurship in Muslim countries to social entrepreneurship in developing countries The volume also points out the new challenges for SMEs of emerging and developing countries in a global competitive environment Finally it

analyses corporate governance from a local partner perspective and an institutional perspective Building Businesses in Emerging and Developing Countries will be of interest to business managers students and researchers involved in international entrepreneurship and corporate governance **Disasters and the Networked Economy** J.M.

Albala-Bertrand,2013-05-02 Mainstream quantitative analysis and simulations are fraught with difficulties and are intrinsically unable to deal appropriately with long term macroeconomic effects of disasters In this new book J M Albala Bertrand develops the themes introduced in his past book The Political Economy of Large Natural Disasters Clarendon Press 1993 to show that societal networking and disaster localization constitute part of an essential framework to understand disaster effects and responses The author s last book argued that disasters were a problem of development rather than a problem for development This volume takes the argument forward both in terms of the macroeconomic effects of disaster and development policy arguing that economy and society are not inert objects but living organisms Using a framework based on societal networking and the economic localization of disasters the author shows that societal functionality defined as the capacity of a system to survive reproduce and develop is unlikely to be impaired by natural disasters This book will be of interest to scholars and practitioners involved in disaster analysis and response policy and will also be relevant to students of development economics Microfinance David Hulme,Thankom Arun,2009-01-13 This timely book written by one of the major players in the UK in development economics explores amongst others topics such as microfinance and poverty reduction microinsurance and regulating and supervising microfinance institutions Digital Interactions in Developing Countries Jeffrey James,2013-01-04 Jeffrey James is one of the relatively few academics to have systematically taken on the topic of IT and development In this timely book he undertakes a methodological critique of prominent topics in the debate Challenging the existing literature by international and governmental institutions the book looks not only at the digital divide but also at issues such as digital preparedness leapfrogging and low cost computers James also raises important issues which have been largely neglected in the literature such as the implications for poverty in developing countries and the macroeconomics of mobile phones The book argues that benefits from IT are captured in a different form in developing as opposed to developed countries In the latter gains come from technology ownership and use whereas in the former benefits cannot be captured as much in this way because ownership is more limited Interestingly the author shows that developing countries have responded to this distinction with a series of local innovations which are often low cost and pro poor This finding contradicts the widely held view that poor countries are unable to generate major innovations within their own borders Accessible and clearly written this book will be of great interest to scholars of development economics and development studies and is relevant to both policy makers and academics **The Informal Economy in Developing Countries** Jean-Pierre Cling,Stéphane Lagrée,Mireille Razafindrakoto,François Roubaud,2014-08-21 Informality is ubiquitous in most developing countries Understanding the informal economy is therefore of utmost importance from a

political economic and social point of view Paradoxically despite its economic importance knowledge is extremely limited regarding the informal economy It remains largely unrecognized by researchers is neglected by politicians and is even negatively perceived as it is meant to disappear with development This book aims to amend this situation by presenting recent high level research which studies the informal sector and informal employment Fresh research into this subject is presented through empirical analysis which covers Asia Africa and Latin America Each chapter relies on data and a detailed knowledge of the context of the countries studied in order to question the dominant schools of thought on the origins and causes of informality The results provide interesting insights into the constraints faced by informal workers the dynamics of the informal economy and its link with poverty issues On the basis of the evidences provided by results adequate policies could be defined to address informality issues The principal characteristics of the informal sector testify to some profound similarities between developing countries low qualifications and the precariousness of jobs mediocre incomes and working conditions atomization of production units and lack of articulation with the formal economy etc This general statement does not contradict the observation that there is a high level of heterogeneity in the sector and in informal employment within each country confirmed by several chapters in this work In the absence of a sufficient number of job creations the informal sector essentially constitutes a refuge for workers seeking and is here to stay in the short and medium term even in emerging countries

Microfinance, Debt and Over-Indebtedness Isabelle Guérin, Solène Morvant-Roux, Magdalena

Villarreal, 2013-10-15 Although microcredit programmes have long been considered efficient development tools many forms of debt induced distress have emerged in their wake This has brought to light the problem of over indebtedness a topic which has been previously underexplored in the literature This new book from a group of leading scholars explores the manifestations scale and economic and social implications of household over indebtedness in areas conventionally considered as financially excluded The book approaches debt not only as a financial transaction but also as a form of social bond and offers a socioeconomic analysis of over indebtedness The volume puts forward a broad definition of over indebtedness highlighting its situational and semantic complexity and diversity It provides a close analysis of local conceptions of debt and over indebtedness highlighting frameworks of calculation and the constant renegotiation of their boundaries On top of this it looks far beyond microcredit to examine all the financial practices that individuals juggle The volume argues that over indebtedness has more to do with social inequalities than financial illiteracy and should therefore be understood in the light of global trends of financialization It also reveals the ambiguity of financial inclusion policies and in many respects questions the actions of new credit providers This book will be valuable reading for students researchers and policy makers interested in microfinance and development issues

Migration and Inequality Tanja Bastia, 2013-03-05 The migration development nexus has emerged as an important area of both research and policy over the last ten years However most of the interest has focused on the potential that migration holds for poverty alleviation Relatively little attention has been paid to the

relationship between migration and inequality particularly on inequality as a consequence of migration This is unfortunate given that inequality is emerging as an important area of inquiry within development studies This edited collection explores the relationship between migration and inequality in Africa Asia and Latin America by taking into account economic and social inequalities While the focus on inequality as opposed to poverty is in itself original the book offers additional points of interest First it combines chapters on internal and international migration thereby challenging the current focus in the migration literature that focuses almost exclusively on cross border migration Internal migration greatly outnumbers cross border moves Yet policy makers as well as most studies focus on cross border international migration We are only just beginning to unravel the relationship between internal and cross border migration Second the theme of inequality complements the existing focus in the migration development nexus on issues of poverty Third the chapters focus on both economic and social inequalities often combining an analysis of different types of inequalities The book also covers governance and migrants rights gender and intersectionality and health The chapters in this edited volume make an original contribution to debates on the migration development nexus as well as the literature on inequality which often tends to focus on economic measurements of inequality at the expense of including a thorough analysis of social inequality

Assessing Prospective Trade Policy Oliver Morrissey, 2010-09-30 This volume assesses economic partnership agreements between the EU and Africa the Caribbean and the Pacific focusing on specific concerns such as legal commitments adjustment costs impacts on poverty and food security and regulatory reforms

Towards New Developmentalism Shahrukh Rafi Khan, Jens Christiansen, 2010-10-04 Although neo liberalism has been critiqued from various perspectives these critiques have not coalesced into a concrete alternative in development economics literature The main objective of this book is to name and formulate this alternative identify what is new about this viewpoint and project it on to the academic landscape

Local Versus Global Logic Rick Molz, Catalin Ratiu, Ali Taleb, 2013-06-25 This book focuses on the uneasy interaction between a developing country traditional logic and Multinational Enterprise MNE economic logic offering multidisciplinary perspectives from South America Africa Asia Europe and North America

Europe's Troubled Region William Bartlett, 2007-12-21 The breaking up of Yugoslavia hasn't been an efficient clean process to say the least This book presents a sober comparative analysis of the economic development of the newly formed states since the break up

Law Reform in Developing and Transitional States Timothy Lindsey, 2007 Law reform in developing countries has become an increasingly topical subject in recent years A critical issue is why so many law reform projects in developing economies are regarded by their sponsors and recipients as unsuccessful This informative book examines examples of law reform projects in post socialist and post authoritarian states in Asia identifies common problems proposes analytical frameworks for understanding the problems identified Though parallels between Asian models and those in developing states elsewhere in the world are strong the book has been developed to avoid suggestion that the issues covered are somehow peculiarly Asian indeed it is

shown that cultural relativist approaches to Asia are unsustainable This is an invaluable reference for those involved in the areas of development economics Asian studies and comparative politics *Economic Transitions to Neoliberalism in Middle-Income Countries* Alfredo Saad-Filho, Galip L. Yalman, 2009-12-04 This book argues that neoliberalism is the contemporary form of capitalism focusing on a materialist understanding of its workings as a modality of social and economic reproduction and its everyday practices of dispossession and exploitation
