Warfield, Jr. László Fuchs, 1992 This collection of research papers is dedicated to the memory of the distinguished algebraist Robert B Warfield Jr Focusing on abelian group theory and noncommutative ring theory the book covers a wide range of topics reflecting Warfield's interests and includes two articles surveying his contributions to mathematics Because the articles have been refereed to high standards and will not appear elsewhere this volume is indispensable to any researcher in noncommutative ring theory or abelian group theory With papers by some of the major leaders in the field this book will also be important to anyone

interested in these areas as it provides an overview of current research directions

Formal Matrices Piotr Krylov, Askar Tuganbaev, 2017-03-30 This monograph is a comprehensive account of formal matrices examining homological properties of modules over formal matrix rings and summarising the interplay between Morita contexts and K theory While various special types of formal matrix rings have been studied for a long time from several points of view and appear in various textbooks for instance to examine equivalences of module categories and to illustrate rings with one sided non symmetric properties this particular class of rings has so far not been treated systematically Exploring formal matrix rings of order 2 and introducing the notion of the determinant of a formal matrix over a commutative ring this monograph further covers the Grothendieck and Whitehead groups of rings Graduate students and researchers interested in ring theory module theory and operator algebras will find this book particularly valuable Containing numerous examples Formal Matrices is a largely self contained and accessible introduction to the topic assuming a solid understanding of basic algebra
