$$(1.4.2.1) \quad h: V \xrightarrow{\sim} k[X]/(f_1) \oplus k[X]/(f_2) \oplus \cdots \oplus k[X]/(f_t)$$

such that $h \circ \varphi \circ h^{-1}$ is the multiplication by X in the right hand term of (1.4.2.1). Moreover, the number t and the polynomials f_1, \dots, f_t are uniquely determined by these requirements.

Algebraic Groups and Lie Groups Gus Lehrer, Alan L. Carey, 1997-01-23 This volume contains original research articles by many of the world's leading researchers in algebraic and Lie groups Its inclination is algebraic and geometric although analytical aspects are included The central theme reflects the interests of R W Richardson viz connections between representation theory and the structure and geometry of algebraic groups All workers on algebraic and Lie groups will find that this book contains a wealth of interesting material

The Arcata Conference on Representations of Finite Groups, Part 1 Paul Fong, 1987 The papers in these proceedings of the 1986 Arcata Summer Institute bear witness to the extraordinarily vital and intense research in the representation theory of finite groups The confluence of diverse mathematical disciplines has brought forth work of great scope and depth Particularly striking is the influence of algebraic geometry and cohomology theory in the modular representation theory and the character theory of reductive groups over finite fields and in the general modular representation theory of finite groups The continuing developments in block theory and the general character theory of finite groups is noteworthy The expository and research aspects of the Summer Institute are well represented by these papers

Robert Steinberg Collected Papers Robert Steinberg, 1997 This volume is a collection of papers by Robert Steinberg It contains all of his published papers on group theory including those on special representations now called Steinberg representations tensor products of representations finite reflection groups regular elements of algebraic groups Galois cohomology universal extensions etc At the end of the book there is a section called Comments on the Papers The comments by Steinberg explain how ideas and results have evolved and been used since they first appeared

Invariant Theory in All Characteristics Harold Edward Alexander Eddy Campbell, David L. Wehlau, This volume includes the proceedings of a workshop on Invariant Theory held at Queen's University Ontario The workshop was part of the theme year held under the auspices of the Centre de recherches mathématiques CRM in Montreal The gathering brought together two communities of researchers those working in characteristic 0 and those working in positive characteristic The book contains three types of papers survey articles providing introductions to computational invariant theory modular invariant

Bapat, Manjunatha Prasad Karantha, Stephen J. Kirkland, Samir Kumar Neogy, Sukanta Pati, Simo Puntanen, 2023-07-31 This book focuses on research in linear algebra statistics matrices graphs and their applications Many chapters in the book feature new findings due to applications of matrix and graph methods The book also discusses rediscoveries of the subject by using new methods Dedicated to Prof Calyampudi Radhakrishna Rao C R Rao who has completed 100 years of legendary life and continues to inspire us all and Prof Arbind K Lal who has sadly departed us too early it has contributions from collaborators students colleagues and admirers of Professors Rao and Lal With many chapters on generalized inverses matrix analysis matrices and graphs applied probability and statistics and the history of ancient mathematics this book offers a diverse array of mathematical results techniques and applications The book promises to be especially rewarding for readers with an interest in the focus areas of applied linear algebra probability and statistics *Introduction to Algebraic Independence Theory* Yuri V. Nesterenko, Patrice Philippon, 2003-07-01 In the last five years there has been very significant progress in the development of transcendence theory A new approach to the arithmetic properties of values of modular forms and theta functions was found The solution of the Mahler Manin problem on values of modular function j τ and algebraic independence of numbers π and e^π are most impressive results of this breakthrough The book presents these and other results on algebraic independence of numbers and further a detailed exposition of methods created in last the 25 years during which commutative algebra and algebraic geometry exerted strong catalytic influence on the development of the subject **Lie Theory and Geometry** Jean-Luc Brylinski, Ranee Brylinski, Victor Guillemin, Victor Kac, 2012-12-06 This volume dedicated to Bertram Kostant on the occasion of his 65th birthday is a collection of 22 invited papers by leading mathematicians working in Lie theory geometry algebra and mathematical physics Kostant's fundamental work in all these areas has provided deep new insights and connections and has created new fields of research The papers gathered here present original research articles as well as expository papers broadly reflecting the range of Kostant's work **Representations of Reductive p-adic Groups** Anne-Marie Aubert, Manish Mishra, Alan Roche, Steven Spallone, 2019-04-16 This book consists of survey articles and original research papers in the representation theory of reductive p-adic groups In particular it includes a survey by Anne Marie Aubert on the enormously influential local Langlands conjectures The survey gives a precise and accessible formulation of many aspects of the conjectures highlighting recent refinements due to the author and her collaborators and their current status It also features an extensive account by Colin Bushnell of his work with Henniart on the fine structure of the local Langlands correspondence for general linear groups beginning with a clear overview of Bushnell Kutzko's construction of cuspidal types for such groups The remaining papers touch on a range of topics in this active area of modern

Computation with Linear Algebraic Groups Willem Adriaan de Graaf, 2017-08-07 Designed as a self contained account of a number of key algorithmic problems and their solutions for linear algebraic groups this book combines in one single text both an introduction to the basic theory of linear algebraic groups and a substantial collection of useful algorithms Computation with Linear Algebraic Groups offers an invaluable guide to graduate students and researchers working in algebraic groups computational algebraic geometry and computational group theory as well as those looking for a concise introduction to the theory of linear algebraic groups Algebra I N. Bourbaki, 1998-08-03 This softcover reprint of the 1974 English translation of the first three chapters of Bourbaki's *Algebre* gives a thorough exposition of the fundamentals of general linear and multilinear algebra The first chapter introduces the basic objects such as groups and rings The second chapter studies the properties of modules and linear maps and the third chapter discusses algebras especially tensor algebras **Collected Papers** Armand Borel, 1983 This book collects the papers published by A Borel from 1983 to 1999

Publishers' Trade List Annual, 1978 **Linear Algebraic Groups** T.A. Springer, 2010-10-12 The first edition of this book presented the theory of linear algebraic groups over an algebraically closed field The second edition thoroughly revised and expanded extends the theory over arbitrary fields which are not necessarily algebraically closed It thus represents a higher aim As in the first edition the book includes a self contained treatment of the prerequisites from algebraic geometry and commutative algebra as well as basic results on reductive groups As a result the first part of the book can well serve as a text for an introductory graduate course on linear algebraic groups *Bruhat-Tits Theory* Tasho Kaletha, Gopal

Prasad, 2023-01-26 Bruhat Tits theory is an important topic in number theory representation theory harmonic analysis and

algebraic geometry This book gives the first comprehensive treatment of this theory over discretely valued Henselian fields It can serve both as a reference for researchers in the field and as a thorough introduction for graduate students and early career mathematicians Part I of the book gives a review of the relevant background material touching upon Lie theory metric geometry algebraic groups and integral models Part II gives a complete detailed and motivated treatment of the core theory as well as an axiomatic summary of Bruhat Tits theory that suffices for the main applications Part III treats modern topics that have become important in current research Part IV provides a few sample applications of the theory The appendices contain further details on the topic of integral models including a detailed study of integral models *Algebraic Groups: Structure and Actions* Mahir Bilen Can, 2017-04-06 This volume contains the proceedings of the 2015 Clifford Lectures on Algebraic Groups Structures and Actions held from March 2 5 2015 at Tulane University New Orleans Louisiana This volume consists of six articles on algebraic groups including an enhanced exposition of the classical results of Chevalley and Rosenlicht on the structure of algebraic groups an enhanced survey of the recently developed theory of pseudo reductive groups and an exposition of the recently developed operational theory for singular varieties In addition there are three research articles containing previously unpublished foundational results on birational automorphism groups of algebraic varieties solution of Hermite Joubert problem over closed fields and cohomological invariants and applications to classifying spaces The old and new results presented in these articles will hopefully become cornerstones for the future development of the theory of algebraic groups and applications Graduate students and researchers working in the fields of algebraic geometry number theory and representation theory will benefit from this unique and broad compilation of fundamental results on algebraic group theory
