Endourooncology H. Kumon, M. Murai, S. Baba, 2006-05-24. Recent research and clinical work have demonstrated that the rapid urologic innovation in minimally invasive treatment is creating exciting new horizons in endourology. This sixth volume in the series *Recent Advances in Endourology* brings that knowledge to a wider audience focusing on the new concept of endourooncology which is the merging of endourology and oncology. In the surgical treatment of urologic malignancies, bipolarization that is radical extended resection or organ sparing surgery is making remarkable advances. Further developments in sophisticated reconstructive surgery using robotic systems and image guided ablation technology will allow surgeons to formulate minimally invasive tailor made procedures for each patient with urologic cancer. In this book the current status and future prospects of these new technologies are reviewed illuminating their roles in the future of endourooncology.
