The South Caucasus Conflict and Energy Security

Energy Security | 12 August 2020 | Shuhman Halyeyev

The Nagorno-Karabakh conflict between Armenia and Azerbaijan had not only long contributed to instability in the South Caucasus but also prevented full regional economic integration. After a ceasefire agreement was signed in 1994, Armenia

Energy And Security In The Caucasus

DJ Losen

Energy And Security In The Caucasus:

Energy and Security in the Causasus Emmanuel Karagiannis, 2002 Azerbaijan's oil is the major strategic resource of the Caucasus region. This book analyzes the politics of oil, a factor highly instrumental in influencing the many complicated international and inter-ethnic tensions in the region, either exacerbating tensions or initiating good relations. **Addressing Emerging Security Risks for Energy Networks in South Caucasus** J. Novogrockiene, E. Siaulyte, 2017-07-20 A stable and reliable energy supply is of critical importance and enhances resilience against political and economic pressures. As was noted during the NATO Warsaw Summit in 2016, energy developments could have significant political and security implications for the alliance and its allies, as demonstrated by the crises to NATO's east and south. This book presents papers from the NATO Advanced Research Workshop Addressing Emerging Security Risks for Energy Flows over South Caucasus, which took place in Tbilisi, Georgia, in December 2016. The workshop brought together academics specializing in energy security, practitioners dealing with energy infrastructure safety and critical energy projects, NATO and EU experts, and representatives from industry, civil society, and governmental agencies. The workshop consisted of six major panels which addressed numerous issues and emphasised the importance of the energy transit function of Georgia and the South Caucasus. It reviewed existing and future energy transit projects and potential flows of oil and power and debated areas of common interest and forms of cooperation between consumers, producers, and transit states. New security challenges raised by the increased threat of terrorist activities and potential military actions were also analyzed. Potential forms of cooperation to provide adequate strategic and tactical safeguards against emerging threats were identified by the participants, and the book will be of interest to all those concerned with the security of our energy supplies. **The South Caucasus - Security, Energy and Europeanization** Meliha B. Altunışık, Oktay F. Tanrısever, 2017-10-02 This book explores developments in the countries of the South Caucasus: Armenia, Azerbaijan, and Georgia, since the EU included the region in the European Neighbourhood Policy in 2003. It considers issues related to energy, ethnic conflict, steps towards regional integration, and, above all, security, including the involvement of Russia, Iran, Turkey, and the United States. It assesses the key importance of energy, argues that the prospects for regional integration are weak, and contends that while the approach of Europe and the United States has been confused and weak, not holding out great hope of EU or NATO membership, Russia's interest and involvement in the region is strong and growing. **Emerging Threats to Energy Security and Stability** Hugo McPherson, W. Duncan Wood, Derek M. Robinson, 2007-05-22 Emerging Threats to Energy Security and Stability, January 23 to January 25, 2004, Windsor Castle, UK. This two-day NATO-sponsored workshop was organised by the Windsor Energy Group and MEC International Ltd, with support from NATO's Science Committee. The workshop was designed to promote a public-private sector exchange on how best to address issues arising in energy security at a time of growing uncertainty. In particular, it sought to assess emerging threats to energy security and stability and discuss new security strategies to protect

global energy supplies from regional instability and terrorism The format involved a wide ranging international group of policymakers and advisers from NATO Partner and other countries in a unique forum for intensive expert discussion Background The international community is increasingly conscious of the need to develop new energy security strategies in order to protect global energy supplies from regional instability and terrorism Energy security is a vital element in international stability However a variety of energy related economic technical and military political factors pose serious challenges to the international community's pursuit of energy security and stability The global economy is expected to continue to be largely dependent on oil and gas for the next twenty to thirty years Current levels of production may need to be doubled in this period with most of the increment coming from the Gulf States who control 66% of global oil reserves and 40% of global natural gas reserves There are forecasts of significant capacity shortfalls The Caucasus-Caspian Regional and Energy Security Agendas Vakhtang Maisaia,2007 Geopolitics and Energy Security Policies in the Caspian Region Justyna Misiągiewicz,2024-05-13 The analysis of geopolitics and energy security policies in the Caspian region is a challenging research task This is because of the specific development of international relations in this region and the evolution of its importance in the context of the functioning of the global energy market Due to its special geopolitical location in central Eurasia and at the junction at the world's largest trading routes the region is gaining in importance both politically and economically in contemporary international relations and becoming a place where actors involved satisfy the need for energy security *Energy (in)security in Russia's Periphery* United States. Congress. Commission on Security and Cooperation in Europe,2017 *Energy Security* Sascha Muller-Kraenner,2018-09-03 Essential reading Bernice Lee Chatham House Lays out the energy security landscape with a commendable clarity that I have not seen elsewhere It could help save the world Science People and a comprehensive climate protection policy with a focus on energy efficiency and renewable energy In times of international terrorism there are heightened concerns about nuclear proliferation and Energy Security argues that the future must belong to renewable energy Published with the Heinrich B ll Foundation *Energy Security in the Wider Black Sea Area - National and Allied Approaches* E. Lyutskanov,L. Alieva,M. Serafimova,2013-08-06 The need for reliable energy supplies continues to increase with global development and so energy security seems certain to remain a global challenge for the foreseeable future The Black Sea area is now a major producer of energy for the wider region and beyond This book presents the 12 papers delivered at the NATO Advance Research Workshop ARW Energy Security in the Wider Black Sea Area National and Allied Approaches held in Plovdiv Bulgaria in November 2011 The workshop which was attended by a balanced mix of international experts focused on research concerning crucial aspects of energy security and the role of NATO and covered issues such as energy security as part of national security concepts transnational energy projects in Central and Eastern Europe and the Wider Black Sea area national approaches to energy security critical infrastructure aspects of energy security scientific and industry support for establishing sustainability and alternatives in

energy security The book provides an overview of national and allied approaches to the topic of energy security and will be of interest to all those whose work involved the field of energy security in general and the Black Sea region in particular

Reassessing Security in the South Caucasus Annie Jafalian, 2016-04-08 Lying on the periphery of Europe Russia Turkey and Iran and also being of interest to the United States the South Caucasus is receiving growing attention among decision makers and scholars of international relations From a European perspective the region is now forming a neighbouring area at the border of the Black Sea as well as a corridor of oil and gas imports whose stability has become part of European security itself As such this volume reassesses security in the South Caucasus It makes it possible to update analysis on security interests perceptions and policies at national regional and international levels through cross national studies Aimed at highlighting long term defence and security trends in the region contributors re examine their relevance and enduring impact They also identify changing dynamics under recent geopolitical and political developments in and around the region such as the enlargements of NATO the August 2008 Russia Georgia war the creation of the EU Eastern Partnership or Presidential elections One of this volume s distinct contributions is that chapters have been written by experts from inside and around the region i e Armenia Georgia Russia and Turkey with other important contributions provided by authors from France and Canada having extensive experience in the area Students and scholars of post Soviet states Eurasian geopolitics and European Security will find this volume enlightening

Energy Security and Cooperation in Eurasia Ekaterina Svyatets, 2015-11-06 Why are bilateral relations especially in the area of energy security so different in the cases of U S Russia U S Azerbaijan and Russia Germany energy deals Why do some states find common ground despite differences while others with all the seemingly favourable conditions are sinking into animosity Energy Security and Cooperation in Eurasia explores varying outcomes of energy cooperation defined as diplomatic relations bilateral trade and investment in oil and natural gas The book looks at economic potential geopolitical rivalry and domestic interest groups in the cases of U S Russia U S Azerbaijan and Russia Germany energy ties It looks at major projects in each case Sakhalin and Arctic oil and gas production Baku Tbilisi Ceyhan and Nord Stream pipelines and activities of international oil companies The book also provides a detailed analysis of the situation in Ukraine since 2014 and Russia s annexation of Crimea and their effect on European energy security This book utilizes an innovative approach of exploring the dyads of states bilateral relations along the economic geopolitical and domestic lobbying dimensions This book is a valuable resource for graduate and undergraduate students academics and researchers in the areas of Security Political Economy Comparative Politics post Soviet studies as well as for general public

Russian Energy Security and Foreign Policy Adrian Dellecker, Thomas Gomart, 2011-05-03 This book provides an original and thoroughly academic analysis of the link between Russian energy and foreign policies in Eurasia as well as offering an interpretation of Russia s coherence on the international stage seeking to understand Russia and explain its behaviour The authors analyse both energy and foreign policies together in order to better

grasp their correlation and gain deeper understanding of broader geopolitical issues in Eurasia at a time when things could go either way towards producers or towards consumers Questioning the concept of energy deterrence which aims to fuel uncertainty in Russia's relations with its partners as well as projecting its overall power on the international scene this provocative volume seeks to stimulate debate on this very important issue Assessing the weight that energy has in Russia's foreign policy and in its pursuit of power on the international stage this book will be of interest to students and scholars of international relations energy politics geopolitics and Russian and Central Asian Studies *The Security Context in the Black Sea Region* Dimitrios Triantaphyllou, 2013-10-18 This book on the security context in the Black Sea region is a timely endeavour and substantive contribution to understanding the state of play in the region and its linkages to the rest of the world With contributions from analysts from Europe the United States Russia Ukraine and Turkey the book provides a holistic perspective Post Cold War developments have increased interest in the Black Sea region and the role of the regional and extra regional actors in its security issues this volume examines the position of the United States NATO's involvement the EU's engagement Russia and Turkey's aspirations alongside the policies of the other states in the region as they seek a role for themselves It illustrates and investigates key concerns such as security energy and energy security regionalism and good governance and questions why a cooperative security framework or other regional schemes which could accommodate the needs of all stakeholders has to date never become a reality This book adds to the growing body of research on the region presenting the facts of the current situation and asking what can be done in the Black Sea region for it to survive given its precarious security environment This book was published as a special issue of Southeast European and Black Sea Studies

Energy Security, Trade and the EU Rafael Leal-Arcas, Costantino Grasso, Juan Alemany Ríos, 2016-10-28 Energy security is a burning issue in a world where 1.4 billion people still have no access to electricity This book is about finding solutions for energy security through the international trading system Focusing mainly on the European Union as a case study this holistic and comprehensive analysis of the existing legal and geopolitical instruments strives to identify the shortcomings of the international and EU energy trade governance systems concluding with the notion of a European Energy Union and what the EU is politically prepared to accept as part of its unified energy security **Energy Security** Gawdat Bahgat, 2011-03-31 Security of Energy supply is a major concern for all modern societies intensified by skyrocketing demand in India and China and increasing international competition over fossil fuel deposits *Energy Security An Interdisciplinary Approach* gives A comparative analysis from both consumers and producers perspectives It uniquely combines economics geology international relations business history public management and political science in one comprehensive volume highlighting the vulnerabilities and need to move to more sustainable energy sources The author provides a number of useful case studies to demonstrate the theory including perspectives from consuming regions such as the United States the European Union and China and from exporting regions the Middle East Africa Russia and the Caspian Sea Key features

include coverage on theoretical and empirical frameworks so readers are able to analyse concepts relevant to new laws and policies in energy security up to date coverage on green energy outlining research on the balance between meeting energy needs and avoiding polluting the environment an examination of the three most prominent international energy organizations International Energy Agency International Energy Forum and Organization of Petroleum Exporting Countries a full Glossary listing all important terms used in the energy field This study holds important information for policymakers politicians energy specialists scientists and post graduate and final year students of energy and international relations With its clear written style it will also engage other professionals who are interested in international political economy and the future of global energy

Energy Security Nikolai Mouraviev, Anastasia Koulouri, 2018-10-17 This book discusses energy policy within the framework of the expansion of renewable energy sources RES and increasing resource use efficiency In this book the term resource efficiency is defined as deriving the most value from resource inputs related to energy production while incorporating energy efficiency The authors highlight the drivers policy approaches governance issues and management problems related to the reduction of dependency on fossil fuels by focusing on RES and resource efficiency Mouraviev and Koulouri argue that enhancing energy security requires a new approach integrating two core components the emphasis on increasing energy production from renewable sources and resource use efficiency which forms a contrast to the traditional understanding of energy security as security of supply Blending theory with practice using several case studies this original book provides a novel conceptualisation of energy security that will be of interest and value to practitioners and policy makers as well as scholars and researchers

Georgia: Russian Foreign Energy Policy and Implications for Georgia's Energy Security Liana Jervalidze, 2006 This report shows that as Georgia has restructured its energy sector the new Russian and Georgian political elites exerted their influence particularly through the participation of Russian gas company Itera in privatizations of Georgian gas enterprises And how over the past few years Russian Georgian business groups with their offshore capital have been working to monopolise the Georgian economy and Russia's gas industry has been consolidating its hold over the CIS pipeline infrastructure particularly through the expansion of Gazprom However Gazprom failed to take control of Georgia's pipeline infrastructure and Georgia is insistent on developing its pipeline potential in order to boost its role as a transit route to Europe Turkey and Iran This series of reports establishes for the first time the confluence of Russian foreign policy with the acquisition of foreign energy assets by Russian entities Nine specific country profiles focus on the oil gas electricity and nuclear power industries Each report written by an author of international standing explains how Russian foreign energy downstream mergers and acquisitions are transpiring to consolidate the new Russian empire

Azerbaijan: U.S. Energy, Security, and Human Rights Interests United States. Congress. House. Committee on Foreign Affairs. Subcommittee on Europe, Eurasia, and Emerging Threats, 2015

Energy Security Richard Youngs, 2009-01-28 The geopolitics of oil and gas have made a spectacular return to the international political agenda The European Union EU has

recognized the importance of incorporating energy security more systematically into foreign policy. It has committed itself to pursuing an energy security policy based on market interdependence, European unity, and long-term governance improvements in producer states. In offering the first broad global assessment of the foreign policy dimensions of EU energy security, this book considers how far these commitments have been implemented. Examining how the EU's general approach to energy security has played out in the specific political contexts of different countries and regions, distinctive features of the book include a thorough analysis of current EU strategies towards energy security, assessing the EU as an international actor, a key focus on the governance structures of producer states including the Middle East, Russia, Central Asia, and the Caspian, and Sub-Saharan Africa, a major addition to debates surrounding markets and geopolitics informing both international relations and international political economy. This book will be of interest to students, scholars, and policy makers in the fields of European EU Politics, energy politics, foreign policy, and International Relations.

Transatlantic Energy Relations John R. Deni, Karen Smith Stegen, 2016-04-08

Recent upheaval in the global energy system, dramatic increases in demand led largely by developing countries, significant decreases in supply as a result of local or regional conflicts, and the growing nexus between the burning of hydrocarbons and climate change has unsettled long-held notions of energy security. For many years, transatlantic cooperation helped undergird the system's stability, but Europe and North America have drifted apart in several key ways, potentially undermining the search for energy sufficiency, security, and sustainability. Will the transatlantic partners continue on separate paths in the face of dramatic change in the global energy system, or does the breadth and depth of the challenges they confront compel them to work more closely together? In this edited volume, experts from across Europe and North America, including advisors to the executive and legislative branches of both the EU and the United States, to senior military commanders, and to major international organizations and companies, examine the most salient facets of the transatlantic energy relationship and discern whether that relationship is characterized by growing convergence or divergence. This book was based on a special issue of the *Journal of Transatlantic Studies*.

If you ally infatuation such a referred **Energy And Security In The Caucasus** books that will offer you worth, acquire the agreed best seller from us currently from several preferred authors. If you want to hilarious books, lots of novels, tale, jokes, and more fictions collections are moreover launched, from best seller to one of the most current released.
