Decision & Control in Management Science Georges Zaccour, 2013-04-17 Decision Control in Management Science analyzes emerging decision problems in the management and engineering sciences It is divided into five parts The first part explores methodological issues involved in the optimization of deterministic and stochastic dynamical systems The second part describes approaches to the model energy and environmental systems and draws policy implications related to the mitigation of pollutants The third part applies quantitative techniques to problems in finance and economics such as hedging

of options inflation targeting and equilibrium asset pricing The fourth part considers a series of problems in production systems Optimization methods are put forward to provide optimal policies in areas such as inventory management transfer line flow shop and other industrial problems The last part covers game theory Chapters range from theoretical issues to applications in politics and interactions in franchising systems Decision Control in Management Science is an excellent reference covering methodological issues and applications in operations research optimal control and dynamic games

The State of the Environment in Asia The Japan Environmental Council, 2012-12-06 In December 1977 we published the first in this series of NGO oriented reports on Asia's environment Ajia Kankyo Hakusho 1997 98 This was published in English by Springer Verlag as The State of the Environment in Asia 1999 2000 Although only a few years have passed since then Asia has seen tumultuous changes in the political economic social environmental and other domains as well as a number of prominent trends that could be regarded as harbingers of the new century China for instance could henceforth decisively affect the evolution of environmental problems not only in Asia but across the entire globe Yet Chinese concern for and initiatives on pollution and environmental damage have increased more quickly than could have been anticipated just a few years ago And on Taiwan where a Democratic Progressive Party president was elected over the long ruling Nationalist Party an attorney who has cooperated with our pollution surveys for a decade Hsieh Chang ting became mayor of Taiwan's largest heavy and chemical industry city of Kaohsiung where he has begun a Green Revolution On the Korean Peninsula which has for many years endured the division of its people as well as political and military tensions there are the beginnings of a new North South dialog These changes are all welcome to those of us who wish to see new advances in environmental

cooperation throughout Asia **Nuclear Energy** David Bodansky, 2007-06-25 This second edition represents an extensive revision of the first edition though the motivation for the book and the intended audiences as described in the previous preface remain the same The overall length has been increased substantially with revised or expanded discussions of a number of topics including Yucca Mountain repository plans new reactor designs health effects of radiation costs of electricity and dangers from terrorism and weapons proliferation The overall status of nuclear power has changed rather little over the past eight years Nuclear reactor construction remains at a very low ebb in much of the world with the exception of Asia while nuclear power's share of the electricity supply continues to be about 75% in France and 20% in the United States However there are signs of a heightened interest in considering possible nuclear growth In the late 1990s the U S Department of Energy began new programs to stimulate research and planning for future reactors and many candidate designs are now contending at least on paper to be the next generation leaders Outside the United States the commercial development of the Pebble Bed Modular Reactor is being pursued in South Africa a French German consortium has won an order from Finland for the long planned EPR European Pressurized Water Reactor and new reactors have been built or planned in Asia In an unanticipated positive development for nuclear energy the capacity factor of U S reactors has increased dramatically in

recent years and most operating reactors now appear headed for 20 year license renewals **The Routledge Handbook of Energy Security** Benjamin K. Sovacool, 2010-12-16 This Handbook examines the subject of energy security its definition dimensions ways to measure and index it and the complicating factors that are often overlooked The volume identifies varying definitions and dimensions of energy security including those that prioritize security of supply and affordability alongside those that emphasize availability energy efficiency trade environmental quality and social and political stewardship It also explores the various metrics that can be used to give energy security more coherence and also to enable it to be measured including recent attempts to measure energy security progress at the national level with a special emphasis placed on countries within the Organization of Economic Cooperation and Development OECD countries within Asia and industrialized countries worldwide This Handbook Broadens existing discussions of energy security that center on access to fuels including oil security and coal security Focuses not only on the supply side of energy but also the demand taking a hard look at energy services and politics along with technologies and infrastructure Investigates energy security issues such as energy poverty equity and access and development Analyzes ways to index and measure energy security progress at the national and international level This book will be of much interest to students of energy security energy policy economics environmental studies and IR Security Studies in general Electricity Information ,2000 Chiefly tables of statistics
