Low Carbon Transitions for Developing Countries Frauke Urban, 2014-06-13 Global climate change is one of the greatest challenges of our times and in order to tackle this carbon emissions need to be mitigated China and India have recently become some of the world s largest greenhouse gas emitters Transitions to low carbon energy for reducing emissions that lead to climate change are therefore an urgent priority for China and India and at a global level This is the first book focusing on low carbon energy transitions for emerging economies such as China and India assessing the opportunities and barriers for transitions to renewable and low carbon energy as climate change mitigation options It uses energy modelling to assess the China s power sector the economy of Beijing and rural Indian households that do not have access to electricity The research evaluates the environmental technical socio economic and policy implications of these low carbon transitions concluding that they are possible in China

and India and they can considerably contribute to climate change mitigation This interdisciplinary book will be of interest to scholars students practitioners and policy makers working in the fields of energy and development energy policy energy studies and modelling climate policy climate change mitigation climate change and development low carbon development sustainable development environment and development and environmental management **China's Energy Economy** Hengyun Ma, Les Oxley, 2012-02-02 In the new millennium understanding China's energy economy is crucial for politicians businesspeople and energy economists as China's energy policy choices will mean both challenges and opportunities for the world in terms of an increasing share of primary energy consumption and investment This book initially reviews the literature on China's energy economy and in so doing reveals that many important areas have been overlooked or are outdated in their coverage Given the size of China and its global importance the book then reviews China's current energy situation and fills the gaps in the literature for those who are interested in and concerned about China's economic development and energy reform in the new millennium The book is different from previous studies in several important ways Firstly it presents recent pioneering research rather than a simple textbook several sections of which have been published in high quality energy journals Secondly the book first subdivides China's energy intensity change into aspects of budget constraint technological change factor substitution energy demand and economic growth using a newly developed econometric approach Thirdly it provides many new and different econometric findings and derives many new policy implications for China's energy economy And lastly it brings to light a wealth of new knowledge for those who are interested in China's energy economy the world energy market and global environmental and climate change issues *Rural Energy Planning in China and Other Developing Countries of Asia* Food and Agriculture Organization of the United Nations, 1985-01-01 *Energy in developing countries.* , *Sustainable Resource Development* Gary M. Zatzman, 2012-12-10 Taking a fresh new look at the energy industry and how the Earth's resources are being developed the aim of this book is to aid engineers and scientists in attaining sustainability in this field both from an economic and environmental perspective The author herein presents engineering research and practice that is focused on achieving energy sustainability from a global perspective as is also outlined in other Scrivener books such as *The Greening of Petroleum Operations* and the author's own recently published book *Sustainable Energy Pricing* the companion volume to this book The author applies the principles of economic sustainability developed there to re-examine actual engineering practices in fossil fuel and alternative energy such as wind and tidal power exploration and development One of the book's unique features is its analysis of what is deficient in the thinking and analytical frameworks that inform engineering work done in the field The book addresses the complex issues surrounding our quest for sustainability and the key causes of the challenges that face the energy industry and its resource development From this standpoint the book challenges the reasoning and conclusions drawn from the often quoted theory of peak oil **National Energy Plans in the Asia-Pacific Region** Guy J. Pauker, 2013-10-22

National Energy Plans in the Asia Pacific Region is a collection of papers presented at Workshop III of the Asia Pacific Energy Studies Consultative Group held in Honolulu Hawaii at the East West Center from 25-28 February 1980. The collection presents a framework for energy policies in the Asia Pacific Region, energy policies of the United States, oil exporting countries, industrial oil importing countries, and countries importing more than and less than 50% of their oil requirements, and the role of international institutions in energy research. International energy policy makers and researchers will find the book invaluable.

Sustainable Development and Energy Transition in Europe and Asia Bernadette Andreosso-O'Callaghan, Sam Dzever, Jacques Jaussaud, Robert Taylor, 2020-02-19. Asian and European countries have adopted different approaches to the conflicting priorities of economic growth and low carbon emissions. In this volume, based on the revised versions of papers presented at the 24th International Euro Asia Research Conference held in 2019, the contrasts between the schools of thought of each continent are explored thoroughly. Ranging from topics as diverse as city logistics, shareholder value and management practices, the EU Japan Economic Partnership Agreement, China's geopolitical insights, sustainable agricultural development in India, and the empowerment of women in Vietnam via microfinance, this book addresses sustainable development policies in China and Southeast Asia from many different perspectives.

Handbook of Energy and Environmental Security Muhammad Asif, 2022-05-10. Handbook of Energy and Environmental Security educates the reader about the wider dimensions of the distinctive yet intertwined subjects of energy security and environmental security. The book uniquely addresses these two increasingly important topics in a comprehensive and composite manner, describing the concepts and wider dimensions of energy and environmental security in technological, economic, social, and geopolitical perspectives. Divided into three main parts, the book deals with the subject of energy security in terms of its concepts, broader dimensions, and allied issues; focuses on environmental security and covers subjects in a cohesive manner, discussing their important interfaces and commonalities. Providing valuable scholarship for academics, researchers, and analysts in the fields of energy and the environment, and using case studies to illustrate national and international levels, this is a valuable resource for energy and environmental security challenges, especially in the areas of sustainable development and climate change. Discusses the critical subjects of energy

security and environmental security in a composite manner Incorporates up to date data case studies and comparative assessments Energy and environmental policy frameworks are covered from the perspective of both developed and developing countries *The Asian Century, Sustainable Growth and Climate Change* Moazzem Hossain, Malcolm McIntosh, 2013-01-01 This path breaking book investigates the challenges of realizing the Asian century Prosperity in Asia does not only mean economic growth the issues of public health sanitation income equality the social safety net and efficient use of natural resources are also important It argues for new policy initiatives in social environmental and natural resource areas of South Southeast and East Asia This insightful volume is presented in three parts Part I identifies the major socio economic factors which are likely to take away the opportunities in realizing the Asian century by 2050 Part II presents the responsible policy issues which would be needed to overcome the hurdles such as public finance natural resources public health and sanitation intra Asia migration and decentralized governance and Part III articulates major challenges in realizing Asian prosperity including sustainable international business and sustainable growth The topics examined range from demographic conditions and tax reform to responsible use of natural resources in the years to come The Asian Century Sustainable Growth and Climate Change will appeal to academics in the fields of Asian studies and environment ecology The major challenges in the future for South Asian growth due to the impact of climate change will prove invaluable for practitioners and policy makers **Nature Science and Sustainable Technology Research Progress** ,2008 Nature thrives on diversity and flexibility gaining strength from heterogeneity whereas the quest for homogeneity seems to motivate much of modern engineering Nature is non linear and inherently promotes multiplicity of solutions This book presents lively analyses of urgent problems in nature science **Enabling technologies and business models for energy communities** Alessandro Burgio, Zbigniew M.
