Chorafas, 2016-04-29 Every generation leaves both assets and liabilities to the next Alert people can see we are going to leave our children and grandchildren with a nearly unsolvable test of energy supplies waste polluting the air and water and the appalling problem of a huge and uncontrollable explosion in world population Energy Environment Natural Resources and Business Competitiveness addresses itself to those having a professional academic or general interest in these issues Energy sources their nature and contribution Environmental problems associated to power production and usage Financing and

control of energy related projects and processes Future direction of agriculture produce now used as energy Complex social and technical issues resulting from lack of family planning and therefore of demands for energy Impact of energy and an exploding population on pollution Truth and hype about the most talked about environmental subjects In this fourth book for Gower Dimitris Chorafas reviews Europe America and Asia s energy needs in the coming decade pointing out that current policies are inadequate at best and more likely disastrous for the economy Governments persist in having their own agenda and priorities as well as plenty of constraints and taboos yet when he critically examines the challenges Dr Chorafas concludes that no government can solve all current energy problems by acting alone The book confronts current thinking and its after effect on policies and practices Readers accustomed to mainstream books and articles which blame fossil fuels for a deteriorating world environment will find this a contrary opinion

**Energy and Environment** Peter Edward Hodgson, 1997 Can we have energy without pollution Although energy and the environment are connected the question of how the two can co exist is problematic How can we go on producing the energy we need without destroying the environment and ourselves in the process The answer involves not just science and politics but also morality ethics and the meaning and purpose of existence itself The world s resources have to be considered from both a scientific and a humanistic point of view In this short but authoritative survey Dr Hodgson defines the problem and looks at possible new sources of energy He discusses the health issue and the destruction of the environment through such causes as acid rain and industrial waste Reviewing the problems of developing countries and the threat of nuclear weapons the author ends with an assessment of the risks and rewards of pursuing different energy policies
