Environment and Global Modernity Gert

Spaargaren, Arthur P J Mol, Frederick H Buttel, 2000-06-02 This accomplished book argues that we can only make sense of environmental issues if we consider them as part of a more encompassing process of social transformation It asks whether there is an emerging consensus between social scientists on the central issues in the debate on environmental change and if concerns about the environment constitute a major prop to the process of globalization The book provides a thorough discussion of the central themes in environmental sociology identifying two traditions ecological modernization theory and risk society theory *Solar Energy Update*, 1982-11 Bioeconomics and Sustainability Nicholas Georgescu-Roegen, Koza Mayumi, John M. Gowdy, 1999-01-01 Economists from around the world discuss Georgescu Roegen s 1906 94 theories in a number of areas but especially on environmental and energy economics They address such topics as how long neoclassical economists can continue to ignore his contribu **Environmental Management in Practice: Vol 1** Paul Compton, Dimitri Devuyst, Luc Hens, Bhaskar Nath, 2013-01-11 Focuses on the instruments and tools currently available to the environmental manager A theoretical background to the instruments is given together with an overview of those instruments that are in common use today with particular attention to the physical economic legislative and communication instruments **Atomic Energy Costing** Warren Young, 2012-12-06 In the centennial year of the birth of Sir John Cockcroft first master of my Cambridge College Churchill and the first man to split the atomic nucleus by artificial means it is indeed relevant to consider the outcome of his efforts at developing atomic power From the earliest days of the construction of Calder Hall the first nuclear power station in Britain and the establishment of the British Atomic Research Center at Harwell and the Chalk River Nuclear Station in Canada through the Windscale nuclear accident in Britain up to the present when some 20% of UK energy is derived from nuclear power the Cockcroft legacy is felt As the British historian Mark Goldie put it in the pure and sanguine 1950s Cockcroft had almost absolute faith in peaceful atoms and in the boundless almost cost free energy that atoms would soon produce Goldie 1997 p 21 But as the eminent economist Frank Hahn recalled the only failing Cockcroft had was that he wasn't up to much in economics Indeed Hahn recalled that he had to explain to Cockcroft the economic notion of optimum durability as it related to the interest rate in the context of building Churchill College with hand made bricks After his explanation as Hahn recalled Cockcroft smiled and proceeded to order more hand made bricks Hahn 1997 p 27 **From Bioeconomics to Degrowth** Nicolas Georgescu-Roegen, 2011-03-28 Nicolae Georgescu Roegen 1906 1994 is considered today as perhaps the chief founder of the transdisciplinary field today known as Ecological Economics but that he defined himself as Bioeconomics In his later years Georgescu Roegen intended to write a book of this title that would systematize what he considered to be the most significant results of his work This project intends to resume this project publishing a

collection of the most relevant Georgescu Roegen essays on Bioeconomics including previously unpublished papers

International Environmental Policy Lynton Keith Caldwell,Paul Stanley Weiland,1996 In this newly revised and expanded edition of the award winning International Environmental Policy Lynton Keith Caldwell updates his comprehensive survey of the global international movement for protection of the environment Serving as a history of international cooperation on environmental issues this book focuses primarily on the development of international agreements and institutional arrangements both governmental and nongovernmental along with the impact of science technology trade and communication on environmental policy With implications for multinational commerce population policy agriculture energy issues biological and cultural diversity transnational equity ideology and education this book takes a broad view of the policy outcomes of what may be the most important social movement of the 20th century and addresses the events and politics that have significantly affected the movement over the last twenty years and will continue to affect it into the next century

The Economics of Climate Change in China Fan Gang,Nicholas Stern,Ottmar Edenhofer,Xu Shanda,Klas Eklund,Frank Ackerman,Lailai Li,Karl Hallding,2013-09-13 China faces many modernization challenges but perhaps none is more pressing than that posed by climate change China must find a new economic growth model that is simultaneously environmentally sustainable can free it from its dependency on fossil fuels and lift living standards for the majority of its population But what does such a model look like And how can China best make the transition from its present macro economic structure to a low carbon future This ground breaking economic study led by the Stockholm Environment Institute and the Chinese Economists 50 Forum brings together leading international thinkers in economics climate change and development to tackle some of the most challenging issues relating to China s low carbon development This study maps out a deep carbon reduction scenario and analyzes economic policies that shift carbon use and shows how China can take strong and decisive action to make deep reductions in carbon emission over the next forty years while maintaining high economic growth and minimizing adverse effects of a low carbon transition Moreover these reductions can be achieved within the finite global carbon budget for greenhouse gas emissions as determined by the hard constraints of climate science The authors make the compelling case that a transition to a low carbon economy is an essential part of China s development and modernization Such a transformation would also present opportunities for China to improve its energy security and move its economy higher up the international value chain They argue that even in these difficult economic times climate change action may present more opportunities than costs Such a transformation for China and the rest of the world will not be easy But it is possible necessary and worthwhile to pursue Energy Research Abstracts ,1986 **Handbook of Energy and Environmental Security** Muhammad Asif,2022-05-10 Handbook of Energy and Environmental Security educates the reader about the wider dimensions of the distinctive yet intertwined subjects of energy security and environmental security The book uniquely addresses these two increasingly important topics in a comprehensive and composite manner describing the concepts and

wider dimensions of energy and environmental security in technological economic social and geopolitical perspectives Divided into three main parts the book deals with the subject of energy security in terms of its concepts broader dimensions and allied issues focuses on environmental security and covers subjects in a cohesive manner discussing their important interfaces and commonalities Providing valuable scholarship for academics researchers and analysts in the fields of energy and the environment and using case studies to illustrate national and international levels this is a valuable resource for energy and environmental security challenges especially in the areas of sustainable development and climate change Discusses the critical subjects of energy security and environmental security in a composite manner Incorporates up to date data case studies and comparative assessments Energy and environmental policy frameworks are covered from the perspective of both developed and developing countries
