## **Energy Efficiency Reference For Asian Use:**

**Energy Efficiency Reference for Asian Use** Asian Development Bank,1997 **Energy Efficiency Guide for Industry in Asia** ,2006 This guide has been developed for Asian companies who want to improve energy efficiency through Cleaner Production and for stakeholders who want to help them It includes a methodology case studies for more than 40 Asian companies in 5 industry sectors technical information for 25 energy equipments training materials a contact and information database Publisher s description **Energy Efficiency in South Asia** Asian Development Bank,2021-12-01 This report reviews the energy landscape in Bangladesh Bhutan India Nepal and Sri Lanka with the aim of supporting improved energy efficiency in these South Asian countries It analyzes the growth of energy consumption in each of the five countries as well as their major energy efficiency institutional arrangements policies initiatives and programs Key sectors with the potential for significant energy reduction are identified for Bangladesh Bhutan Nepal and Sri Lanka Opportunities to enhance regional cooperation in energy efficiency and conservation in South Asia are also explored **Energy Outlook for Asia and the Pacific 2009** Asian Development Bank,2009-10-01 This report attempts to project the balance between energy demand and supply for the 48 regional members of the Asian Development Bank However due to the unavailability of energy data the Marshall Islands the Federated States of Micronesia and Tuvalu are not included in the study The outlook results are presented by member by subregion and by region Based on the projected energy demand and supply carbon dioxide emissions and investment requirements are derived These will offer a basis for policy making and development planning geared toward sustainable economic development in the regional members in Asia and the Pacific **Routledge Handbook of Energy in Asia** Subhes Bhattacharyya,2017-10-12 The Routledge Handbook of Energy in Asia presents a comprehensive review of the unprecedented growth of Asian energy over the past quarter of a century It provides insightful analysis into variation across the continent whilst highlighting areas of cross learning and regional cooperation between the developed and developing countries of Asia Prepared by a team of leading international experts this book not only captures the East Asian domination particularly that of China but also highlights the growing influence of South Asia and the ASEAN Organised into four parts the sections include the demand for energy in the region and its main drivers at the sector level developments in energy supply including fossil fuels and renewable energy sources energy policies and issues such as sector reform and climate change the transition to a low carbon pathway This handbook offers a complete picture of Asian energy covering supply and demand as well as contemporary challenges in the sector As such it is a valuable resource for students and scholars of energy policy Environmental Studies and Asian Studies *Energy Sustainability and Development in ASEAN and East Asia* Phoumin Han,Farhad Taghizadeh-Hesary,Fukunari Kimura,2020-06-14 The rapid and sustained economic growth of the past two decades has led to marked increases in energy demand in the region and developing Asia will continue to lead the energy demand growth The increase in energy demand threatens energy security and efforts to curb carbon dioxide

emissions affecting health and social well being These common energy challenges will need to be addressed through concerted efforts This book provides several multi dimensional quantitative analysis of the relationship between energy and other subjects including but not limited to income and economic growth environment and health food and agricultural production The book also provides the most constructive policy recommendations concerning the relationship between energy economic development social development and environmental development      **The Routledge Handbook of Environmental Economics in Asia** Shunsuke Managi,2015-02-11 Problems of climate change biodiversity and air pollution are clearly growing globally but more particularly in Asia because of its economic importance and richness in nature The increasing interest in environmental and resource economics applied in regions of Asia will make this book an outstanding resource to the existing literature particularly in the fields of environmental and resource economics and the integration of applied content in traditional and agricultural development At present there is no single handbook or text on the state of current knowledge in environmental economics in Asia or one which offers a comprehensive guide to students and academics on the subjects of environmental economics research This book will help to fill the gap in the existing literature      Energy Relations and Policy Making in Asia Leo Lester,2016-10-31 This volume goes beyond a conventional analysis of Asia s energy relationships and explores the premise that energy relations in Asia in the 21st century should reinforce mutual interdependence Conventional analyses of international energy relations stress the asymmetric nature of the risks and costs of disruptions to energy flows Energy suppliers net exporters are concerned with the cost of a buyer looking elsewhere energy consumers net importers are preoccupied with the costs associated with an interruption of supply This perspective reflects the current transactional nature of energy relations and is clearly observed in the energy dynamics between countries in the Gulf Cooperation Council GCC and the economies of Northeast Asia NEA As the economies of both the GCC and NEA have enlarged there is under recognized potential for a move away from narrow transactional relations to broader interdependent ones This collection of essays from leading energy strategic and economic policy think tanks focused on how energy relations are forming in the 21st century offers energy scholars and policy makers answers to what these increasingly close relationships mean for international politics and trade      *Energizing Green Cities in Southeast Asia* Dejan R. Ostojic,Ranjan K. Bose,Holly Krambeck,Jeanette Lim,Yabei Zhang,2013-10-07 This book presents a blueprint for transforming East Asian cities to global engines of green growth by choosing energy efficient solutions for their infrastructure needs with case studies in Cebu City the Philippines Da Nang Vietnam and Surabaya Indonesia illustrating the use of sustainable urban energy and emissions planning SUEEP      *East Asia* Julie Bringe,Cynthia Foresa,Michael Hagey,Eric Land,1997-04 An investigation of the causes and implications for the U S of increasing economic integration in East Asia Includes an overview of trends in and conditions for trade investment and economic integration in East Asia host country policies and factors influencing those trends and conditions external factors affecting the business activities of major traders and investors in the

region the relationship between foreign direct investment in the region and the region's trade patterns with others energy needs and resources in the region environmental conditions and opportunities for local and U S interests

*Sustainable Transport Studies in Asia* Akimasa Fujiwara, Junyi Zhang, 2013-06-04 This book aims to provide a good understanding of and perspective on sustainable transport in Asia by focusing on economic environmental and social sustainability It is widely acknowledged that the current situation and trends in transport are not always sustainable in Asia due in part to the fast growing economy and the astounding speed of urbanization as well as least mature governance As essential research material the book provides strong support for policy makers and planners by comprehensively covering three groups of strategies characterized by the words avoid e g urban form design and control of car ownership shift e g establishing comprehensive transportation systems and increasing public transportation systems for both intracity and intercity travel and improve e g redesign of paratransit system low emission vehicles intelligent transportation systems and eco life These are elaborated in the book alongside consideration of the uncertainty of policy effects in the future The book is also valuable for scholars and scientists because of the diverse methodologies presented and proposed herein Among those are the four step model with full feedback mechanisms the bi level programming model with sustainability goals data envelopment analysis and stochastic frontier analysis approaches structural equation models discrete and or continuous choice models copula based models survival models and driving risk models with short term memory Using data collected from more than ten Asian cities including those in both developed and developing nations the pathway to sustainable transport in Asia gradually becomes clear

**East Asia** United States International Trade Commission, 1993
