Ferrari, Friedrich Rosenfeld, Dietmar Czernich, 2020-09-25 The absence of a coherent body of case law on due process has increasingly motivated recalcitrant parties to use due process as a strategic tool thereby putting at risk the prospect of obtaining an enforceable award in expeditious proceedings Countering this inherent danger here for the first time is a comprehensive study on due process as a limit to arbitral discretion showing how due process applies in practice in key jurisdictions around the world Based on country reports prepared by leading arbitration practitioners and academics the book explores how courts in major arbitration jurisdictions apply due process guarantees when performing their post award review The contributors driven by an interest in exploring the interplay between due process and efficiency focus on those due process guarantees that set limits to arbitral discretion Matters covered include the following the right to be heard and

how it may be affected by submission deadlines evidentiary offers by the opposing party and directions to the parties as to which aspects require further pleading the right to be treated equally and its interplay with the duty to give each party full opportunity to present its case and to comment on submissions and evidence filed by the other party the duty to effect proper notice including delivery and language issues the independence and impartiality of arbitrators with a focus on when an arbitrator's conduct can become the basis for a successful challenge and courts standards of deference when examining issues arising at the post award stage An introductory general report thoroughly analyses the normative basis of due process and its interplay with party autonomy as well as applicable standards of review and commonalities among manifestations of due process across jurisdictions A signal contribution to the debate regarding the so called due process paranoia affecting arbitral tribunals a topic relevant in every single arbitration proceeding this book provides practical guidelines on how to maintain the balance between due process and efficiency and how to apply due process and counteract its misuse in arbitration proceedings It will be welcomed by counsel arbitrators and judges from all countries as well as by academics and researchers concerned with international commercial arbitration Monthly Catalog of United States Government Publications, 2004

A Short History of Circuits and Systems Franco Maloberti, Anthony C. Davies, Yongfu Li, Fidel Makatia, Hanho Lee, Fakhrul Zaman Rokhani, 2024-09-27 After an overview of major scientific discoveries of the 18th and 19th centuries which created electrical science as we know and understand it and led to its useful applications in energy conversion transmission manufacturing industry and communications this Circuits and Systems History book fills a gap in published literature by providing a record of the many outstanding scientists mathematicians and engineers who laid the foundations of Circuit Theory and Filter Design from the mid 20th Century Additionally the book records the history of the IEEE Circuits and Systems Society from its origins as the small Circuit Theory Group of the Institute of Radio Engineers IRE which merged with the American Institute of Electrical Engineers AIEE to form IEEE in 1963 to the large and broad coverage worldwide IEEE Society which it is today This second edition commemorating the 75th anniversary of the Circuits and Systems Society builds upon the first edition's success by expanding the scope of specific chapters introducing new topics of relevance and integrating feedback from readers and experts in the field reflecting the evolving landscape of Circuits and Systems alongside the evolution of the professional society Many authors from many countries contributed to the creation of this book working to a very tight time schedule The result is a substantial contribution to their enthusiasm and expertise which it is hoped readers will find both interesting and useful It is certain that in such a book omission will be found and in the space and time available much valuable material had to be left out It is hoped that this book will stimulate an interest in the marvelous heritage and contributions of the many outstanding people who worked in the Circuits and Systems area

Recovery of Values from Low-Grade and Complex Minerals Elvis Fosso-Kankeu, Bhekie B. Mamba, Antoine F. Mulaba-Bafubiandi, 2024-05-21 Recovery of Values from Low Grade and Complex Minerals The book elaborates on various

physicochemical properties of minerals and technological developments to improve the recovery of metals while ensuring cost effectiveness and minimal environmental impact The mineral industry is undergoing significant cultural organizational and technological transformations to address some of the major limitations and challenges related to the environmental and productivity domains As far as productivity is concerned the decrease of high grade ores has been one of the stumbling blocks toward the achievement of maximum recovery of metals while on the other hand the complexity of minerals therein makes it difficult to profitably extract metals using only conventional methods This book presents eight specialized chapters that focus on the exploration of the complexity of minerals that are likely to negatively influence the recovery of values as well as the development of adequate technologies capable of improving the process of mineral concentration and or metal recovery from complex minerals in a sustainable manner It reviews the various physicochemical properties of minerals that are likely to pose a challenge during the attempt to recover values using conventional methods It also elaborates on the recent technological development that has been considered by researchers to improve the recovery of metals from gangue dominated minerals while ensuring cost effectiveness and minimal adverse environmental impact Audience This book will be of interest to academic researchers from the fields of mineral processing hydrometallurgy geochemistry environment chemistry engineering and professionals including mining plant operators environmental managers in the industries government regulatory bodies officers and environmentalists British Qualifications 2013 Kogan Page Ltd,Kogan Page Page Editorial Editorial Staff,2013-01-01 Now in its 43rd edition British Qualifications is the definitive one volume guide to every qualification on offer in the United Kingdom With full details of all institutions and organizations involved in the provision of further and higher education this publication is an essential reference source for careers advisors students and employers It also includes a comprehensive and up to date description of the structure of further and higher education in the UK The book includes information on awards provided by over 350 professional institutions and accrediting bodies details of academic universities and colleges and a full description of the current framework of academic and vocational educational It is compiled and checked annually to ensure accuracy of information *Distributed Computing and Artificial Intelligence, 16th International Conference, Special Sessions* Enrique Herrera-Viedma,Zita Vale,Peter Nielsen,Angel Martin Del Rey,Roberto Casado Vara,2019-06-25 This book presents the outcomes of the special sessions of the 16th International Conference on Distributed Computing and Artificial Intelligence 2019 a forum that brought together ideas projects and lessons associated with distributed computing and artificial intelligence and their applications in various areas Artificial intelligence is currently transforming our society Its application in distributed environments such as the internet electronic commerce environmental monitoring mobile communications wireless devices and distributed computing to name but a few is continuously increasing making it an element of high added value and tremendous potential These technologies are changing constantly as a result of the extensive research and technical efforts being pursued at universities and businesses
