Construction Law Julian Bailey,2016-10-04 Now in its second edition Construction Law is the standard work of reference for busy construction law practitioners and it will support lawyers in their contentious and non contentious practices worldwide Published in three volumes it is the most comprehensive text on this subject and provides a unique and invaluable comparative multi jurisdictional approach This book has been described by Lord Justice Jackson as a tour de force and by His Honour Humphrey LLoyd QC as seminal and definitive This new edition builds on that strong foundation and has been fully updated to include extensive references to very latest case law as well as changes to statutes and regulations The laws of Hong Kong and Singapore are also now covered in detail in addition to those of England and Australia Practitioners as well as interested academics and post graduate students will all find this book to be an invaluable guide to the many facets of construction law

A Practical Approach to Conditions of Contract for Civil Engineering Works David Y.K. Leung,2010-08-01 This book provides a comprehensive commentary and guidance to readers on the current edition 1999 Edition of General Conditions of Contract for Civil Engineering Works the General Conditions which the Hong Kong Government uses for all its civil engineering contracts The book describes 46 out of 90 clauses in the General Conditions and their practical application with explanations in plain and simple language under such headings as Commentary Analysis and Application The listing of equivalent clauses of the more user friendly English ICE Conditions and the international FIDIC Conditions together enables the readers to understand the meaning of the General Conditions from a different context For those readers who find it easier to read in Chinese the translation will help them to compare with and understand the original English text The book is therefore useful to students consulting engineers surveyors and lawyers who want to understand more about the Hong Kong construction practice

Construction Cost Management Keith Potts,Nii Ankrah,2014-01-23 In this updated and expanded second edition Keith Potts and Nii Ankrah examine key issues in construction cost management across the building and civil engineering sectors both in the UK and overseas Best practice from pre contract to post contract phases of the project life cycle are illustrated using major projects such as Heathrow Terminal 5 Crossrail and the London 2012 Olympics as case studies More worked examples legal cases case studies and

current research have been introduced to cover every aspect of the cost manager's role. Whole life costing, value management and risk management are also addressed and self test questions at the end of each chapter support independent learning. This comprehensive book is essential reading for students on surveying and construction management programmes as well as built environment practitioners with cost or project management responsibilities. Claims on Highway Contracts Robert N. Hunter, 1997. Most civil engineering projects carried out in the UK which are concerned with the construction or maintenance of highways employ the 5th edition of the ICE Conditions of Contract and the Manual of Contract Documents for Highway Works. In order to maximise returns in construction works or often nowadays to minimise losses it is necessary for engineers, contractors and clients to have a full understanding of these documents, particularly those elements which have a financial connotation. Claims on highway contracts has been specifically written to explore those parts of the 5th edition of the ICE Conditions of Contract and the Manual of Contract Documents for Highway Works which are particularly important in the commercial aspects of highway contracts and to examine how they apply in claims situations. There have been many books written on claims by lawyers which are full of legalese. Claims on highway contracts is the first and only book which has been written by a practising engineer who works in this field and has experience of the claims minefield to provide advice in a practical and straightforward manner. **Construction Contracts** Will Hughes, Ronan Champion, John Murdoch, 2015-04-20. The fifth edition of this bestselling textbook has been thoroughly revised to provide the most up to date and comprehensive coverage of the legislation, administration and management of construction contracts. It now includes comparisons of working with JCT NEC3 and FIDIC contracts throughout. Introducing this topic at the core of construction law and management, this book provides students with a one stop reference on construction contracts. Significant new material covers procurement, tendering, developments in dispute settlement, commentary on all key legislation, case law and contract amendments. In line with new thinking in construction management research, this authoritative guide is essential reading for every construction undergraduate and an extremely useful source of reference for practitioners. **Technical Books in Print**, 1964.
