**A British Profession of Arms** Ian F. W. Beckett, 2018-10-25 You offer yourself to be slain General Sir John Hackett once observed remarking on the military profession This is the essence of being a soldier For this reason as much as any other the British army has invariably been seen as standing apart from other professions and sometimes from society as a whole A British Profession of Arms effectively counters this view In this definitive study of the late Victorian army distinguished scholar Ian F W Beckett finds that the British soldier like any other professional was motivated by considerations of material reward and career advancement Within the context of debates about both the evolution of Victorian professions and the nature of military professionalism Beckett considers the late Victorian officer corps as a case study for weighing distinctions between the British soldier and his civilian counterparts Beckett examines the role of personality politics and patronage in the selection and promotion of officers He looks too at the internal and external influences that extended from the press and public opinion to the rivalry of the so called rings of adherents of major figures such as Garnet Wolseley and Frederick Roberts In particular he considers these processes at play in high command in the Second Afghan War 1878 81 the Anglo Zulu War 1879 and the South African War 1899 1902 Based on more than thirty years of research into surviving official semiofficial and private correspondence Beckett s work offers an intimate and occasionally amusing picture of what might affect an officer s career wealth wives and family status promotion boards and strategic preferences performance in the field and diplomatic outcomes It is a remarkable depiction of the British profession of arms unparalleled in breadth depth and detail
