Approaches to Teaching the History of the English Language Mary Hayes, Allison Paige Burkette, 2017 The History of the English Language has been a standard university course offering for over 150 years. Yet relatively little has been written about teaching a course whose very title suggests its prodigious chronological, geographic, and disciplinary scope. In the nineteenth century, History of the English Language courses focused on canonical British literary works. Since these early curricula were formed, the English language has changed, and so have the courses. In the twenty-first century, instructors account for the growing prominence of World Englishes as well as the English language's transformative relationship with the internet and social media. *Approaches to Teaching the History of the English Language* addresses the challenges and circumstances that the course's instructors and students commonly face. The volume reads as a series of master classes taught by experienced instructors who explain the pedagogical problems that inspired resourceful teaching practices. Although its chapters are authored by seasoned teachers, many of whom are preeminent scholars in their individual fields, the book is designed for instructors at any career stage, beginners and veterans alike. The topics addressed in *Approaches to Teaching the History of the English Language* include the unique pedagogical dynamic that transpires in language study, the course's origins, and relevance to current university

curricula scholarly approaches that can offer an abiding focus in a semester long course advice about navigating the course s formidable chronological ambit ways to account for the language s many varieties and the course s substantial and pedagogical relationship to contemporary multimedia platforms Each chapter balances theory and practice explaining in detail activities assignments or discussion questions ready for immediate use by instructors Biosemiotic Perspectives on Language and Linguistics Ekaterina Velmezova,Kalevi Kull,Stephen J. Principally intended for tertiary-level inquiry and research, this will be invaluable as a reference work for undergraduate and postgraduate students as well as academics inquiring into the study of meaning and meaning relations within languages. World English(es) and the Multilingual Turn Annalisa Bonomo, 2017-01-06. The recent multilingual turn involves various different implicit and explicit language policies urging pressure and resistance with regard to the spread of English and its dominant relationships with other national languages. As such, this book considers the social value of communication as the basis of multilingualism and of the evolution of language systems. The data presented here show English as being in the middle of the double listening of cultural mediation and the imperfect magnifying glass of translation, with worldwide Standard English being but one of the many other related varieties which enjoy prestige on a large scale. These varieties may be identified according to different features which make the plural world Englishes an umbrella term with blurred edges. New approaches to dialects study have been developed in recent decades, and cartographic mapping has overlapped with the emergence of a new dialectology which deals with the description of language phenomena as complex concepts where complexity provides a challenging framework for investigation and research of languages as dynamic systems made up of variables which mutually influence each other. Thus, dialectometry, dialectology, and standardization become interesting tools for measuring linguistic differences, establishing language typologies, and endorsing the systemic characteristics which can be formalized. Comprehensive and well-informed, this volume will appeal to anyone interested in the spread of English, from researchers and teachers to students, providing them with a greater understanding of some examples of world Englishes analysed under the light of complexity as a product of global society.

Key features include: Discussion of language in relation to various aspects of identity such as those connected with nation and region as well as in relation to social aspects such as social class and race. A chapter on undertaking research that will equip students with appropriate research methods for their own projects. An
