Ecology and Religion in History David Spring, Eileen Spring, 1974 **Ecology and Religion** John Grim, Mary Evelyn Tucker, 2014-01-02 From the Psalms in the Bible to the sacred rivers in Hinduism the natural world has been integral to the world's religions John Grim and Mary Evelyn Tucker contend that today's growing environmental challenges make the relationship ever more vital This primer explores the history of religious traditions and the environment illustrating how religious teachings and practices both promoted and at times subverted sustainability Subsequent chapters examine the emergence of religious ecology as views of nature changed in religious traditions and the ecological sciences Yet the authors argue that religion and ecology are not the province of institutions or disciplines alone They describe four fundamental aspects of religious life orienting grounding nurturing and transforming Readers then see how these phenomena are experienced in a Native American religion Orthodox Christianity Confucianism and Hinduism Ultimately Grim and Tucker argue that the engagement of religious communities is necessary if humanity is to sustain itself and the planet Students of environmental ethics theology and ecology world religions and environmental studies will receive a solid grounding in the burgeoning field of religious ecology Inherited Land Whitney A. Bauman, Richard R. Bohannon, Kevin J.

O'Brien, 2011-08-04 Religion and ecology has arrived What was once a niche interest for a few academics concerned with environmental issues and a few environmentalists interested in religion has become an established academic field with classic texts graduate programs regular meetings at academic conferences and growing interest from other academics and the mass media Theologians ethicists sociologists and other scholars are engaged in a broad dialogue about the ways religious studies can help understand and address environmental problems including the sorts of methodological terminological and substantive debates that characterize any academic discourse This book recognizes the field that has taken shape reflects on the ways it is changing and anticipates its development in the future The essays offer analyses and reflections from emerging scholars of religion and ecology each addressing her or his own specialty in light of two questions 1 What have we inherited from the work that has come before us and 2 What inquiries concerns and conversation partners should be central to the next generation of scholarship The aim of this volume is not to lay out a single and clear path forward for the field Rather the authors critically reflect on the field from within outline some of the major issues we face in the academy and offer perspectives that will nurture continued dialogue

Gottlieb, 2006-11-09 The last two decades have seen the emergence of a new field of academic

study that examines the interaction between religion and ecology Theologians from every religious tradition have confronted world religions past attitudes towards nature and acknowledged their own faiths complicity in the environmental crisis Out of this confrontation have been born vital new theologies based in the recovery of marginalized elements of tradition profound criticisms of the past and ecologically oriented visions of God the Sacred the Earth and human beings The proposed handbook will serve as the definitive overview of these exciting new developments Divided into three main sections the books essays will reflect the three dominant dimensions of the field Part one will explore traditional religious concepts of and attitudes towards nature and how these have been changed by the environmental crisis Part II looks at larger conceptual issues that transcend individual traditions Part III will examine religious participation in environmental politics *Ecology and Religion* John Carmody,1983 **Christianity and Ecology** Dieter T. generations the wisdom of living as a part of nature These traditions can illuminate and empower wiser ways of postmodern living The original writings of Worldviews and Ecology creatively present and interpret worldviews of major religious and philosophical traditions on how humans can live more sustainably on a fragile planet Contributors include Charlene Spretnak Larry Rasmussen Noel Brown Jay McDaniel Tu Wei Ming Thomas Berry David Ray Griffin J Baird Callicott Eric Katz Roger E Timm Robert A White Christopher Key Chapple Brian Swimme Brian Brown Michael Tobias Ralph Metzner George Sessions and Mary Evelyn Tucker and John Grim Insights from traditions as diverse as Jain Jewish ecofeminist deep ecology Christian Hindu Bahai and Whiteheadian will interest all who seek an honest analysis of what religious and philosophical traditions have to say to a modernity whose consciousness and conscience seems tragically narrow the source of attitudes that imperil the biosphere

Ecology and Religion in History David Spring, Eileen Spring, 1974 *Religion and Ecological Crisis* Todd LeVasseur, Anna Peterson, 2016-07-01 In 1967 Lynn White Jr s seminal article The Historical Roots of Our Ecologic Crisis was published essentially establishing the academic study of religion and nature White argues that religions particularly Western Christianity are a major cause of worldwide ecological crises He then asserts that if we are to halt let alone revert anthropogenic damages to the environment we need to radically transform religious cosmologies White s hugely influential thesis has been cited thousands of times in a variety of disciplines including but not limited to religious studies environmental ethics history ecological science philosophy psychology and anthropology In practical terms the ecological crisis to which White was responding has only worsened in the decades since the article was published This collection of original essays by leading scholars in a variety of interdisciplinary settings including religion and nature environmental ethics animal studies ecofeminism restoration ecology and ecotheology considers the impact of White s arguments offering constructive criticism as well as reflections on the ongoing ever changing scholarly debate about the way religion and culture contribute to both environmental crises and to their possible solutions Religion and Ecological Crisis addresses a wide range of topics related to White s thesis including its significance for environmental ethics and philosophy the response from conservative Christians and evangelicals its importance for Asian religious traditions ecofeminist interpretations of the article and which perspectives might have ultimately been left out of his analysis This book is a timely reflection on the legacy and continuing challenge of White s influential article

Religions and Environments Richard

Bohannon, 2014-01-30 Recent decades have witnessed a surge of literature and activism from religious leaders and thinkers on the natural environment. *Religions and Environments: A Reader in Religion, Nature and Ecology* brings together some of the most thought-provoking examples of such writings from the nineteenth century up to today, spanning a variety of methodological approaches and religious traditions, viewpoints and locations. *Religions and Environments: A Reader in Religion, Nature and Ecology* depicts some of the diverse ways that religious narratives and practices have helped people connect to the physical world around them. To do so, it is divided into three parts: the wilderness, the garden, and the city. Traditions represented include nature spiritualities, Asian traditions, Judaism, Islam, Christianity, and indigenous traditions. Reflecting the most current scholarship in the study of religion and nature, as well as providing important historical essays, it draws on a range of perspectives and methodologies, including historical, theological, philosophical, and literary methods. Each part contains a critical introduction by the editor, which provides an overview of issues and guides students to key ideas. Section introductions also provide an overview of the specific issues which arise in the readings in each section. Each part also includes suggestions for further reading and resources on the topics, making this the ideal resource for courses on religion and the environment, religion and ecology, and religion and nature.
